REGULATIONS FOR THE EQUIPMENT OF THE ARMY, 1908.

PART 3.—TERRITORIAL FORCE.

PROVISIONAL EDITION.

Note.—Many questions concerning the equipment of the Territorial Force are still under consideration. Full particulars concerning all outstanding points will be published by Army Order, from time to time, as soon as decisions have been arrived at and details settled. Meanwhile, units in possession of equipment, issued under the Yeomanry and Volunteer Sections of the Equipment Regulations, Part II, may retain such portions of that equipment as may be necessary for the purposes of peace training and instruction.

SECTION I.—GENERAL REGULATIONS.

CARE AND CUSTODY OF PUBLIC EQUIPMENT.

1. The term Public Equipment relates to all Stores (such as arms, ammunition, ordnance, and technical military equipment), issued in kind by the War Office, maintained by the War Office, and for which an Equipment account has to be rendered to local Chief Accountants to be audited by them on behalf of the War Office. Articles such as clothing, personal equipment, harness and saddlery, which are provided or maintained by County Associations out of money grants allotted to them, do not fall within the category of Public Equipment.

2. A County Association is responsible to the Army Council for all public equipment supplied to units administered by the Association. The commanding officer of a unit will, on behalf of the County Association, be responsible that all public equipment supplied for the use and equipment of his unit, is maintained in a serviceable condition, complete in all details and in the authorized proportions.

3. The commanding officer will make, or cause to be made, frequent inspections of the whole of the equipment for which he is responsible, and if any defects are discovered will take steps to

Digitized by Google

remedy them. In the case of men absent from the inspection, a certificate will be furnished by the squadron, company, or battery commander, that their arms are in an efficient condition; this certificate will be appended by the inspecting officer to his report.

4. An officer on assuming command will ascertain either by personal inspection or by the inspection of an officer acting under his authority, the actual state of the public equipment given over, satisfying himself that the articles agree in quantity with those charged in the equipment account, that all the equipment is properly appropriated, that it is in a thoroughly serviceable condition and complete in all details, and that it is under proper protection, and in all respects in accordance with the orders of the Army Council.

5. An officer on assuming command will forward to the general officer commanding-in-chief a certificate in duplicate, in the form given in appendix I, as to the state of the equipment. One copy of the certificate will be transmitted by the general officer commanding-in-chief to the Chief Accountant, and the duplicate returned to the officer assuming command, to accompany his annual equipment accounts.

6. Should a difference of opinion exist between commanding officers on the occasion of transfer of public equipment, as to the state, quantity, or description of the articles to be transferred, application will be made to the general officer commanding by either of the officers concerned, for the assembly of a Board to investigate and report on the matter.

7. No trials or experiments involving the use of any article of public equipment will be made without first obtaining the sanction of the Army Council through the general officer commanding-in-chief.

INDENTS AND ESTIMATES FOR PUBLIC EQUIPMENT.

8. Indents for the supply or exchange, and for the delivery into store, of all descriptions of public stores, and correspondence connected therewith, will be forwarded direct by the officer commanding the unit to the chief ordnance officer.

9. Indents for stores (except ammunition and camp equipment) will be prepared on A.F. G 997, and for camp equipment on A.F. G 968. Special forms are provided for ammunition. The instructions for the preparation of the indents printed on the army forms are to be strictly adhered to.

10. All indents for public equipment will be signed by the officer commanding the unit, or by an officer acting in his name, and will be made in sufficient time to allow of the issue or exchange of the stores without difficulty by the date they are required.

11. Indents will not be made for public equipment to replace articles deemed unserviceable until the commanding officer has satisfied himself that they are thoroughly unserviceable or cannot be repaired by the means at his disposal.

12. In the case of corps having outlying detachments, the indents will be made by the officer commanding the corps, who will

Digitized by Google

state to what place or places the articles are to be sent. In the case of stores sent to outlying detachments, the vouchers will be signed by the officer commanding such detachments, and sent to the officer commanding the corps, to be countersigned by him, or, in his absence, by the adjutant.

13. Issues of stores on pre-payment will (except as provided in paragraphs 40 and 55) only be made upon indents signed by a Secretary of a County Association. Such indents must be headed in red ink with the words

"ON PRE-PAYMENT"

If it is desired that the stores should be distributed by the A.O.D. to units, or portions of units, a detailed distribution list with full consignment particulars must accompany the indent. The cost of carriage of stores issued on payment will not be defrayed by army funds.

14. The value of such stores will be paid to the cashier of the command prior to issue, priced vouchers in triplicate on A.F. G 982 being furnished by the ordnance officer to the accountant for district services in whose area the issuing officer is stationed. The original copy, after receiving the accountant's signature, will be returned to the ordnance officer, and upon receipt of it issue will be made.

COMPLAINTS OF STORES ISSUED.

15. Commanding officers and adjutants of corps will personally examine stores before forwarding any complaints. The result of their examination, if unfavourable, will be reported to the chief ordnance officer. Should vouchers not correctly represent the stores received by the unit, either as to numbers or description, a report will at once be made to the ordnance officer by whom the issue was made.

DEFICIENCIES AND DAMAGES.

16. When stores or equipment of any kind belonging to the public are lost, stolen, destroyed, or damaged, and it is a matter for consideration on whom the expense of repairing or replacing them should fall, owing to the responsibility not being clear or the charge being demurred to by the person held responsible, or for other reasons, the commanding officer will make a full enquiry into the circumstances, and forward a report thereon to the chief ordnance officer for submission to the general officer commanding-in-chief. The report will be accompanied by a list of the damaged or deficient stores on A.F. G 998 duly completed. In the case of arms, the form will be confined solely to arms, the name of the factory, the number of the barrel, and the corps number of each arm will be inserted.

17. When the general officer commanding-in-chief decides the action to be taken in the case, the date and registered number of such decision will be quoted on the indent on the Army Ordnance Department for any stores required in replacement. When the case is referred to the War Office for decision indents for the stores required in replacement may be put forward on the Army

Digitized by Google

Ordnance Department without waiting for the decision of the War Office in the matter, but the date and number of the letter from the general officer commanding-in-chief to the War Office will be quoted on the indents.

18. When arms or stores, the property of the public, are lost or rendered unserviceable by neglect or culpable mismanagement, or should arms be rendered unserviceable by the use of ammunition not of Government issue (*see* paragraph 134), charges will be made only for the unexpired period of wear. No charge, however, will be reduced below a quarter of the full value, even if the article charged for has been in use for the full period of duration.

19. For the purpose of assessing charges, but not in any way to govern the times for exchanging the stores, it will be considered that articles should last the periods assigned to them in appendix III. The unexpired period will be calculated in years, any period of less than 12 months being charged as a full year against the individual responsible.

20. Articles of equipment which are lost and not chargeable against the public will be paid for, and struck off charge in the equipment account by A.F. P 1925. The value will be paid to the cashier of the command, and the voucher striking them off will be signed by the accountant for regimental services, who will give a reference to the cash account in which the value will be found credited to the public. When articles rendered unserviceable are not chargeable against the public, a similar reference will be given, but the unserviceable articles will be returned to the ordnance depôt. The indent for new stores required to replace those lost or destroyed will also give a reference to the expense voucher be which the latter are struck off. These indents should be rendered quarterly from the 1st January.

21. County Associations will be held liable for all charges for deficiencies or damages which cannot be borne by the public. They must make such arrangements as they consider desirable for the recovery of charges from units or individuals.

RETURN OF EQUIPMENT INTO STORE.

22. Whenever it becomes necessary or advisable to return equipment into store, except empty packages and such articles as have been replaced on indent, commanding officers will make application to the chief ordnance officer to receive them; stating their description, number, the time they have been in use, and the reasons and authority (if any) for returning them to store. The chief ordnance officer will add his instructions and return the document to the unit, by whom it will be attached to the voucher on which the stores are charged to the Army Ordnance Department.

23. Issues of arms and other articles of public equipment to replace similar unserviceable articles in possession of a unit will not be made until the unserviceable articles have been returned to the Army Ordnance Department, inspected, and condemned.

24. No articles will be returned into store on account of being of an obsolete pattern without the authority of the general officer commanding-in-chief, obtained through the chief ordnance officer.

Digitized by Google

25. When stores are returned to the Army Ordnance Department in packages, a detail of the contents on A.F. G 1028, signed by the packer, and also, if practicable, by the person witnessing the packing, will be placed in each package.

26. Vouchers will be prepared in triplicate by carbon process on A.F. G 1033 for all stores returned to the Army Ordnance Department. The vouchers will be signed by the consignor; and one copy, duly signed by the consignee, will be returned as soon as practicable after the stores have been received. When stores are passed to other accountants, the vouchers will be prepared in duplicate only.

27. When stores are returned from a distance, vouchers will be sent by post on the same day that the stores are despatched, to the ordnance officer to whom they are consigned. The date and number of the order directing the return of the stores will be inserted in the headings of the vouchers, and a corresponding date and number will be conspicuously marked on the outside of each case or package, so as to enable the consignee to identify them immediately on receipt. Each case, bale, or package will be weighed, and the weight marked upon it by the consignor prior to despatch.

28. Commanding officers are responsible that all chests, cases, barrels, and cylinders, received with equipment of any kind, are handed over, as soon as they can be dispensed with, to the Army Ordnance Department; and, if possible, without cost to the public. The packages will be addressed :—The ordnance officer _____ From the officer commanding _____

29. Where the carriage of ammunition, stores, or equipment is payable by the public, a carrier's note (A.F. G 980 for stores, or G 996 for explosives) detailing the number and weight of the packages, bundles, and loose articles, as well as the number of articles in each bundle, will be sent to the local transport officer, who will arrange the mode of conveyance.

30. When stores and explosives are authorized by the chief ordnance officer to be returned to the Ordnance Depôt, Woolwich, or Weedon, application for instructions as to the mode of transport will be made to the Director of Military Transport, Royal Arsenal, or to the transport officer, Weedon; the carrier's note will be made payable by "Transport, Royal Arsenal," or "Transport, Weedon," as the case may be.

31. The utmost vigilance is required on the part of officers returning stores, in order to guard against explosives being returned into ordinary store depôts, instead of into the magazines, as well as to preclude the possibility of matches, iron nails, &c., being left among stores of any kind. Ball and blank small-arm ammunition should never be returned to store in the same package, nor should live ammunition of any description be packed with empty cartridge cases (*see* paragraphs 143 and 148).

32. If articles returned into store as unserviceable are considered to be still serviceable or capable of repair, or if any of those which are really unserviceable are considered to have become so from improper use or negligence, the chief ordnance officer will call upon the officer returning the stores to furnish an explanation, and, in the event of this not being satisfactory, the chief ordnance

Digitized by Google

officer will bring the matter to the notice of the general officer commanding. Should it be decided to return articles to the corps for further wear, the cost of carriage unnecessarily incurred will be claimed from the County Association.

REGIMENTAL EQUIPMENT ACCOUNTS.

33. In each corps an equipment account containing a record of all articles of permanent equipment the property of the W.D., and of all ammunition supplied gratuitously, will be kept by the adjutant, under the orders of the officer commanding, in the manner detailed in appendix II.

34. Camp equipment, issues on payment, and consumable stores, drawn in regulated proportions (except ammunition), will not be shown in the account; but any quantities of consumable stores remaining unused at the end of the year will be shown as in possession in the indent for the next year's supply. Vouchers will be passed for small-arms and components of small-arms sent for rebrowning and repairs.

35. Ammunition issued gratuitously for practice and exercise will be written off charge, when expended, by expense vouchers as follows:—

Army Form.	Ammunition, Unit, &c.
G 863	Gun ammunition for horse, field, and heavy batteries. (To show full particulars of the allowance, ammunition used, authority for allowance, &c.)
P 1926	Gun ammunition expended under a money allowance by companies, Royal Garrison Artillery.
P 1925	Small arm and machine gun ammunition. (To show, in the case of small arm ammunition, the year to which the ammunition properly belongs and the number of officers and men exercised.)

36. Officers commanding corps having outlying detachments will keep a record of the arms and other stores in possession of each detachment forming part of the corps. This record will be kept at the headquarters of the corps, and A.F. G 1054 will be used for the purpose, except by artillery corps, who will use A.B. 211.

Digitized by Google

SECTION 2.—ARMS.

ISSUE.

37. Arms of the description shown in Table 1 will be issued gratuitously from W.D. Store.

They will be supplied only for the ranks detailed in that Table, the total number issuable (subject to the proviso in the succeeding paragraph) being limited to :—

(a) THE FULL ESTABLISHMENT OF SUCH RANKS	When the strength of the unit is equivalent to its approved establishment.
(b) THE ACTUAL STRENGTH plus 5 per cent. spare in the case of rifles or carbines	When the strength of the unit is below its approved establishment, provided always the maximum number issuable under (a) is not exceeded.

38. The only supernumeraries for whom arms will be issuable will be those members of the Territorial Force who have been enrolled for service in the Special Reserve. Arms of the approved pattern, and in the approved proportions, may be drawn for such men, in addition to the numbers issuable under (*a*) and (*b*) of the preceding paragraph.

39. The necessary adjustment in the number of arms held on charge will be made on the 1st of October of each year, according to the strength, exclusive of officers, shown on A.F. E 548 rendered on that date.

40. Officers, non-commissioned officers and men of the Territorial Force may obtain, on prepayment, carbines and rifles required for their personal use, under the conditions laid down in Appendix IV. Pistols may also be obtained by officers, on prepayment, when required to form part of the officers' regulation equipment.

CARE, CUSTODY, AND INSPECTION.

41. All arms issued to corps remain the property of the public and the officer commanding will take such precautions as shall prevent them being hired by, or lent to, other persons, or used for purposes other than those for which they were issued to the corps.

42. The armoury or armouries to be provided by the County Association must be approved by the general officer commanding-in-chief. They will be of sufficient size to contain all the arms, and should be thoroughly dry and well-aired, free from worm-eaten timber, and must be kept perfectly clean.

The arms will not be moved to any new armoury until such building acquired under proper authority has been certified by the C.R.E. as required by the Regulations for R.E. Services.

43. The commanding officer will see that the armouries are kept at all times as safe against attack as circumstances permit; but if, with a view to increasing the security of the arms, he deems it advisable to give them into the custody of individual members, instead of keeping them collected in one place, he may do so on the conditions laid down in paragraph 45. If circumstances arise

Digitized by Google

rendering it desirable that the arms of a corps should be returned into a government store as a temporary measure of security, the commanding officer will represent the particulars of the case to the general officer commanding-in-chief, who, if he considers it necessary, will authorize the arms to be thus disposed of, either at once, or when the commanding officer may deem expedient. If sanction be given for the removal of the arms, the corps will be supplied by the Army Ordnance Department with arm-chests for the purpose.

44. All the arms on charge of corps will be inspected twice a year by the officer commanding, or by an officer deputed by him. Steps will be taken for replacing any deficient or unserviceable stores by demands upon the chief ordnance officer, and for payment of the value of deficiencies and damages as directed in paragraph 20. One of these inspections must take place between the 1st and the 31st October.

45. The arms will be deposited after drill in the armouries of the corps, except when the commanding officer gives a written permission to members to keep their arms at their own houses, which permission is only to be given on the understanding that arms are taken home by members at their own risk. A record will be kept of all rifles issued from corps armouries to individuals. Such permission will be given with care, and may be withdrawn when the commanding officer may consider it necessary. The arms retained in private custody will be subject to inspection at any time by the officer commanding the regimental district. In any case in which the arms are neglected, the discretionary power granted to the commanding officer in this paragraph will be withdrawn.

46. Drill purpose arms must not be used for ball firing, and no charge for damages to them will be made, except for such as are manifestly wilful.

ARMS.—EXAMINATION, REPAIR, BROWNING, AND CLEANING.

47. A certificated serjeant-instructor will examine thoroughly every arm in possession of the corps once every three months; will keep a record of the condition of the arms; will make detailed reports to the commanding officer, who will be held responsible that the duties of the serjeant are properly performed; and will execute such minor repairs as are laid down in the code of instructions he has received at Birmingham or Enfield Lock.

48. When arms require immediate repairs, other than those referred to in the preceding paragraph, either on account of fair wear or accidental injury, the circumstances will be reported at once to the chief ordnance officer, who will take the necessary steps to have the repairs executed.

49. No repairs to arms of any kind will be executed by soldiers or by any civilian employed by them. Tampering with government arms is a serious breach of discipline, and will render any man who may be guilty of it liable to punishment. Any rifles which on inspection may be found to have had their actions or any other parts improperly altered will be at once returned into store, and repaired at the expense of the corps.

Digitized by Google

50. A copy in large characters of paragraph 49 will be affixed to the door of all armouries and drill sheds, together with a notice that permission to keep his rifle in private custody will be at once withdrawn from any man who may offend against the regulation above quoted.

51. Great attention must be paid to the proper cleaning and care of the arms, instructions for which will be found in the Musketry Regulations.

Commanding officers will caution their men that any neglect in this respect may be attended with danger to themselves, and will impair the accuracy of the weapon as well as render the corps or themselves liable for the cost of any repairs or removal of rust or dirt that may be found necessary on the inspection of the arms. Arms will be cleaned immediately after use.

All rifles must on first issue be thoroughly cleaned before being placed in the hands of the troops.

52. The following scale of material for cleaning, lubricating, and preserving small arms will be issued, free, once per annum :—

Oil, petroleum, Russian, lubricating, pints	10	For each 100 stand of arms.
Flannelette ... ... yards	250	
Sheeting, old... ... ... lbs.	8	
Jute, dressed... ... ... hanks	½	
Wire, brass ... ... ozs.	2	
Composition, preserving, arms ... pints	2	
Paraffin* ... ... pint	½	

Should any further supplies be required they must be obtained from the Army Ordnance Department on prepayment.

53. Should a commanding officer doubt whether arms of any description under his charge are serviceable, he will report the matter, stating the reasons for his opinion, to the chief ordnance officer for submission to the general officer commanding. The practice of testing weapons of any kind in charge of troops, except as provided in the Musketry Regulations, is strictly forbidden. Ammunition obtained from the War Department will alone be used.

54. When arms are removed from the arm-chests care must be taken not to damage the chest fittings. When the fittings appear to have been injured by unfair treatment, their value will be charged against the corps concerned.

55. In the event of a soldier of the Territorial Force desiring to have a new barrel fitted to his rifle at his own expense, he may apply, through his commanding officer, to the Chief Inspector of Small-Arms, Enfield Lock, who, if circumstances permit, will arrange to carry out the work. The cost of carriage both ways, in addition to the cost of the new barrel and the labour expended in fitting it, will be defrayed by the soldier.

VIEWING PRIVATE ARMS.

56. Any private arm of Government pattern which it may be desired to use in shooting matches, or any new barrel that may be required for such arm to replace a worn-out barrel, may be inspected in the department of the Chief Inspector of Small Arms. Application will be made by the owner of the arm or barrel through his

* A.S.C. Supply.

Digitized by Google

commanding officer to the Chief Inspector of Small Arms, Royal Small Arms Factory, Enfield Lock, who will cause the same to be viewed. The name of the maker from whom the rifle, carbine, or new barrel has been ordered will be stated in the application.

57. A charge of one shilling for each arm, and sixpence for each barrel viewed will be made against the owner, in addition to the cost of carriage to and from the Small Arms Department.

58. A certificate to the following effect will be returned with each arm viewed and passed :—

"This is to certify that the† barrel (and breech action) submitted by has been viewed and found to be correct and in conformity with the Government pattern so far as regards length, weight, bore, rifling, form of chamber (and fitting of breech action); that it takes the Government ammunition, and that it may be used in any match restricted to Government military rifles or carbines of this pattern."

† Here insert description of arms or barrels.

COMPONENTS AND TOOLS FOR REPAIRS AND CLEANING.

59. The following proportions of components of arms will be issued to enable the serjeant-instructors to execute repairs :—

Components.	For each Unit per 1,000 arms.				For Horse, Field and Heavy Batteries.
	Rifles M.L.M. Mk. I*.	Rifles M.L.M. Mk. II.	Rifles M.L.M. Mark II*, and M.L.E. Mks. I and I*.	Carbines, Artillery, M.M. Mks. II and III, and M.E.	3 years' supply per battery, for carbines, Arty. M.M. Mks. II and III, and M.E.

These proportions will be kept up by annual indent on the 1st March, on A.F. G 997, on the chief ordnance officer.

60. Should additional numbers of these components be required, they should be obtained through the County Association by

Digitized by Google

prepayment demand upon the chief ordnance officer on prepayment. Officers commanding corps will be held responsible that Government arms are only repaired with components of service pattern supplied from Government stores.

61. The sale, exchange, or gift outside the corps of any components obtained from store on payment is prohibited.

62. The following proportions of tools will be issued on demand, by the chief ordnance officer, for each serjeant-instructor holding a certificate from the Chief Inspector of Small-Arms provided the commanding officer certifies that a properly fitted armourer's shop exists locally for the separate use of such instructor.

Digitized by Google

63. The arms will be sent every fourth year for examination and repair, and re-browning if necessary. In commands where a central armourer's shop has been established the work will be carried out there, and the necessary arrangements will be made by the assistant director of ordnance stores of the command.

In other cases the work will be carried out in the Royal Small Arms Factory, Enfield Lock, and the Chief Inspector of Small Arms will issue the necessary instructions.

64. Arms or parts of arms found deficient will be charged for. Repairs necessitated by fair wear will be executed free of charge; the expense of other repairs will be claimed from the County Association.

65. When the extent of repairs chargeable not against the public has been ascertained, a claim will be prepared in triplicate by carbon process, on A.F. G 838. The original and duplicate will be sent direct to the accountant, the duplicate to the Secretary of the County Association, by whom it will be transmitted to the accountant for regimental services, at the same time remitting the amount to the cashier of the command.

The duplicate and triplicate will be completed as regards credit by the accountant, the former returned by him to the officer who preferred the claim, and the latter to the secretary of the County Association.

66. Full instructions for the use of aiming tubes will be found in the Musketry Regulations. Aiming tubes may be used in service rifles if "Rifles, A.T.," are not available, but any injury caused to barrels of arms through careless insertion or withdrawal of the tubes, or corrosion caused by tubes being left in the barrels, will be charged for as a case of neglect. Aiming tubes and their appurtenances in excess of the free supply authorized by regulations may be issued on pre-payment, provided :—

(1) They are required solely for the use of the unit.
(2) The number indented for is considered by the general officer commanding to be reasonable.
(3) They are available, and can be spared from local Army Ordnance Department stock, or from Weedon.

67. Arms will be marked before issue by the Army Ordnance Department, in accordance with the Regulations for Army Ordnance Services. No further marking will be necessary. The full designation of the corps, and the consecutive numbers to be marked on the arms, will be stated on all indents for arms. Arms issued to replace others will receive the consecutive numbers of those replaced.

SECTION III.—ACCOUTREMENTS.

68. A sling for each rifle and carbine issued under Table 1 will be supplied as Public Equipment.

69. As regards all other accoutrements, initial issues will be satisfied from one or other of the following sources :—

Digitized by Google

(*a*) From the quantities transferred from Yeomanry and Volunteer units administered by the Association.

(*b*) By issues in kind from War Department stock.

(*c*) By issues partly in kind, and partly by money grant.

(*d*) By issue of money grant only.

Alternative (*a*) must be employed whenever possible, but, in any instances in which the articles obtainable from that source prove insufficient in quantity or in pattern for the equipment of the several units administered by an Association, the Army Council reserve the right to direct that either of the other alternatives (*b*), (*c*) or (*d*) shall be employed.

70. The maintenance of all accoutrements—other than rifle and carbine slings—must be effected by County Associations from the money grant allotted to them for that purpose.

71. The articles to be provided for the various arms of the Territorial Force are detailed in Table 2.

SECTION IV.—HARNESS, PACKSADDLERY, AND SADDLERY.

72. Harness, saddlery, and packsaddlery will not be supplied or held as Public Equipment.

Initial issues will, however, be made free under the following circumstances :—

(1) HARNESS of special W.D. patterns :—

(*a*) On first formation of corps.

or

(*b*) For any increase to the approved establishment that may be authorized.

(2) PACKSADDLERY as for special W.D. pattern harness.

(3) SADDLERY (Officers and Men) :—

(*a*) On first formation of Corps.

(*b*) For any increase of strength within the approved establishment, over and above the numbers for which saddlery has already been issued free.

(*c*) For any increase to the approved establishment that may be authorized.

73. The term special W.D. pattern harness is intended to mean the technical harness required for use with those technical military vehicles with which it is not practicable to employ harness obtainable from civil sources.

74. All harness for technical vehicles, and all packsaddlery or saddlery purchased by County Associations, must be obtained exclusively from the Army Ordnance Department. The composition of the sets of such harness, packsaddlery, and saddlery, will be

Digitized by Google

found detailed in Appendix V. The proportions with which units must be equipped are given in Table 3.

Harness and saddlery will, if desired, be marked with corps marks by the Army Ordnance Department prior to issue. The request that the marking should be performed, and full particulars of the corps marks must accompany the indent.

75. Arrangements for the purchase or hire of harness for use with non-technical military vehicles must be made by County Associations.

76. Dubbing, soft soap, and oil will be supplied on pre-payment.

SECTION V.—MISCELLANEOUS.

77. Articles for musketry instruction will be supplied, as Public Equipment, in the following proportions :—

57
Gen. No.
8065

Aim correctors	1	per company of Infantry and 1 per squadron of Yeomanry.
Actions, skeleton	1	per regiment or battalion.
Barrels without bodies	1	per regiment or battalion.
Cartridges, dummy, drill, ·303-inch — Yeomanry	2 per rifle	up to the full establishment of rifles.
Cartridges, dummy, drill, ·303-inch — Engineers	1 ,,	up to the full establishment of rifles.
Cartridges, dummy, drill, ·303-inch — Infantry	2 ,,	up to the full establishment of rifles.

Additional supplies of these articles may be obtained from the Army Ordnance Department on prepayment.

78. The following articles will be supplied to corps, under arrangements to be made by the County Associations, from sources other than Government store :—

Targets.
Brushes, large (1-lb. brushes) for colouring targets.
,, small (sash tool) ,, ,,
Whiting.
Lamp black.
Glue to make size.
Files (to retain documents).
Sponges.
Chalk.

The targets provided will be of such dimensions that the instructions contained in the Musketry Regulations can be complied with.

79. Details of the signalling stores with which units must be equipped are given in Table 17. Articles of signalling equipment purchased for units by County Associations will be obtained on pre-payment from the Army Ordnance Department.

80. Bugles, trumpets, and strings may be obtained on pre-payment from the Army Ordnance Department.

Corps marks may be added by the Army Ordnance Department, provided full particulars are furnished on the indents for the instruments.

Digitized by Google

81. The articles detailed below will, if required, be issued as Public Equipment to each yeomanry regiment for instructional purposes :—

Mallets, heel-peg	... ...	10
Pegs, picketing, with rope loop	... ...	170
Ropes, head, hemp, with ring	... ...	98
Ropes, heel	... ...	34
Ropes, picketing, 4 ft. 9 in.	... ...	98
Tents, complete, circular (unserviceable)	...	4
Pads, surcingle	... ...	98
Bags, corn, 8 lb.	... ...	98

82. One unserviceable circular tent may, if required, be issued as Public Equipment to each infantry battalion for instructional purposes.

79 Scottish 23 **83.** An initial issue of six pick-axes and six shovels will be made, free, for each company of infantry, other than those forming part of cyclist battalions. The responsibility for the maintenance and replacement of these tools will devolve upon County Associations.

SECTION VI.—MACHINE GUNS.

83A. Machine guns will be issued to yeomanry and infantry in the proportion of two per regiment or battalion, and will be accounted for in the regimental equipment ledgers. For details of this equipment, *see* Tables 4 to 9.

Each gun will be provided with four barrels, viz. :—

(1) One in use, serviceable; to be returned to store on mobilization.

(2) One old, or unserviceable, marked "D.P.," for drill purposes, or blank firing only, to be returned to store on mobilization.

(3) Two new spare, in regimental charge, to be taken into use only on mobilization, one in the gun and one as spare.

84. The commanding officer is responsible that machine guns on his charge are at all times in perfect order and in readiness for immediate service.

As a very little neglect may cause serious consequences, his arrangements will be most definite that these guns are always cleaned and examined after every occasion on which they are used.

85. In addition, the Chief Inspector of Small Arms, Enfield Lock, will arrange for a yearly examination to be made by a viewer.

86. When officers commanding find that the shooting of a gun falls off, and that the barrel appears worn, a diagram of 10 shots will be taken at 500 yards (three shots being first fired as trial shots, in order to give the barrel a chance of "settling down"). If the figure of merit exceeds 1·5 feet, they will apply to the

Digitized by Google

chief ordnance officer to have the gun stripped by an armourer-serjeant or qualified armament artificer, and the doubtful barrel replaced by a new one.

87. When a gun, carriage, or mounting requires more repair than can be carried out locally, or a barrel has been withdrawn under paragraph 86, it will be sent, in the case of the gun or barrel, by the most economical route, direct to the Chief Inspector of Small Arms, Enfield Lock; and in the case of the carriage or mounting, to the Assistant Director of Ordnance Stores, Woolwich Arsenal for the necessary repairs to be carried out.

The arrangements for despatch will be made by the chief ordnance officer of the district, to whom all applications will be addressed.

Vouchers will be passed to the Assistant Director of Ordnance Stores, Woolwich Arsenal, under all circumstances notifying when and by what route the guns, carriages, &c., have been sent.

88. If the guns, &c., are required again after repair, indents for their return will be forwarded to the Assistant Director of Ordnance Stores, Woolwich Arsenal (through the local chief ordnance officer). In all cases, a note should be made on the issue voucher, showing whether the stores are, or are not, required to be re-issued.

89. A memorandum of examination, or history sheet, will accompany each machine gun, when issued for service. It will be carefully preserved, and will be handed over with the gun to which it relates, whenever the latter is transferred from the charge of one officer to that of another. An immediate record will be made thereon of any accident which may occur to the gun, and the result of each official examination which it may undergo. On every occasion on which the gun is fired the number of rounds, showing whether blank or ball, will be inserted.

90. Spare parts and tools are issued (in a box), with each machine gun. The spare articles should not be taken into use until those issued with the gun are actually unserviceable, when the latter should be returned to store, and demands at once put forward for their replacement.

91. Materials for cleaning and oiling machine guns and their carriages will be supplied free in the following proportions:—

		For each machine gun and carriage or mounting per annum. Peace only.	For each machine gun and carriage or mounting, 3 months' supply. War only.
Flannelette (4 ins. wide)	yds.	11	3
Linen, old	lbs.	3	$\frac{3}{4}$
Oil, paraffin, light*	pts.	$\frac{1}{2}$	$\frac{3}{4}$
Oil, Rangoon	,,	6	$1\frac{1}{2}$
Mineral jelly	lbs.	$2\frac{1}{2}$	1
Turpentine, spirits of	pts.	1	$\frac{3}{8}$

* An Army Service Corps Supply.

Digitized by Google

The following will be allowed to each store in which machine guns are kept or dealt with, and will be replaced when necessary :—

Flannel (old blanket is very effective)	1 square yard.
Wick, common*	8 ozs.
Twisted copper wire	1 rod, 42 inches long, of wire, 0·1-inch diameter in a double twist.

92. Materials for painting machine guns and their mountings will be issued on the scale laid down in appendix VI. The indent should be supported by a certificate from the commanding officer that the painting is necessary.

93. One "Screen, Artillery, Manœuvres" will be supplied on demand to each regiment of Yeomanry. This screen will be accounted for in the equipment ledger of the unit.

SECTION VII.—CAMP EQUIPMENT.

94. Camp equipment will be issued free of charge for all camps which have been approved by the general officer commanding-in-chief.

The cost of transport both ways will be debited against the special money grant for training the Territorial Force. Carrier's notes will be endorsed "Training Grant, Territorial Force, ———— Command."

95. The proportions of all articles of camp equipment and intrenching tools to be demanded, except for manœuvres, are laid down in Table 10. Indents for camp equipment will be prepared on A.F. G 968, and sent to the chief ordnance officer by commanding officers as early as practicable, and not less than 14 days before the formation of the camp, in order to give time for checking and supply. Commanding officers will estimate as exactly as possible the number of men who are likely to take part in the encampment, and if any tents are, from unforeseen causes, surplus to the approved accommodation after the camp has been formed, they should be struck and returned to store, together with any other articles of camp equipment found to be in excess of approved proportions for the number of men actually encamped.

For manœuvres, camp equipment will be issued in accordance with the scale laid down in Tables 12, 13, 14, and 15, provided always, in the latter case, the provisions of paragraph 109 are fulfilled.

96. Commanding officers, in demanding camp equipment, will, with a view to economy in transport, and to obviate charges for losses and damage to articles not used by them, exercise their discretion as to whether all articles allowed should be demanded : *e.g.*, camp kettles will not be required when private

* An Army Service Corps supply.

Digitized by Google

cooking apparatus is used; the full proportion of intrenching tools will not be required when the soil renders it unnecessary to intrench the tents; picketing gear will not be required when stabling is hired for horses.

97. Wood bottoms for circular tents for officers and men, or for marquees used for hospital purposes, may be issued, when, owing to the dampness of the ground or to other causes, their use is certified by the principal medical officer to be necessary. Tent bottoms will not be supplied for store, office, or workshop tents.

98. At the time of making the first issue of camp equipment, A.F. G 973 will be given by the ordnance officer to the officer drawing the stores, and on this form the officer commanding will record all articles of camp equipment, received and returned by the corps.

99. At the close of the encampment, when the stores have been returned, the camp equipment account will be balanced and forwarded, with all supporting vouchers, to the chief ordnance officer of the area in which the issues were made. This officer will have the account examined and compared with the accounts of the ordnance officers by whom the issues were made. Should any questions arise, they will be decided by the chief ordnance officer after communication with the commanding officer. In the event of units engaged in manœuvres proceeding with camp equipment to an area different from that in which they originally drew it, and returning it to an ordnance depôt in the new area, the officer commanding the unit will still forward his camp equipment account (A.F. G 973) with supporting vouchers to the chief ordnance officer of the area in which the first issue was made.

100. At encampments where local conditions or circumstances render it impossible, or, in the opinion of the general officer commanding undesirable to dig trenches for latrine purposes, and the dry earth closet system has to be specially resorted to, latrine buckets may be issued in the following proportions to the contractor engaged to remove the soil :—

For officers ...	...	20 per cent. of number of officers encamped.
For other ranks	...	10 per cent. of number of other ranks encamped.

These numbers are regarded as sufficient to meet requirements for both dry earth closets and urinals.

The conditions to be fulfilled by the contractors with regard to collection, disinfection, cleaning, repairing and re-delivering these buckets will be found detailed in the "special conditions of contract" embodied in a tender form approved by the Army Council, and issued to general officers commanding to govern local contracts in connection with the dry earth closet system in encampments.

101. Wooden tent pins not exceeding 5 per cent. of the number issued may be written off as expended by fair wear, if such expenditure has actually taken place.

Digitized by Google

102. Claims for deficiencies or damages of camp equipment will be prepared in the manner directed in the Regulations for Army Ordnance Services, and submitted to the Secretary of the County Association for settlement.

103. Tents should not be struck before 10 A.M., otherwise serious damage may be caused to them by dew. Articles of camp equipment which have become wet while in use will be thoroughly dried and cleaned, as far as possible, by the troops, before being returned into store. When a camp is broken up in wet weather, and the ordnance officer, or, in his absence, the commanding officer, is of opinion that the tents should not be struck or other articles of equipment be taken over in a wet state, a detachment will be left behind until the articles are in a proper condition to be returned into store. This detachment will consist of permanent staff only, or of such men as may be willing to remain, if a larger detachment be thought desirable.

104. The following rules and instructions for packing will be observed when handing over stores on the closing of a camp :—

(a) When Stores are handed into an Ordnance Depôt at the camp.

(1) Each regiment will be allotted a space at the ordnance depôt on the camping ground, in which its stores will be laid out for handing over to the Army Ordnance Department.

(2) Paillasse and bolster cases (after being emptied of straw), blankets, and waterproof sheets, will be laid out flat, one on the top of the other, in piles of any height ; they will be checked off and tied in bundles when being taken over by the ordnance officer.

(3) Camp kettles will be packed in the cradles in which they were issued.

(4) Tents will be left in the valises and stacked in piles, except as stated in (8).

(5) Pin bags will be emptied and laid out flat one on top of the other in heaps of 20 or less, as may be convenient.

(6) Marquees will not be securely tied up, as they will have to be examined to check over the various parts, &c.

(7) Axes, mallets, tent poles, spades, and other small stores will be collected and placed so that they can be readily counted.

(8) In wet weather arrangements will be made for handing over, at the depôt, blankets, paillasses, bolsters, waterproof sheets, pin bags, and all other damageable stores, in a store tent, which will be told off to each unit on the morning of the day of the termination of the camp, but all tents will be left standing.

(b) When Stores are not handed over at an Ordnance Depôt at the Camp.

(1) As far as possible stores will be returned in the same cases or vats as those in which they were received ; each package will be labelled and clearly addressed to the ordnance officer. Bundles will be securely tied, in at least two places, with spun yarn.

Digitized by Google

(2) Blankets, G.S., will be rolled lengthwise in bundles of 20, and fastened near either end with spun yarn; horse rugs, paillasse cases, &c., and waterproof sheets (unless packed in cases or vats) in similar bundles of 10. Buckets, tubs, and pails will be nested five together and fastened with yarn; camp kettles will be packed in cradles (five each). Bolster cases will be packed (200) in a paillasse case. Tents will be in valises, pins and mallets in pin bags, poles tied in sets; the loose parts of Soyers' stoves and vehicles will be firmly secured with spun yarn.

(c) When a camp is handed over standing from one unit to another.

The chief ordnance officer will detail a representative of the Army Ordnance Department to witness the transfer, and to assess, as a charge against the outgoing corps, the cost of any damage done to the camp equipment not due to fair wear and tear.

Field Hospital Equipment.

105. When regiments are encamped for training at places where no hospital building is available, field hospital equipment, as specified in Table 11, will be demanded on A.F. G 968.

This equipment will be accounted for in the Camp Equipment return, A.F. G 973, in the manner laid down in paragraphs 98–99.

Medical and Surgical Equipment.

106. The following articles of medical and surgical equipment, will be supplied to each camp, at the commencement of training at stations where no military hospital is available :—

Articles.	No.	Remarks.
(*a*) Panniers, medical comfort, Mark II, filled	2	To be demanded from the Officer Commanding A.S.C. of the area.
(*b*) Panniers, field, medical .... pairs	1	To be demanded on A.F. I 1209, from the Principal Medical Officer of the district.
Field fracture box	1	
Stomach pump....	1	
Tooth instruments .... set	1	
Field medical companion and water-bottle	1	
(*c*) Belts, woollen	10	To be demanded from the Royal Army Clothing Department.
(*d*) Army Book 27 (Admission and Discharge Book)	1	To be demanded from the Stationery Office.
Army Book 39 (Diary or Ward Book)	1	

Digitized by Google

This scale is based on the requirements of 500 men for 15 days (or 1,000 men for 8 days), but in camps where these numbers are exceeded the relative proportion of stores to men should be reduced, according to circumstances, by the general officer commanding.

107. Medical officers will be held personally responsible for all losses, damages, and deficiencies, except for such articles as may be expended for treatment of the sick, or when the damage is the result of fair wear and tear. Losses, &c. will be dealt with as directed in paragraph 16.

108. Medical officers will see that the equipment issued under paragraph 106 is properly packed and duly returned to store at the termination of training. When the equipment is returned to store, each article will be accompanied by an invoice or duplicate list of contents, in which losses, damages, deficiencies, and expenditure will be carefully recorded. This document will be signed and dated by the medical officer in charge of the equipment, and placed inside the article as a voucher.

FIELD BAKERY EQUIPMENT.

109. When bread for consumption by the troops is actually baked in camp by Army Service Corps units of the Territorial Force, Field Bakery Equipment may be issued in the proportions detailed in Table 15.

VETERINARY EQUIPMENT.

110. The following veterinary stores will be supplied to mounted units at the commencement of training, and will be returned on its conclusion. Applications will be sent to the Director-General, Army Veterinary Services, War Office, London, S.W.

One field veterinary chest (officers) per veterinary officer.
" " " " unit pattern—per squadron, battery, or other small unit.
One veterinary wallet complete.

The stores will be demanded from and returned to the Officer in Charge, Army Veterinary Stores, Woolwich Common.

111. In case of very urgent extra requirements during the period of training, telegraphic indent should be submitted to "Nudation," London.

SECTION VIII.—SMALL-ARM AMMUNITION.

112. Service small-arm ball ammunition, as under, will be held during peace for each non-commissioned officer and man on the maximum authorized establishment armed with a rifle or carbine. Service ammunition will not be held for supernumeraries other than those enrolled for service in the Special Reserve.

Yeomanry	100
Artillery	20
Engineers	50
Infantry (including bandsmen)	100
Infantry, drummers, buglers, and pioneers...	20
Army Service Corps	20

Digitized by Google

113. Service ball ammunition will also be held for machine guns in the following proportions :—

	Per machine gun.
Regiments of Yeomanry and Cyclist Battalions of Infantry	3,500
Battalions of Infantry other than Cyclist Battalions	4,000

114. Care will be taken that the authorized proportions of service ammunition is, at all times, maintained in a condition of completeness.

On mobilization additional ammunition will be drawn as directed in paragraphs 217–218.

115. The following quantities of small-arm ammunition are allowed annually for practice and exercise :—

	Ball ·303-inch.	Blank ·303-inch.	Aiming tube.
For each officer, warrant officer, non-commissioned officer, and man exercised—			
Yeomanry	100	25	25
Engineers (field companies only)	90	10	25
Infantry	90	60	25

116. In addition to the above, practice ammunition for use with machine guns will be allowed annually, as follows :—

Unit.	Rounds.	
	Ball.	Blank.
Yeomanry—Per Regiment	1,100	1,000
Infantry—Per Battalion :—		
When the prescribed Musketry Course is fired twice a year....	1,700	1,000
When the prescribed Musketry Course is fired once a year	900	1,000

117. To avoid delay in beginning the annual course of musketry instruction, small-arm ammunition may be issued by the Army Ordnance Department in the proportions laid down by paragraphs 115–116. The amount of ammunition which the corps is entitled to expend during any year (1st November to 31st October) will, however, be determined by the effective strength of the unit reported for that year. The effective strength must not exceed that shown in the quarterly return rendered on the 1st October of the year in which the ammunition has been expended. Any quantities drawn in excess must be paid for unless unexpended, in which case they must be returned to store or deducted from the demand for the ensuing year.

118. A statement must be rendered on the Annual Musketry Return showing how the whole of the ammunition has been disposed of. Corps from which musketry returns are not rendered, will transmit to the general officer commanding a statement detailing the manner in which the ammunition drawn by them under

Digitized by Google

paragraphs 115–116 has been expended. The general officer commanding-in-chief will then forward the statement with his remarks to the Commandant, School of Musketry.

119. Subject to any special orders which may from time to time be issued from the War Office, the small-arm ammunition to be expended at practice and exercise will be taken from that already in possession of troops as service ammunition, and that received from Army Ordnance Department for practice, in the following order :—

(1) The contents of broken boxes, viz., boxes, the tin linings of which have been opened.
(2) Ammunition re-bundled or re-packed at stations other than Woolwich.
(3) Ammunition examined and re-bundled at Woolwich the original date of which is not known. Boxes containing this ammunition bear the words "EXAMINED (year)" on the labels. This ammunition will be used up in the order of the date of examination.
(4) Ammunition examined and re-bundled at Woolwich, the original date of which is known. Boxes containing this ammunition bear the original date of the ammunition, with the addition of a white label (placed diagonally across the old label) on which are the words "EXAM^{d} (year) SERV^{ble}." This ammunition will be used up in the order of the date of manufacture.
(5) Re-made ammunition.
(6) Ammunition not specified above ; the oldest date of manufacture being used first.

Specimens of the labels used in the cases referred to in sub-paragraphs 3, 4, 5, and 6 above, will be found in appendix VII.

Aiming tube ammunition and blank 303″ ammunition will be expended at practice in order of the priority of date of manufacture.

The linings of boxes are not to be disturbed until the ammunition is actually required for use.

120. Pistol ball ammunition, at the rate of 12 rounds per pistol annually, may be drawn for all ranks, other than officers, who are armed with that weapon in time of war.

121. Small-arm ammunition of the following descriptions :—

·303-inch ball ;
·303-inch blank ;
·22-inch, or ·23-inch aiming tube ;

9 Gen. No. 182 issuable gratuitously for practice and exercise may be commuted, within those descriptions, provided the following conditions are fulfilled :—

(*a*) Sufficient ball ammunition to allow of the prescribed musketry courses being fired must, in every case, be reserved for that purpose.
(*b*) The commutations proposed, and the proportion of the authorized scale to be commuted, must be approved by the general officer commanding-in-chief.

Digitized by Google

(*c*) The money value of the ammunition to be drawn by commutation must not exceed the money value of the ammunition to be surrendered.

(*d*) The commutation must be effected prior to the completion of the supply of gratuitous ammunition for the year; ammunition once issued cannot be again received into store for commutation.

122. Blank small-arm ammunition will, if required, be issued gratuitously in the following proportions to units encamped with regular forces :—

9 Gen. No. 182

Yeomanry—not exceeding 10 rounds per man per annum.

Other units—not exceeding 20 rounds per man per annum.

Any portion of this allowance unexpended at the close of the encampment will be returned to the nearest Army Ordnance Depôt.

123. Commanding officers will be allowed to purchase, at the reduced rate of £4 per 1,000 rounds, such quantities of cordite ball ammunition as will not exceed in the aggregate 10 rounds per annum for each enlisted member.

9 Gen. No. 197

124. Commanding officers are permitted to purchase on pre-payment from the Army Ordnance Department such quantity of small-arm ammunition, in addition to that fixed by paragraph 123, as may be required for regimental purposes. Any supplies so obtained will be paid for at vocabulary rates.

125. Indents for the gratuitous supply of small-arm ammunition will be made out on A.F. G 812, for the whole amount required by the corps during the current year (reckoned as in paragraphs 115–116), and must be rendered not later than the 1st December to the chief ordnance officer.

126. All small-arm ammunition not drawn by the 31st October will be forfeited, and any remaining unexpended will be reckoned as part of the supply for the ensuing year, and will be shown in the indent for that year as "in hand."

127. Ammunition gratuitously supplied will be forwarded, free of cost, to the head-quarters of the corps, or to the authorized drill stations of outlying detachments.

128. Commanding officers will not draw at one time a greater quantity of practice ammunition than can be kept in safety until required for use, but, whenever local conditions for safe storage permit, they will draw in one consignment the whole allowance of ammunition for the year.

14 Gen. No. 5043

129. Should the paucity of magazine accommodation render part issues compulsory, a memorandum giving particulars of the detailed consignments must accompany the indent. Every care must be taken to ensure that the annual allowance is not unnecessarily sub-divided into part consignments. If any disregard of this instruction is observed, the excess cost incurred in transport will not be allowed as a charge against army funds.

14 Gen. No. 5043

130. A charge will be admitted against the public for any necessary transport of ammunition of oldest date, which in the course of the turnover, referred to in paragraph 119, has to be transferred to the authorized drill stations of outlying detachments from the place of storage of the service ammunition. The carriage

Digitized by Google

of ammunition supplied on payment will not be defrayed by army funds (*vide* paragraph 13).

131. Army ordnance officers are instructed to issue ammunition of the earliest manufacture in their magazines for the gratuitous supply. In all issues of small-arm ammunition on pre-payment, however, that of a late manufacture will be given.

132. Officers commanding corps will be held strictly responsible for the safe keeping and proper issue and use of all government ammunition, whether issued gratuitously or supplied on payment for their use.

133. Ammunition supplied gratuitously from government store must not be sold to any member of the corps or association, nor must it be used for any purpose other than the authorized practice for which it has been issued.

The sale, exchange, or gift of government ammunition outside the corps or association to which it has been supplied is also prohibited.

It is to be understood that any transaction of such a nature (except under orders from the War Office) is illegal, and will render the parties concerned liable to proceedings at law.

V. 64 18

134. The use in service arms of any ammunition (whether ball, blank or dummy), other than that obtained from the Army Ordnance Department, is forbidden.

135. When troops, at the termination of a field day, are to return by railway to their head-quarters, their arms will be examined, and all the ammunition which has not been expended will be collected from the men and placed in a metal cylinder, or metal-lined case, for conveyance in safety to the head-quarters of the corps to which it belongs. Commanding officers will be held responsible that this regulation is strictly carried out. Cases and cylinders will be issued on payment, on indent for the same being made to the chief ordnance officer.

136. A return on A.F. G 814A, showing the descriptions and quantities of small-arm ammunition on charge of the corps, will be forwarded by the officer commanding on the 15th September in each year to the chief ordnance officer.

137. An outward inspection of all ammunition will be made each year before making out the annual indents under paragraph 125, and the result will be reported to the district officer commanding concerned.

138. Should any defect be discovered in ammunition supplied from W.D. store, full particulars should be furnished to the chief ordnance officer of the area.

Return to Store.

139. When small-arm ammunition boxes, metal-lined cases, powder-barrels, metal cylinders, or other packages are to be sent back to store, officers commanding will as far as possible return them to the ordnance depôt from which they were issued. The packages so returned will be addressed as follows :—

The Ordnance Officer,_____

From the Officer Commanding_____

Digitized by Google

140. When returning small-arm ammunition into store, officers commanding will apply in the first instance for instructions as to its mode of conveyance, to the nearest transport officer, specifying the number of small-arm ammunition boxes or half and quarter barrels to be conveyed.

141. The printed address labels on the barrels, &c., will not be removed. If any are accidentally defaced or removed, the official designation of the corps will be marked on each package.

142. Care will be taken, when ammunition barrels and cases whether full or empty, are to be returned to the Government stores, to remove all tacks, dirt, and grit from them. Instructions will be given to the persons by whom such barrels are to be conveyed to keep them free from dirt and grit during their transit. Address cards will be fixed to the barrels by means of paste or string, and not by tacks or nails.

143. Ball and blank ammunition must not be packed together in one and the same package.

144. The fired cases of small-arm ball and blank cartridges supplied gratuitously will be brought on charge by certificate receipt voucher by weight (not by numbers) in the percentages shown below, and returned each year to the army ordnance depôts from which they were issued.

Nature of ammunition.	Minimum percentage of fired cases which must be returned to store.	Weight per 1,000 cases.
		lbs.
·303-inch ball { used for range practices	98 per cent.	23
·303-inch ball { used for field practices	95 „	23
„ „ blank Mark V	50 „	23
„ „ „ „ VI	50 „	26¾
Pistol, Webley, { ball	98 „	10
Pistol, Webley, { blank....	90 „	10

145. The rates to be charged for any deficiencies in the above percentages for ammunition supplied gratuitously, and amounts to be refunded to units returning fired cases of ammunition supplied on payment, will be governed by the rates included in the "Statement of prices obtainable at the Royal Arsenal to guide disposal of produce, &c." (published half-yearly by the Assistant Director of Ordnance Stores, Royal Arsenal, Woolwich). These rates will be notified in Command or District orders.

146. When fired cases resulting from ammunition obtained on payment are being returned to store, the number and date of the ordnance voucher on which the cartridges were received should be quoted on the pay list voucher of the officer charging the value of the empty cases.

147. The cases will be returned to store in the empty ammunition packages, not oftener than once a quarter, and officers commanding will not return a less weight than that representing 1,000 cases

Digitized by Google

except in the last quarter of the year, when the outstanding balance, whatever it may be, will be sent in. The cases must be in good condition when returned, care being taken that grit and dirt are removed beforehand.

148. Each package will contain a packing note on A.F. G 904, showing the rank, name, and unit of :—

(*a*) The person by whom the cartridge cases were sorted and packed ; and,

(*b*) Of the responsible individual by whom the supervision of the sorting and packing operations was carried out.

If filled cartridges are found in any of the packages, the matter will be reported to the general officer commanding-in-chief for such action as he may consider desirable.

149. An allowance at the rate of 2*s.* 6*d.* per 1,000 will be given to pay for the labour of collecting and sorting cases obtained from ammunition supplied gratuitously. The general officer commanding-in-chief, may in addition to disciplinary action, direct that this allowance be withheld or refunded to the public when live cartridges are discovered in packages purporting to contain fired cases only.

SECTION IX.—ARTILLERY EQUIPMENT.

COAST DEFENCE UNITS.

150. Guns are allotted for instructional purposes to meet the requirements of corps.

151. The guns will be provided with the proper equipment of side-arms, &c., for drill or practice, *vide* equipment pamphlet for drill guns and practice batteries. Stores will also be allowed for instruction and repository exercises as shown in Table 21. The proportions laid down in these tables will not be exceeded.

152. Depression range finders and tripod stands are allowed for instructional purposes, as also laid down in Table 21.

One pillar with base plate and cover will be erected on a site selected for an instrument, except when a pillar at an armament work is available.

153. Gyns, sling wagons, &c., have been allowed in certain exceptional cases. All issues of such stores must be specially authorized.

154. The officer commanding will be responsible that the artillery matériel is kept in an efficient state, and that due economy is observed in its maintenance. He will periodically inspect all such matériel, will report on its condition in the Annual Inspection Reports, will take such steps as may be necessary to have the carriages examined, and, before recommending any to be replaced, he will satisfy himself that they are unserviceable. He will forward all recommendations proposing the condemnation of matériel, in the case of Coast Defence units to the Coast Defence Commander. *See* also paragraphs 165 to 168 with regard to interchangeability of spare parts and the provision of local labour to assist artificers.

Digitized by Google

155. The serjeant-instructors or non-commissioned officers of the Royal Artillery attached as temporary drill instructors will act, under the orders of the commanding officer, as custodians of the guns, gun ammunition, and artillery stores.

DIVISIONAL ARTILLERY.

(Including mounted brigades.)

156. Details of the equipments of brigades for war and for use in peace will be found in Table 22. Brigades are at all times to have in possession their complete public war equipment, on the scale laid down in that table.

157. The equipment for brigade headquarters will be held by the ammunition column when the latter is in regimental charge. When the ammunition column is in Army Ordnance charge the brigade headquarter equipment will be held by one of the batteries in the brigade.

158. A non-commissioned officer of the permanent staff will act as custodian under the orders of the adjutant.

159. The following instructions are to be observed with regard to the storage of ammunition in charge of the unit :—

(*a*) Ammunition should as a general rule be stored in the vehicles in which it will be carried, except that in cases where the vehicles are necessarily kept in dangerous proximity to inhabited houses or other possible causes of fire suitable arrangements will, as far as possible, be made locally for the storage of all cartridges.

(*b*) When not stored in the vehicles, cartridges will be stored as laid down in Regulations for Care and Preservation of War Matériel and for Magazines.

(*c*) Ammunition in mobilization equipment should not be taken out of store except to replenish peace equipment or on mobilization. On no account should ammunition which has been in charge of troops be returned to mobilization equipment.

160. The brigade ammunition columns will be entirely under the command and supervision of the officers commanding brigades, who will be responsible for the efficiency of the column in the same manner as they are responsible for the efficiency of their batteries. The adjutants of brigades will be in immediate charge of the columns and will be the accountants. They will be responsible to the officer commanding for the equipment generally. On mobilization being ordered the officer appointed to command will become responsible for the stores and accounts of the column.

161. The examination and repair of equipment should be carried out by the battery artificers so far as may be possible. When special tools or appliances are required, which are not available with the battery, the artificers may be sent, together with the material requiring repair, to the nearest army ordnance department workshop at which the necessary facilities exist, in order that they may there carry out or assist in carrying out the repair. Any implements, &c., of this equipment required in carrying out a repair should accompany the artificers.

Digitized by Google

Special tools for the repair of field artillery equipment have been issued to the army ordnance workshops at Aldershot, Bulford, Burscough, Colchester, Curragh, Devonport, Dover, Dublin, Haulbowline, Portsmouth, Stirling, and Tynemouth.

162. Applications for the inspection or repair of equipment which cannot be carried out by the artificers should be addressed to the chief ordnance officer of the area.

163. A return will be rendered annually on 1st November on A.F. E 522 showing the number of guns, &c., on charge, this will be forwarded to War Office through the general officer commanding-in-chief in the Command.

164. Instructions for periodical technical examination of ordnance and equipment will be found in Regulations for Army Ordnance Services.

165. All spare parts should be tried for interchangeability as soon as possible after receipt, and a report of the defects, if any, forwarded to the Chief Inspector, Woolwich, through the Chief Ordnance Officer of the area.

166. The expense incurred in providing assistance to enable examiners, or artificers from Woolwich, to carry out the examination or repair of guns will be borne by the public. The rate of pay for such assistance will not exceed 4*s.* per man for a full day's work, or 6*d.* per hour for a shorter period. The officer commanding will submit the account through the Chief Ordnance officer of the area to the Chief Inspector, Woolwich, to be certified as correct before payment, which will then be made locally.

167. When assistance has to be provided for district armament artificers, payment for the service may be made locally at the above rates on the certificate of the Inspector of Ordnance Machinery in the area.

168. Paragraphs 165 to 167 also apply to Coast Defence units.

GUN AMMUNITION.

Coast Defence Units.

169. Gun ammunition (including that for aiming rifles, &c., and blank) will be allowed to the value and amounts shown herein.

GENERAL INSTRUCTIONS.

170. The approval of the general or other officer commanding, obtained through the officer commanding Royal Artillery of the district in which practice is to be carried out, will be obtained for the proposed expenditure under paragraph 169 (i).

171. No portion of the annual allowance for gun ammunition should be expended in any competition except in one authorized as part of the ordinary annual training of corps. This competition should be carried out in conformity with the instructions contained in these Regulations.

172. Officers commanding artillery units, the headquarters of which are distant from government magazines, will, in order, as far as possible, to avoid the necessity of making supplementary indents, apply at the beginning of the training season for the estimated number of rounds of blank ammunition for use during the year with the guns in possession.

173. Ammunition to be used for guns on Royal Artillery charge will be accounted for by the armament officer, and on conclusion of the season's practice of each unit vouchers will be passed, transferring to the unit or corps such ammunition as has been actually expended, which will then be dealt with as laid down in paragraph 35.

174

175. The ammunition stored in Army Ordnance Department charge for units of the divisional artillery should be utilized as far as possible to ensure its proper turnover.

176. Demands for gun ammunition will be made on Army Form G 807.

Digitized by Google

177. Over sea ranges shells containing undrowned explosives, fuzed or unfuzed, may not be fired at a towed target, and when fired at a drifting or anchored target, it must be over deep water.

178. Empty common shells to be fired plugged will be filled with salt cake (to bring them to the required weight), and have their metal plugs screwed in the fuze holes. No more shells than those required for immediate practice will be filled with salt cake. Shells filled with salt cake which have not been expended in practice, or which have been recovered after practice, will be washed out and dried before being placed in store.

179. When filled shells are to be fired plugged, the bursting charge must first be drowned by filling the shells with water.

180. When sealed cylinders of tubes, fuzes, primers, &c., or packages of Q.F. ammunition have been opened for use, and their contents have not been expended, they will be re-closed and retained in excess of equipment and used up at practice on the first opportunity.

181. Any prematures or other failures which may occur in the ammunition used at practice will be reported in accordance with the instructions laid down in "Instructions for Practice Seawards." Articles taken from previously opened cylinders will be distinguished from others in the report.

182. Immediately on the close of artillery practice each day, search will be made on land ranges for unexploded projectiles. Plugged shells not filled with explosives, and shot, which may be found, will be handed over to the Army Ordnance Department, but all fuzed shells and all filled plugged shells will be destroyed *in situ*, as laid down in the Regulations for Care and Preservation of War Matériel and Magazines.

183. A set of stores for the destruction of shells, also such quantity of guncotton and detonators as are considered necessary, will be allowed to each land range. The regulations for packing and storing guncotton and detonators will be strictly observed, and where there are no suitable buildings or sheds available for storage, tents will be used for the purpose. The destruction of shells by means of guncotton will only be carried out under the personal superintendence of the adjutant. Where grass is likely to be injured by the fragments of projectiles lying about, arrangements should be made to collect and pile them on bare spots in the neighbourhood.

184. Rewards will be paid for the recovery of projectiles, in accordance with the Regulations for Army Ordnance Services.

185. Notices will be posted up in the vicinity of all ranges, cautioning civilians against the extreme danger of handling projectiles found on the range, and informing them that no reward or payment of any description for finding shells or collecting projectiles will be paid to a civilian.

TARGETS.

186. Four sets of high-speed targets are allowed to each approved practice battery for general use, in addition to which the use of targets in Royal Garrison Artillery charge will be permitted when

Digitized by Google

annual practice is carried out from Royal Artillery works or batteries.

187. Drawings and specifications to guide manufacture of the high-speed target, also spare parts and materials for repair, can be obtained on demand from the Army Ordnance Department if required.

188. Where practice is carried out on a sea range, floating targets are allowed to a heavy battery in a proportion not exceeding four per battery. In cases where two or more batteries practice together, the proportion will not exceed six targets to two batteries. Where batteries have facilities for firing over land, an establishment of land targets, standing or moving, or dummies, not exceeding in value for one battery 13*l*., two batteries 20*l*., three batteries 30*l*., and per corps of four or more batteries 40*l*., is allowed. The employment of moving targets (land) will be specially authorized by the general officer commanding-in-chief, and will be limited to batteries armed with guns on travelling or mountain carriages.

189. A description of the floating target, Mark III, to be used for sea practice, with detail of components, can be obtained from the Army Ordnance Department on demand. At certain stations where currents are strong, or other exceptional circumstances render the use of heavier or special targets necessary, sanction must be obtained from the War Office.

190.

191. Floating targets are not, as a rule, to be left out at night.

192. For land ranges approved by the War Department moving targets will be provided locally ; their construction being arranged to suit the conditions of the range.

193. Targets and rafts when shot away at practice may be written off charge by a certificate to that effect from the commanding officer on A.F. G 1049. When anchors and cables are lost, the circumstances will be investigated and dealt with under paragraph 16.

PAINTING AND MARKING.

194. **Painting.**

(*Instructions on this subject will be published later.*)

Marking.

195. The instructions with regard to the marking, care and preservation of ordnance, carriages, slides, &c., in the Regulations for Care and Preservation of War Matériel and Magazines will be followed as far as practicable by officers commanding in connection with the artillery matériel on their charge.

"Corps marks" generally require two lines thus :—

First line—Title of unit, *e.g.*, 1 Devon R.F.A.

Second line—Formation to which unit is allotted, *e.g.*, Wessex Div. (T.F.).

196. The following tables indicate the system to be adopted in marking ordnance, carriages, &c., in possession of batteries.

Table I shows the abbreviations to be used for titles of units. Table 2 gives examples of first and second line markings.

HANDBOOKS AND RANGE TABLES.

197. Text-books, handbooks, and range tables are supplied for use of artillery units in the following proportions :—

	Head-quarters of corps.	R.F.A. Brigade and Mounted Brigade Head-quarters.	Com-panies or bat-teries.	Each Battery or Com-pany Officer.	Per instrument.
Text-books—					
Treatise on ammunition	—	1	—	—	—
,, Military carriages	—	1	—	—	—
,, Service explosives	—	1	—	—	—
,, ordnance	—	1	—	—	—
Manual of hydraulics for garrison artillery	—	—	—	—	—
Handbooks for—					
Ordnance, Horse, Field, Heavy, and Mountain Artillery, per nature of gun on charge	—	2	4	1	—
Ordnance, Coast Defence units, per nature of B.L. gun used for drill and practice, or per nature of gun manned on mobilization	3	—	5	1	—
Machine-gun, ·303-inch Maxim	3	—	—	—	—
Range-finders	3	2	4	1	1
Range Tables—					
Horse, Field, Heavy, and Mountain Artillery, per nature of gun on charge	—	2	—	1	—
Coast Defence units, per nature of gun manned on mobilization...	3	—	—	1	—

198. Range tables are to be dealt with as confidential, and kept in possession of an officer.

MAGAZINES: STORAGE AND EXAMINATION OF EXPLOSIVES.

199. At places where the government magazines do not afford accommodation for the storage of made-up gun ammunition, the County Association will be required to provide magazines for its safe keeping. Magazines acquired by County Associations must be certified by the C.R.E. (as required by the Regulations for R.E. Services) and approved by the General Officer Commanding-in-Chief.

200. Where magazines are County Association property, magazine clothing will be provided by the County Association. If government magazines are utilized under army regulations, the clothing provided for them may be worn.

201. The instructions contained in the "Regulations for Care and Preservation of War Matériel and for Magazines" regarding the arrangement of the contents of magazines and stores for the purposes of record will be observed in all magazines or stores containing ammunition in charge of artillery units.

202. All operations connected with the storage, packing, and removal of gunpowder and ammunition will be carried out in accordance with the instructions laid down in A.F. G 939 and 883, copies of which should be placed in convenient positions in the

Digitized by Google

magazines for the information of all those concerned. Cases or barrels will not be opened inside a magazine, or immediately outside the door.

203. Printed regulations for the lighting and care of magazines, A.F. G 877 and G 879, should be placed in convenient positions in the magazines for the information and guidance of those concerned.

204. The instructions contained in the Regulations for Army Ordnance Services, Part II, regarding the transmission of periodical returns relating to explosives, and the technical inspection of such explosives, will, as far as they are applicable, be followed.

205. Government ammunition is not to be stored in any magazine which does not belong to the W.D. or a County Association.

206. The storage in W.D. or County Association magazines of ammunition, or explosives of any kind belonging to private bodies or individuals is forbidden.

207. Adjutants will inspect periodically the magazines of their corps, reporting to their commanding officers after each visit whether the regulations laid down for the custody and safety of the ammunition have been complied with.

SECTION X.

ENGINEER EQUIPMENT.

COAST DEFENCE UNITS.

209. Electric light units stationed in peace at their war stations will be provided with instructional equipment from the Establishment of Stores for electric lights and telephonic communication authorized for those stations.

210. Electric light units stationed in peace at other than their war stations will be provided with equipment for training purposes in accordance with the scale detailed in Table 23.

211. For works and land fronts, tools and materials for instruction in Military Engineering will be issued on the scale laid down in Table 24.

FIELD UNITS

212. Will be supplied in peace with the Equipment detailed in the Tables noted below :—

Units.	Unit Equipment as per Table No.	Additional Equipment for instructional purposes as per Table No.
Field Companies	25	26
Telegraph Companies — Divisional	27	28
Telegraph Companies — Airline	29	30
Telegraph Companies — Cable	31	32
Telegraph Companies — Wireless	33	34
Balloon Company	35	36

Digitized by Google

SECTION XI.

R.A.M.C. EQUIPMENT.

213. Stores for instruction and training may, if required, be issued in the proportions detailed in Table 16.

214. The value of all non-consumable articles found deficient at each annual inspection will be claimed from the County Association.

SECTION XII.

MOBILIZATION EQUIPMENT.

9 Gen. No. 88

215. The stores to be supplied by the Army Ordnance Department on mobilization to all units are detailed in Table 18. Any stores in possession of units will be taken in diminution of the numbers to be issued. The chief ordnance officer, will, during peace, make arrangements to ensure the immediate issue of these stores on mobilization.

216. The stores to be provided regimentally by Yeomanry and Infantry units are detailed in Table 19. Commanding officers will make the necessary arrangements for these stores to be forthcoming on mobilization being ordered. They will be provided out of an allowance which will be granted on mobilization. *See* Regulations for the Territorial Force.

The stores to be provided regimentally by units other than Yeomanry and Infantry, will be detailed in Table 20.

217. Reserve small-arm ammunition will be drawn from the Army Ordnance Department in the command in which the unit mobilizes on the following scale per arm :—

	Rounds.
Yeomanry	200
Field Artillery	Nil.
Garrison Artillery	40
Engineers	100
Infantry (including bandsmen)	200
Infantry—drummers, buglers, and pioneers...	40
Staff serjeants armed with carbine in war—Artillery, Engineers, and Infantry... ...	25
Machine guns { Yeomanry	16,000
Machine guns { Infantry	6,000

218. On mobilization each unit will draw the ammunition detailed above, and take it in regimental charge to its war station. If, however, the war station is in the command in which the unit assembles on mobilization, the issue of ammunition may be arranged for as the general officer commanding-in-chief may direct.

Digitized by Google

219. The place of storage of this ammunition in peace, and any detailed arrangements for its supply will be laid down in the local mobilization orders. All units will be kept informed during peace of these arrangements as far as they themselves are concerned.

SECTION XIII.

COUNTY RIFLE ASSOCIATIONS.

N.B.—The following instructions are to be regarded as temporary only. The question of future administration of County Rifle Meetings, and their connection with the Territorial Force County Associations is under consideration.

220. Small-arm ammunition is issued, free and carriage paid, for use at the annual meeting of a County Rifle Association, the formation of which has been sanctioned by the general officer commanding-in-chief provided the competitions are to take place at a range approved by the War Office. The gratuitous supply is not to exceed 5 rounds for each man of the territorial force, other than yeomen in the county, as shown in the annual returns rendered to the War Office on the 1st November. If, on receipt of indents by the Army Ordnance Department, the printed Annual Return of the territorial forces for the 1st November preceding has not been received in the command, the figures given by indenting officers should be verified by reference to district officers commanding concerned. The verified figures so obtained should govern the issues and should be entered on the vouchers by which the ammunition is written off charge in the accounts of the Army Ordnance Department.

221. Indents for small-arm ammunition for use at a meeting of a County Rifle Association will be made on A.F. G 811, and will be addressed to the general officer commanding-in-chief, who, should he approve of the competitions, will authorize the issue. Copies of this form may be obtained from the chief ordnance officer. Only such number of rounds as will probably be required for actual use at the meeting will be demanded.

222. If more than the regulated number of rounds are required for use at a meeting, an additional supply will be made on pre-payment.

223. All ammunition remaining unexpended after a meeting of a County Rifle Association will be returned to the ordnance depôt from which it was drawn within 14 days after the close of the meeting, together with a statement showing how the ammunition issued free and on pre-payment has been expended. The value of any pre-payment ammunition so returned will be refunded.

224. In the case of ammunition supplied gratuitously the ordnance officer making the issue will see that the proper percentage of empty cases is returned to store or their value credited to the public.

Digitized by Google

225. One Rifle Association only will be recognized in each county. When two or more counties are united in one association, separate associations for such counties cannot also be recognized. Corps belonging to more than one County Rifle Association, will not be included in more than one application for the gratuitous supply of ammunition.

226. The supply of camp equipment to County Rifle Associations will be limited to the marquees and office tents necessary for the business of the meeting, and for the number of enlisted men who actually go into camp and compete in the shooting matches of the Association. A certificate to this effect will be given by the president or secretary in support of the camp equipment demanded. The carriage of the camp equipment will be paid by the public.

ROYAL HORSE, FIELD, AND HEAVY ARTILLERY.

Bandolier*	(Proportion under consideration.)
Bottles, water, with carrier or strap	1 per N.C.O. and man.
Haversack	
Tins, mess, mounted services, with strap	
Straps, great coat	

ROYAL GARRISON ARTILLERY.

Bottles, water, with carrier or strap	1 per N.C.O. and man.
Haversack	
Tins, mess, dismounted services, with cover	
Straps, great coat	2 per N.C.O. and man.
Braces (pairs) or carriers, great coat	1 per N.C.O. and man.
Frog, bayonet (when not supplied as part of the bayonet scabbard)	(Proportion under consideration.)
Belt, waist, with carriages	1 per sword, staff-serjeant's.
Belt, waist, without carriages	1 per all ranks not armed with a sword.
Pouches, ammunition*	(Proportion under consideration.)
Knots, sword....	1 per sword, staff-serjeant's.

ENGINEERS.

Bottles, water, with carrier or strap	1 per N.C.O. and man.
Haversacks	
Tins, mess, mounted services, with strap	1 per mounted N.C.O. and man.
Tins, mess, dismounted services, with cover	1 per dismounted N.C.O. and man.
Straps, great coat	2 per dismounted N.C.O. and man.
Braces, pairs, or carrier, great coat	1 per dismounted N.C.O. and man.
Belt, waist, cavalry	1 per sword, cavalry.
„ „ with carriage	1 per sword, staff-serjeant's.
„ „ without carriage	1 all ranks, dismounted, not armed with a sword.
Bandolier†	1 per mounted man armed with a rifle.
Frogs, bayonet (when not supplied as part of the bayonet scabbard)	1 per sword-bayonet.
Pouches, ·303-inch ammunition†	all dismounted men armed with a rifle.
Cases, pistol	1 per pistol.
Lanyards, pistol	
Pouches, pistol ammunition*	
Knots, sword	1 per sword, staff-serjeant's, or cavalry.

INFANTRY.

Bottle, water, with carrier or strap....	1 per N.C.O. and man.
Haversack	
Tins, mess, dismounted services, with cover	
Straps, great coat	2 per N.C.O. and man.

* To carry not less than 20 rounds per man.
† To carry not less than 50 rounds per man.

TABLE 4.

(Referred to in paragraph 83.)

DETAILS OF MACHINE GUN EQUIPMENT.

Designation.	Proportion per gun.	Remarks.
Section No. 16.		
Belts, ammunition, Maxim, ·303-inch, 250 rounds	16	For Yeomanry. Includes 2 spare, to be carried in a wagon. (*See* Table V. for belts with tripods.)
	18	For Infantry. Includes 2 spare per gun.
Carriage, machine gun; Cavalry, Maxim, ·303-inch	1	When specially approved for Yeomanry.
Carriage, machine gun; Infantry, Maxim, ·303-inch	1	Per machine gun, battalion of Infantry other than Cyclist Battalions.
Carriages, field or tripod, machine gun	1	Per machine gun, battalion of Infantry when specially approved.
Mountings, tripod, ·303-inch, Maxim gun	1	Per machine gun, regiment of Yeomanry, and Cyclist battalion of Infantry.
Guns, Maxim, ·303-inch, complete with fitted spare part box	2	Per battalion of Infantry and regiment of Yeomanry.
Guns, machine, ·303-inch:—		
Rods, cleaning, Mark I	1	
Guns, machine, ·303-inch and ·303-inch converted:—		
Protectors, muzzle	1	To be carried on gun-carriage, when carriages are used.
Guns, Maxim:—		
Locks, skeleton (brass)	1	For instructional purposes, peace.
Plugs, cork, complete	1	
Guns, Maxim, ·303-inch:—		
Barrels	—	(*See* paragraph 83.)
Locks, instructional	1	For instructional purposes, peace (will be issued when available).
Guns, Maxim, ·303-inch and ·303-inch converted:—		
Muzzle attachment for ball firing, Mark II	1	
Cleaners, muzzle attachment	1	
Plugs, belt, Maxim, ·303-inch	1	To be carried on gun-carriage, when carriages are used.
Reflectors, mirror, machine gun, ·303-inch	1

APPENDIX I.

(*Referred to in paragraph* 5.)

CERTIFICATE ON CHANGE OF COMMAND.

WE CERTIFY, in accordance with paragraph 5, Equipment Regulations, Part III, that on the transfer of the equipment of the*_____

on the†_____

the whole has been verified, and has been found to be properly appropriated, in good condition, and to agree in the quantities and numbers of the several articles actually in possession, with those shown in the equipment ledger of the unit.‡

_____

Accountant giving over charge.

_____

Accountant taking over charge.

_____

* Here insert the unit.
† Here insert the date.
‡ In cases where discrepancies are found to exist between the quantities actually in possession and the equipment ledger, the following words are to be added to the certificate, "*with the exception of the items shown in the accompanying list of discrepancies.*" Any explanation that can be given to account for such discrepancies should also be forwarded.

Digitized by Google

APPENDIX II.

(Referred to in paragraphs 33 to 36.)

INSTRUCTIONS FOR KEEPING EQUIPMENT LEDGERS.

1. The ledgers will contain a faithful record of all permanent equipment, the property of the War Department, received or issued. They will be balanced up to 31st October in each year, and will be forwarded, with the vouchers in support, through the County Association, before the 1st December, to the local audit office. The vouchers are to be laid flat in the equipment ledger.

2. Copies will be kept of all equipment ledgers sent for examination. Should any queries arise on the examination of the ledgers, copies of such queries and of the replies will be retained by the accountant, who will correct his copy of the ledger accordingly.

3. On a unit being disbanded the equipment ledger will be balanced and forwarded to the local audit office.

4. When, upon a change of command, equipment is transferred from one accountant to another, the procedure laid down in paragraphs 4 to 6 of these Regulations will be followed.

5. Any surplus stores will at once be brought on charge in the ledger by certificate receipt voucher. The voucher will be signed by the officers who sign the certificate. All stores which may be found to be deficient will be struck off charge, and dealt with as laid down in paragraphs 16 and 20 of these Regulations.

A balance will then be struck, as directed in paragraph 12 of this Appendix, which will show the total of each article of equipment for which the officer who takes over command is responsible. This balance will agree with the numbers given by the certificate, a specimen of which is given in Appendix I.

6. Articles supplied in sets for which a single heading is provided in the printed equipment ledgers, will be so accounted for. Thus, chests with tools will be shown as "chests, tool, filled." A certificate will be given at the end of the ledger by the commanding officer that the sets and tool chests are complete, and contain the articles that should be comprised in them, as detailed in the regulations. When articles charged in detail are taken on in the equipment ledger as sets, reference will be given to the paragraph or table of the regulations which gives the detail. The articles drawn from the army ordnance department to replace losses, &c., in these sets will be taken on charge in the ledger, and the corresponding articles paid for or returned to store will be written off under the same heading.

Digitized by Google

If the two transactions do not occur in the same period of account, explanatory cross references will be given on each of the vouchers concerned.

7. All transactions of receipt and issue that should be recorded in the ledgers will be posted as soon as possible after they occur, and will be supported by voucher.

8. Vouchers for stores issued are called issue vouchers, and are posted on the right hand or credit side. Vouchers for stores received are called receipt vouchers, and are entered on the left hand or debit side of the ledger.

9. Both receipt and issue vouchers will be filled in by the insertion of the total numbers only in the column of the voucher headed "total number or quantity," the columns S. R. D. and U. being left for use of the army ordnance department.

10. The ledger folios at which entries are made should invariably be noted on the vouchers supporting the account in the column headed "ledger folio."

11. Receipt vouchers and issue vouchers will be kept distinct from each other, arranged consecutively according to date, and numbered in red ink on the face of the voucher in two distinct series from 1 upwards for the whole period of the account. The total number of each series will be stated on the inside cover of the ledger.

12. The ledger is balanced by adding up the receipts on the left hand side, and the issues on the right hand side of the ledger, by bringing the total issues over to the left hand side and writing them immediately under the total receipts, the quantities left become the ledger balance or "remain." The remain, when carried forward as the commencing line of the next account, is called the "state."

13. Officers will take care that the ledgers and vouchers are not ticked or altered with coloured pencil or coloured ink, that no correspondence is carried on upon them, and that no erasures are made. No entries in black lead pencil will be shown either in the ledgers or on the vouchers. Any necessary corrections will be made in black ink, and will be duly initialled, in the case of vouchers by the person who signs the vouchers, and in the case of ledgers by the responsible accounting officer; but the original entries should remain legible.

14. In forwarding the equipment account, the officer commanding the unit will certify that it has been carefully checked by an officer appointed by him for that purpose, who will sign it in evidence of such examination.

APPENDIX III.

(Referred to in paragraph 19).

Duration of Arms and Public Equipment.

GENERAL INSTRUCTIONS.

Periods of duration have been assigned to the articles enumerated in the table on page 109, with the object of informing County Associations, commanding officers and ordnance officers of the length of time public equipment should remain serviceable under ordinary circumstances if new when issued. Equipment issued in a part worn condition should normally last at least half the period prescribed for new articles of the same description. The periods of duration are not intended in any way to govern the times for exchanging the stores, which must continue to be used until actually unserviceable. Should it appear that articles are becoming unserviceable before they have been in use the prescribed periods, inquiry should be made into the cause thereof; since, in the absence of sufficient reason to explain the circumstance, the troops become liable to be charged in accordance with paragraphs 16 to 21 of these Regulations.

On active service the periods of duration are liable to vary according to the conditions to which the articles may have to be subjected, but the prescribed periods will be kept in view, and adhered to as far as practicable.

APPENDIX IV.

(Referred to in paragraph 40.)

Conditions governing the Sale of Carbines and Rifles.

Carbines or rifles, of any service pattern, may be issued on prepayment, under the following conditions, to officers, non-commissioned officers and men of the Territorial Forces.

Conditions.

(1) Issues, which will be limited to one carbine or rifle per officer, non-commissioned officer or man, will be authorized on the distinct understanding that the arms are not required for the purposes of sale or trade.

(2) All carbines or rifles must be obtained from Weedon, and are not to be issued on prepayment from local stock. They will be demanded through the usual channels on quarterly indents, which should be submitted so as to reach Weedon on the 1st January, 1st April, 1st July, and 1st October.

A nominal roll showing the ranks, names, and units of the individuals for whom arms are demanded should accompany each indent.

(3) Prior to despatch from Weedon a special sale mark will be applied to all carbines or rifles issued for sale.

(4) Only carbines or rifles bearing the special sale mark will be issued on prepayment.

Local stocks of arms bearing the special sale mark will not be held in anticipation of prepayment demands.

(5) The vocabulary rate current at date of issue, plus 1*s.* per arm to cover the cost of special sale marking, will be charged, and recovered locally by the accountant for district services.

(6) All carbines or rifles sold under the foregoing conditions will become the personal property of the purchaser, and will not be accounted for in the equipment ledgers of units.

(7) Spare parts and components may also be supplied on prepayment for the repair of service arms issued under the foregoing instructions. Barrels with bodies must be obtained from Weedon in the manner prescribed for complete arms. They will be marked with the special sale mark, for which a charge of one shilling, in addition to vocabulary rate, will be made. Credit for replaced parts, if returned to store, cannot be allowed.

[The amendments made to the Regulations of 1909 are denoted by a black line in the margin. As some typographical errors may have occurred in publication it is requested that, should any be discovered, they may be at once pointed out, in writing, to the Secretary, War Office.]

REGULATIONS FOR THE EQUIPMENT OF THE ARMY, 1911.

PART 3.—TERRITORIAL FORCE.

SECTION I.—GENERAL REGULATIONS.

CARE AND CUSTODY OF PUBLIC EQUIPMENT.

1. The term "Public Equipment" relates to all stores (such as arms, ammunition, ordnance, and technical military equipment) issued in kind and maintained by the Government, and for which an equipment account has to be rendered to local auditors for audit on behalf of the War Office. Articles such as clothing, personal equipment, harness and saddlery, which are provided or maintained by County Associations out of money grants allotted to them, do not fall within the category of public equipment.

2. A County Association is responsible to the Army Council for all public equipment supplied to units administered by the Association. The commanding officer of a unit will, on behalf of the County Association, be responsible that all public equipment supplied for the use and equipment of his unit is maintained in a serviceable condition, complete in all details and in the authorized proportions.

3. The commanding officer will make, or cause to be made, frequent inspections of the whole of the equipment for which he is responsible, and if any defects are discovered will take steps to remedy them. In the case of men absent from the inspection a certificate will be furnished by the squadron, company or battery commander that their arms have been inspected and that they are in an efficient condition; this certificate will be appended to the report made by the officer who carries out such inspection.

A.O. 111 1911

Digitized by Google

4. An officer on assuming command, and thereafter annually during October, will ascertain by inspection and stocktaking carried out either by himself or by an officer acting under his authority, the actual state of the public equipment on charge, satisfying himself that the articles agree in quantity with those shown in the equipment account, that all the equipment is properly appropriated, that it is in a thoroughly serviceable condition and complete in all details, and that it is under proper protection, and in all respects in accordance with the orders of the Army Council.

A.O. 111 1911

The formal receipts given by the men allowed to retain arms under paragraph 55 are not to be regarded as dispensing with the actual production of the arms when stocktaking is being carried out.

A.O. 113 1910

5. On a change of command a certificate in duplicate, in the form given in Appendix I, as to the state of the equipment, signed by the retiring commanding officer and the next senior officer upon whom the command devolves, will be forwarded to the general officer commanding-in-chief. One copy of the certificate will be transmitted by the general officer commanding-in-chief to the local auditor, and the duplicate will be returned to the officer assuming command, to accompany his equipment account.

Should the officer temporarily taking over the command be appointed commanding officer, no further certificate will be necessary.

Should another officer be appointed, a similar certificate, signed by himself and the officer temporarily in command, will be forwarded by the former to the general officer commanding-in-chief.

6. Should a difference of opinion exist between commanding officers on the occasion of transfer of public equipment, as to the state, quantity, or description of the articles to be transferred, application will be made to the general officer commanding by either of the officers concerned, for the assembly of a board of officers to investigate and report on the matter.

7. No trials or experiments involving the use of any article of public equipment will be made without first obtaining the sanction of the Army Council through the general officer commanding-in-chief.

8. All communications connected with the supply of equipment, whether authorized by, or in excess of regulations, will be addressed to the chief ordnance officer, who will, if necessary, take the orders of superior authority on the subject.

INDENTS AND ESTIMATES FOR PUBLIC EQUIPMENT.

9. Indents for stores (except ammunition and camp equipment) will be prepared on A.F. G 997, and for camp equipment on A.F. G 968. Special forms are provided for ammunition. The instructions for the preparation of the indents printed on the army forms are to be strictly adhered to.

10. All indents for public equipment will be signed by the officer commanding the unit, or by an officer acting in his name, and will

Digitized by Google

be made in sufficient time to allow of the issue or exchange of the stores without difficulty by the date they are required.

11. Indents for public equipment to replace articles deemed unserviceable will not be made until the commanding officer has satisfied himself that the articles are thoroughly unserviceable or cannot be repaired by the means at his disposal.

12. In the case of units having outlying detachments, the indents will be made by the officer commanding the units, who will state to what place or places the articles are to be sent. The vouchers will be signed by the officer commanding such detachments, and sent to the officer commanding the unit, to be countersigned by him, or, in his absence, by the adjutant. A.O. 111 1911 A.O. 111 1911

13. Stores and equipment other than public equipment and those mentioned in paragraphs 46 and 70 may be supplied on repayment to County Associations at the rates prescribed in the Priced Vocabulary of Stores subject to the following conditions and restrictions:— A.O. 111 1911

(1) The articles demanded are solely for use of units of the Territorial Force and will not be used for any private purpose.

(2) The articles purchased will be retained, so long as they are serviceable, as Association property, and will not be disposed of until worn out.

(3) The units for which articles are required will be shown on the indents, and the stores, etc., demanded must be of pattern indentical to, or of a kindred nature to those supplied under the Equipment Regulations to corresponding units of the regular army. The numbers required must not be in excess of the proportions allowed for the regular army.

War Office approval must be obtained prior to issues being made, when:—

(1) The total value of the articles demanded exceeds £200.

(2) The articles demanded are of a new pattern which is being gradually introduced into the regular army.

(3) The articles demanded are intended to supplement scales of which free issues are made or to anticipate such free issues (except as provided for in paragraphs 15, 66, 84 and 167).

(4) The articles are included in the Barrack and Hospital Schedules.

Applications should be addressed to the chief ordnance officer, and they should contain full details of the reasons which render them necessary.

The following will not be supplied:—

(1) Articles of an experimental pattern under trial in the regular army.

(2) Articles of a special pattern not in general use in the regular army.

(3) Guns, gun carriages and mountings, technical vehicles, explosives and gun ammunition.

Digitized by Google

All indents for issues on repayment must be signed by the secretary of the County Association concerned and be headed in red ink with the words "On Repayment." If it is desired that the stores should be distributed by the Army Ordnance Department to units, or detachments of units, a detailed distribution list with full consignment particulars must accompany the indent.

14. The value of stores issued on repayment will be recovered by the command paymaster of the command in which the Association indenting for the stores is located, except in the case of issues from Woolwich Arsenal which will be recovered by the Cashier M.G.O.F., Woolwich. Priced vouchers on Woolwich, Form 1 (for Woolwich) and on A.F. G 982 (for other stations) will be rendered by the Army Ordnance Department as follows:—

Three copies to the County Association who will obtain the receipt of the unit on one and return the same to the Army Ordnance Department. The voucher bearing the receipt will then be rendered with two further copies by the Army Ordnance Department to the command paymaster, who will forward one copy as a claim to the Association, retain another as a voucher to the cash account, and return the third bearing the unit's receipt to the Army Ordnance Department with a reference to the cash credit.

In the case of stores issued under paragraphs 46 and 70 the issues will be on prepayment, and the vouchers in triplicate will be forwarded to the unit, who at the time of making payment will forward two of the copies of the voucher to the command paymaster, who will retain one as a voucher to the cash account and return the other to the Army Ordnance Department with a reference to the cash credit. The stores will then be issued and the receipt of payers obtained.

The cost of carriage of stores issued by the Army Ordnance Department, as initial issues ordered by the War Office will be chargeable to army funds.

The cost of carriage of stores issued on repayment to County Associations for the care, repair, replacement or maintenance of authorized equipment will not be defrayed from army funds.

15. Stores required by County Associations for the care, repair, replacement or maintenance of authorized equipment may be obtained from the Army Ordnance Department on repayment.

RECEIPT OF STORES.

16. Commanding officers and adjutants of units will personally examine stores upon receipt from the Army Ordnance Department. The result of their examination, if unfavourable, will be reported to the chief ordnance officer.

Should vouchers not correctly represent the stores received by the unit, either as to numbers or description, a report will at once be made to the ordnance officer by whom the issue was made.

Digitized by Google

DAMAGES AND DEFICIENCIES.

17. When public equipment is lost, stolen, destroyed, or damaged, and it is a matter for consideration on whom the expense of repairing or replacing it should fall, owing to the responsibility not being clear or the charge being demurred to by the person held responsible, or for other reasons, the commanding officer will make a full enquiry into the circumstances, and forward a report thereon to the chief ordnance officer for submission to the general officer commanding-in-chief. The report will be accompanied by a list of the damaged or deficient stores on A.F. G 998 duly completed in strict accordance with the instructions contained thereon.

18. When the general officer commanding-in-chief decides the action to be taken in the case, the date and registered number of such decision will be quoted on the indent on the Army Ordnance Department for any stores required in replacement. When the case is referred to the War Office for decision, indents for the stores required in replacement may be put forward on the Army Ordnance Department without waiting for the decision of the War Office in the matter, but the date and number of the letter from the general officer commanding-in-chief to the War Office will be quoted on the indents.

19. When public equipment is lost or rendered unserviceable by neglect or culpable mismanagement, or if arms are rendered unserviceable by the use of ammunition not of Government issue (*see* paragraph 177), charges will be made only for the unexpired period of wear. No charge, however, will be reduced below a quarter of the full value, even if the article charged for has been in use for the full period of duration.

20. For the purpose of assessing charges, but not in any way to govern the times for exchanging the stores, it will be considered that articles should last the periods assigned to them in Appendix III. 24 years will be taken as the period of duration for any article for which no period has been laid down. The unexpired period will be calculated in years, any period of less than 12 months being charged as a full year against the individual responsible. A.O 315 1910

21. Articles of public equipment which are lost and not chargeable against the public will be paid for, and struck off charge in the equipment account by A.F. P 1925. The value will be paid to the cashier of the command, and the voucher striking them off will be signed by the regimental paymaster, who will give a reference to the cash account in which the value will be found credited to the public.

When articles of public equipment rendered unserviceable are not chargeable against the public, a similar reference will be given, but the unserviceable articles will be returned to the ordnance depôt. The indent for new stores required to replace those lost or destroyed will also give a reference to the expense voucher by which the latter are struck off. These indents should be rendered quarterly from the 1st January.

Digitized by Google

22. County Associations will be held liable for all charges for deficiencies or damages which cannot be borne by the public. They must make such arrangements as they consider desirable for the recovery of charges from units or individuals.

RETURN OF EQUIPMENT INTO STORE.

23. Whenever it becomes necessary or advisable to return equipment into store, except empty packages and such articles as have been replaced on indent, commanding officers will make application to the chief ordnance officer to receive them, stating their description, number, the time they have been in use, and the reasons and authority (if any) for returning them to store. The chief ordnance officer will add his instructions and return the document to the unit, by whom it will be attached to the voucher on which the stores are charged to the Army Ordnance Department.

24. Issues of public equipment to replace similar unserviceable articles in possession of a unit will not be made until the unserviceable articles have been returned to the Army Ordnance Department, inspected, and condemned.

25. No articles will be returned into store on account of being of an obsolete pattern without the authority of the general officer commanding-in-chief, obtained through the chief ordnance officer.

26. When stores are returned to the Army Ordnance Department in packages, a detail of the contents on A.F. G 1028, signed by the packer, and also by the person witnessing the packing, will be placed in each package.

A.O. 290 1909

27. Vouchers will be prepared in triplicate by carbon process on A.F. G 1033 for all stores returned to the Army Ordnance Department except as stated in paragraph 37. The vouchers will be signed by the consignor; and one copy, duly signed by the consignee, will be returned as soon as practicable after the stores have been received. When stores are issued to other accountants, the vouchers will be prepared in duplicate only.

28. When stores are returned from a distance, vouchers will be sent by post on the same day that the stores are despatched, to the ordnance officer to whom they are consigned. The date and number of the order directing the return of the stores will be inserted in the headings of the vouchers, and a corresponding date and number will be conspicuously marked on the outside of each case or package, so as to enable the consignee to identify them immediately on receipt. Each case, bale, or package will be weighed, and the weight marked upon it by the consignor prior to despatch.

29. Commanding officers are responsible that all chests, cases, barrels, and cylinders, received with equipment of any kind, are handed over, as soon as they can be dispensed with, to the Army Ordnance Department; and, if possible, without cost to the public. The packages will be addressed :—

The Ordnance Officer
From the Officer Commanding

Digitized by Google

30. Where the carriage of ammunition, stores, or equipment is payable by the public, a carrier's note (A.F. G 980 for stores, or G 996 for explosives) detailing the number and weight of the packages, bundles, and loose articles, as well as the number of articles in each bundle, will be sent to the local transport officer, who will arrange the mode of conveyance.

31. When stores and explosives are authorized by the chief ordnance officer to be returned to the Ordnance Depôt, Woolwich, or Weedon, application for instructions as to the mode of transport will be made to the Assistant Director of Military Transport, Royal Arsenal, or to the Transport Officer, Weedon; the carrier's note will be made payable by "Transport, Royal Arsenal," or "Transport, Weedon," as the case may be.

32. The utmost vigilance is required on the part of officers returning stores, in order to guard against explosives being returned into ordinary store depôts, instead of into the magazines, as well as to preclude the possibility of matches, nails, &c., being left among stores of any kind. Ball and blank small-arm ammunition should never be returned to store in the same package, nor should live ammunition of any description be packed with empty cartridge cases (*see* paragraphs 187 and 191).

33. If articles returned into store as unserviceable are found on receipt by the Army Ordnance Department to be still serviceable or capable of repair, or if any of those which are unserviceable are considered to have become so from improper use or negligence, the chief ordnance officer will call upon the officer returning the stores to furnish an explanation, and, in the event of this not being satisfactory, the chief ordnance officer will bring the matter to the notice of the general officer commanding. Should it be decided to return articles to the unit for further wear, the cost of carriage unnecessarily incurred will be claimed from the County Association.

REGIMENTAL EQUIPMENT ACCOUNTS.

35. An equipment ledger containing a record of all articles of public equipment, and of all ammunition supplied gratuitously will be kept under the orders of the officer commanding the unit. A.O. 20 1910

For the purposes of regimental equipment accounts the term "unit" may be defined as under:—

Yeomanry ...	...	The regiment.
Infantry (including cyclist battalions)	...	The battalion.
All other units	...	The battery, company, etc.

When the equipment is not all located at the headquarters of the unit, a distribution book will be kept to show the manner in which the articles are allocated between the outlying squadrons, companies, or stations, as the case may be. A.F. G 1054 will be used for this purpose except by artillery units, who will use A.B. 211. A.O. 315 1910

Detailed instructions for keeping equipment ledgers are contained in Appendix II.

Digitized by Google

36. Camp equipment, issues on payment, and consumable stores (except ammunition) drawn in regulated proportions, will not be shown in the account. Any quantities of consumable stores remaining unused at the end of the year will be shown as in possession in the indent for the next year's supply.

A.O. 290 1909

37. Stores sent to the Army Ordnance Department for repair and return to the unit will not be struck off equipment ledger charge unless the chief ordnance officer gives special instructions for vouchers to be passed. This course will, as a rule, only be necessary when stores have to be sent on to Woolwich or Enfield, or are condemned as being beyond repair.

A.O. 315 1910

38. The whole of the expendable stores issued annually for the instruction of engineer units in military engineering under Section X will be brought on equipment ledger charge by the unit. Quantities expended in training will be written off charge by expense vouchers upon the certificate of the commanding officer that the expenditure has actually taken place.

Any unexpended balance remaining at the end of the training season will, except in the case of sandbags, be returned to the Army Ordnance Department. Sandbags may be accumulated up to, but not exceeding, treble the quantity allowed as the annual supply. The quantity in hand should be shown on the annual indent submitted to the chief ordnance officer.

39. Ammunition issued gratuitously for practice and exercise will be written off charge, when expended, by expense vouchers as follows:—

Army Form.	Ammunition, Unit, &c.
G 863	Gun ammunition for horse, field, and heavy batteries. (To show full particulars of the allowance, ammunition used, authority for allowance, &c.)
P 1926	Gun ammunition expended under a money allowance by companies, Garrison Artillery.
P 1925	Small-arm and machine gun ammunition.

Digitized by Google

SECTION II.—ARMS AND BICYCLES.

A.O. 111 1911

ISSUE.

42. Arms of the description shown in Table 1 will be issued gratuitously by the Army Ordnance Department.

They will be supplied only for the ranks detailed in that table, the total number issuable (subject to the proviso in paragraph 44) being limited to:—

(*a*) THE FULL ESTABLISHMENT OF SUCH RANKS — When the strength of the unit is equivalent to its approved establishment.

(*b*) THE ACTUAL STRENGTH plus 5 per cent. spare in the case of rifles or carbines — When the strength of the unit is below its approved establishment, provided always the maximum number issuable under (*a*) is not exceeded.

In any instance in which a unit is, temporarily, much below its approved establishment and arms additional to those issuable under (*b*) are required for the use of members of the Territorial Force Reserve proceeding to camp, temporary issues* of additional arms may be made subject to the condition that at no time, unless War Office authority be first obtained, will units be permitted to hold arms in excess of the maximum authorized establishment for whom arms are normally issuable under these regulations. A.O. 211 1910

43. Sufficient arms will be maintained by the Army Ordnance Department in each command to complete the war equipments of all units on mobilization. 57 Genl. No. 181

44. The only supernumeraries for whom arms will be issuable will be those members of the Territorial Force who have been enrolled for service in the Special Reserve. Arms of the approved pattern, and in the approved proportions, may be drawn for such men, in addition to the numbers issuable under (*a*) and (*b*) of paragraph 42.

45. The necessary adjustment in the number of arms held on charge will be made on the 1st of October of each year, according to the strength, exclusive of officers, shown on A.F. E 548 rendered on that date.

46. Officers, non-commissioned officers and men of the Territorial Force may obtain, on prepayment, carbines and rifles required for their personal use, under the conditions laid down in Appendix IV. Pistols may also be obtained by officers on prepayment, when required to form part of the officers' regulation equipment.

* As defined in the Regulations for Army Ordnance Services, Part I.

Digitized by Google

A.O. 211 1910

47. Issues of arms on payment will not be made to members of the Territorial Force Reserve.

48. Swords and sword bayonets will on mobilization being ordered, be sharpened with a fine whetstone of the type used for sharpening scythes, knives, etc., in the following manner:—

A.O. 316 1910

Hold the sword or sword bayonet with the point resting on a support, then use the whetstone, as if filing in a crosswise manner, restricting the operation to those portions of the blade that have already been reduced to a thickness of ·01-inch and taking care to maintain the same angle of edge as that which already exists.

After sharpening wipe the blade clean and lubricate with "oil, petroleum, Russian, lubricating." The work will be carried out only by competent persons and a grant of funds to meet the cost of this service, including hire or purchase of whetstones is sanctioned under Regulations for the Territorial Force.

A.O. 111 1911

49. A bicycle may be issued from the Army Ordnance Department for each member of the permanent staff of cyclist battalions.

CARE, CUSTODY, AND INSPECTION.

52. All arms issued to units remain the property of the public and the officer commanding will take such precautions as shall prevent them being hired by, or lent to other persons, or used for purposes other than those for which they were issued to the units.

A.O. 290 1909

53. The duty of selecting suitable armouries devolves upon County Associations. Armouries must be of sufficient size to contain all the arms of the unit or detachment of the unit to which they may be allocated. They should also be thoroughly dry and well

A.O. 111 1911

aired, free from worm-eaten timber and be kept perfectly clean.

54. All the arms on charge of units including those kept in private custody under paragraph 55, will be inspected twice a year by the officer commanding, or by an officer deputed by him. Steps will be taken for replacing any deficient or unserviceable stores by demands upon the chief ordnance officer, and for payment of the value of deficiencies and damages as directed in paragraph 21. One of these inspections must take place between the 1st and the 31st October.

55. The arms will be deposited after drill in the armouries of the units, except when the commanding officer gives a written permission to members to take custody of their arms at their own houses.

A.O. 211 1910

Such permission does not relieve the commanding officer of his responsibility for these arms and will not under any circumstances be given to members of the Territorial Force Reserve. It will be

9 Genl. No. 2743

given with care and may be withdrawn at the discretion of the commanding officer. The arms should be called in during times of riot or of anticipated disturbance.

A.O. 111 1911

Arms retained in private custody will be subject to inspection at any time by the brigade commander and must always be produced for inspection as required by paragraphs 3, 4, and 54. In any case in which the arms are neglected the discretionary power granted to the commanding officer in this paragraph will be withdrawn.

Digitized by Google

56. A record will be kept in A.B. 316 or 316A of all articles of public equipment issued from units armouries to individuals. Soldiers to whom public equipment is issued under the authority contained in paragraph 55 should be warned that they are individually responsible for keeping such equipment in good order and condition, and for producing the same when required. Their responsibility in the matter will continue until the equipment has been returned to the custody of the unit, and duly entered and signed for in the army book above mentioned.

57. Drill purpose arms must not be used for ball firing, and no charge for damages to them will be made, except for such as are manifestly wilful.

58. The instructions contained in the Handbook for Military Bicycles will apply to all government bicycles. N.C.Os. of the permanent staff in possession of the certificate referred to in King's Regulations, will for the purpose of these instructions, be considered as having the same qualifications as certificated armourers. A.O. 111 1911

Government bicycles will be periodically inspected by the Chief Inspector of Small-Arms.

ARMS.—EXAMINATION, REPAIR, BROWNING, AND CLEANING.

61. A certificated serjeant-instructor will examine thoroughly every arm in possession of the unit once every three months; will keep a record of the condition of the arms; will make detailed reports to the commanding officer, who will be held responsible that the duties of the serjeant are properly performed; and will execute such minor repairs as are laid down in the code of instructions he has received at Birmingham or Enfield Lock.

62. When arms require repairs at times other than those specified in paragraph 81, either on account of fair wear or accidental injury, and the repairs are such as cannot be executed in accordance with paragraph 61, the circumstances will be reported at once to the chief ordnance officer, who will take the necessary steps to have the repairs executed. When the cost of such repairs is recoverable through the County Association, the cost of carriage will also be defrayed by the Association. A.O. 111 1911

63. No repairs to arms of any kind will be executed by soldiers (other than certificated serjeant-instructors), or by any civilian employed by them. Tampering with government arms is a serious breach of discipline, and will render any man who may be guilty of it liable to punishment. Any rifles which on inspection may be found to have had their actions or any other parts improperly altered will be at once returned into store, and repaired at the expense of the unit.

Digitized by Google

64. A copy in large characters of paragraph 63 will be affixed to the door of all armouries and drill sheds, together with a notice that permission to keep his rifle in private custody will be at once withdrawn from any man who may offend against the regulation above quoted.

65. Great attention must be paid to the proper cleaning and care of the arms, instructions for which will be found in the Musketry Regulations.

Commanding officers will caution their men that any neglect in this respect may be attended with danger to themselves, and will impair the accuracy of the weapon as well as render the unit or themselves liable for the cost of any repairs or removal of rust or dirt that may be found necessary on the inspection of the arms. Arms will be cleaned immediately after use.

All arms must on first issue be thoroughly cleaned before being placed in the hands of the troops.

66. The following scale of material for cleaning, lubricating, and preserving small-arms will be issued free, once per annum :—

A.O. 111 1911

Composition, preserving arms	... pints	2
Flannelette, Mark III. ...	...yards	*250
Jute, dressed	... hanks	½
Oil, petroleum, Russian, lubricating,	pints	*10
Paraffin	... pint	½
Sheeting, old	... lbs.	8
Wire, brass	... ozs.	2

For each 100 stand of arms.

A.O. 111 1911

Should any further supplies be required they must be obtained from the Army Ordnance Department on repayment.

67. The following scale of materials for cleaning and lubricating each government bicycle on charge of cyclist battalions will be issued free, once per annum :—

A.O. 111 1911

Brushes (bicycle)		1
Linen, old	lbs.	1½
Oil, paraffin	quart	1
Oil, petroleum, Russian, lubricating ...	pints	1
Tallow, Russian, or home-melted English ...	lbs.	1

Lamp oil and wick will be obtained from the officer in charge of barracks.

68. Should a commanding officer doubt whether arms of any description under his charge are serviceable, he will report the matter, stating the reasons for his opinion, to the chief ordnance officer.

Testing weapons of any kind in charge of troops, except as provided in the Musketry Regulations, is strictly forbidden.

Ammunition obtained from the Army Ordnance Department will alone be used.

*These proportions may be increased in the case of the Scottish command, to :—

Oil, petroleum, Russian, lubricating	pints	15
Flannelette, Mk. III.	yards	350

Digitized by Google

69. When arms are removed from the arm-chests care must be taken not to damage the chest fittings. When the fittings appear to have been injured by unfair treatment, their value will be charged against the unit concerned.

70. In the event of a soldier of the Territorial Force desiring to have a new barrel fitted to his rifle at his own expense, he may apply, through his commanding officer, to the Chief Inspector of Small-Arms, Enfield Lock, who, if circumstances permit, will arrange to carry out the work. The cost of carriage both ways, in addition to the cost of the new barrel and the labour expended in fitting it, will be defrayed by the soldier.

VIEWING PRIVATE ARMS.

73. Any private arm of government pattern which it may be desired to use in shooting matches, or any new barrel that may be required for such arm to replace a worn-out barrel, may be inspected in the factory of the Chief Inspector of Small-Arms. Application will be made by the owner of the arm or barrel through his commanding officer to the Chief Inspector of Small-Arms, Royal Small-Arms Factory, Enfield Lock, who will cause the same to be viewed. The name of the maker from whom the rifle, carbine, or new barrel has been ordered will be stated in the application.

74. A charge of one shilling for each arm, and sixpence for each barrel viewed will be made against the owner, in addition to the cost of carriage to and from the Small-Arms Factory.

75. A certificate to the following effect will be returned with each arm viewed and passed:—

"This is to certify that the† barrel (and breech action) submitted by
has been viewed and found to be correct and in conformity with the government pattern so far as regards length, weight, bore, rifling, form of chamber (and fitting of breech action); that it takes the government ammunition and that it may be used in any match restricted to government military rifles or carbines of this pattern."

COMPONENTS AND TOOLS FOR REPAIRS AND CLEANING.

76. The proportions of components of arms detailed in Appendix VI will be issued on demand to enable serjeant-instructors to execute repairs, provided the conditions prescribed in paragraph 79 are complied with.

Indents will be rendered annually on the 1st March, on A.F. G 997, for articles required to replace those expended during the year.

† Here insert description of arms or barrels.

Digitized by Google

77. Should additional numbers of these components be required, they should be obtained through the County Association by demand upon the chief ordnance officer on repayment. Officers commanding units will be held responsible that government arms are only repaired with components supplied by the Army Ordnance Department.

78. The sale, exchange, or gift outside the units of any components obtained from store on payment is prohibited.

79. Tools in the proportions laid down in Appendix VI, Table 1, will be issued on demand, by the chief ordnance officer, as public equipment for each serjeant-instructor holding a certificate from the Chief Inspector of Small-Arms provided the commanding officer certifies that a properly fitted armourers shop exists locally for the separate use of such instructor.

A.O. 111 1911

80. A set of tools as detailed below will be issued for use at the headquarters of each cyclist battalion :—

Description.	No.
Section No. 7.	
Brushes, hair, flat { ½-inch	1
Brushes, hair, flat { 1-inch	1
Section No. 21b.	
Brushes	1
Clamps	1
Erectors	1
Gauges	1
Injectors	1
Punches	1
Spanners, box :—	
hexagon	1
square	1
Spanners—	
nipple	1
valve	1
Stands, wheel erecting	1
Straighteners	1
Not in Vocabulary.	
Hammers, copper, 10 ozs.	1

81. The arms will be sent every fourth year for examination and repair, and re-browning if necessary. In commands where a central armourers shop has been established the work will be carried out there, and the necessary arrangements will be made by the assistant director of ordnance stores of the command.

Digitized by Google

In other cases the work will be carried out in the Royal Small-Arms Factory, Enfield Lock, and the Chief Inspector of Small-Arms will issue the necessary instructions.

Arms sent to central armourers shops will not be taken on charge in the store accounts, but will be dealt with as stores received for repair (*see* paragraph 37). Vouchers must, however, be passed for all small-arms and components of small-arms sent to Royal Small-Arms Factory, Enfield Lock. A.O. 290 1909

82. Deficiencies of arms or parts of arms will be charged for. Repairs necessitated by fair wear will be executed free of charge; the expense of other repairs will be claimed from the County Association.

83. When the extent of repairs not chargeable against the public has been ascertained, a claim will be prepared in triplicate by the carbon process on A.F. G 838. The original will be sent to the secretary of the County Association and the duplicate and triplicate to the regimental paymaster, who, when payment has been secured, will return the duplicate to the ordnance officer, with a reference to the account where credit will be found.

84. Full instructions for the use of aiming tubes will be found in the Musketry Regulations. ·22 inch tubes will be used only in the aiming tube rifles supplied for the purpose; they are not to be used in service rifles. Aiming tubes and their appurtenances in excess of the free supply authorized by regulations may be issued on repayment. A.O. 111 1911

85. Arms will be marked before issue by the Army Ordnance Department, in accordance with the Regulations for Army Ordnance Services, Part I. No further marking will be necessary. The full designation of the unit, and the consecutive numbers to be marked on the arms, will be stated on all indents for arms. Arms issued to replace others will receive the consecutive numbers of those replaced.

SECTION III.—ACCOUTREMENTS.

88. A sling for each rifle and carbine issued under Table 1 will be supplied as public equipment.

89. Accoutrements for serjeant-instructors, including acting serjeant-majors, will be provided as public equipment in the proportions detailed in Table 2 (viii.).

90. The maintenance of all accoutrements—other than those referred to in paragraphs 88 and 89 must be effected by County Associations from the money grant allotted to them for that purpose.

91. The articles to be provided for the various arms of the Territorial Force are detailed in Table 2.

92. On mobilization a complete set of accoutrements as detailed for R.A.M.C. in Table 2, will be provided for the men enlisted into the general hospitals of the Territorial Force to complete these units to war establishments. A.O. 315 1910

Digitized by Google

93. Instructions for the care and preservation of brown leather accoutrements, which may be of assistance to units in possession of such accoutrements, will be found in Appendix VII.

A.O. 111 1911 — The materials therein referred to can be obtained from the Army Ordnance Department on repayment.

SECTION IV.—HARNESS, SADDLERY, AND PACKSADDLERY.

95. Harness, saddlery, and packsaddlery will not be supplied nor held as public equipment.

Initial issues will, however, be made free under the following circumstances:—

(1) HARNESS of government patterns:—
  (*a*) On first formation of unit.
  (*b*) For any increase to the approved establishment that may be authorized.

(2) PACKSADDLERY as for government pattern harness.

(3) SADDLERY (officers and men):—
  (*a*) On first formation of unit.
  (*b*) For any increase of strength within the approved establishment, over and above the numbers for which saddlery has already been issued free.
  (*c*) For any increase to the approved establishment that may be authorized.

96. Government pattern harness is the harness required for use with those technical vehicles with which it is not practicable to employ harness obtainable from civil sources.

97. All harness for technical vehicles, and all packsaddlery or saddlery purchased by County Associations during peace, must be

A.O. 111 1911 — obtained exclusively from the Army Ordnance Department on repayment. The composition of the sets of such harness, packsaddlery, and saddlery, will be found detailed in Section IX and in Appendix V.

The proportions with which units must be equipped are given in Table 13.

Harness and saddlery will, if desired, be marked with corps marks by the Army Ordnance Department prior to issue. The request that the marking should be performed, and full particulars of the corps marks must accompany the indent.

98. Arrangements for the purchase or hire of harness for use with non-technical military vehicles must be made by County Associations.

99. Instructions for the care and preservation of harness and saddlery will be found in Appendix VII.

A.O. 111 1911 — The materials therein referred to can be obtained from the Army Ordnance Department on repayment.

Digitized by Google

SECTION V.—MISCELLANEOUS.

101. Articles for musketry instruction will be supplied as public equipment in the proportions detailed in the following tables:—

9 Yorks. West Riding. 89

TABLE 1.

Description.	Proportions:— Yeomanry. Per squadron.	Yeomanry. Per regiment.	Engineers, field company.	Infantry. Per company.	Infantry. Per battalion.

Chargers, ·303-inch cartridges ...	1 per short rifle, and 1 per charger loading (long) rifle.

† For allowance for machine guns, see Table 16.

Additional supplies of the articles detailed in Tables 1 and 2 may be obtained from the Army Ordnance Department on repayment.

Flags, musketry instruction, and boards, black, complete, may also be obtained from the Army Ordnance Department on repayment.

9 Infantry 2480

Digitized by Google

102. The following articles will be supplied to units, under arrangements to be made by the County Associations, from sources other than government store:—

Brushes, large (1-lb. brushes) for colouring targets.
„ small (sash tool) „ „
Chalk.
Files (to retain documents).
Glue to make size.
Lamp-black.
Sponges.
Targets.
Whiting.

The targets provided will be of such dimensions that the instructions contained in the Musketry Regulations can be complied with.

103. The undermentioned stamps will be supplied for each Territorial Force unit for the purpose of marking identity discs:—

Stamps, steel, for metal, $\frac{1}{8}$ inch { figures, 0—8 sets 1. letters, alphabet sets 1.

104. Irons, branding, as under will be supplied for marking horses purchased or impressed on mobilization:—

105. Details of the signalling stores with which units must be equipped are given in Table 14. Signalling equipment must be maintained by County Associations, supplies being obtained from the Army Ordnance Department on repayment.

A.O. 111
1911

Digitized by Google

106. An initial issue of 8 compasses, magnetic, pocket, will be made free, to each regiment of yeomanry for the purpose of training scouts. The responsibility for the maintenance and replacement of these compasses will devolve upon county associations. 9 Yeomanry 47

107. Mekometers of infantry, artillery (1 reel only—§ 14753 List of Changes in War Matériel), or general service pattern, according to stocks available, will be issued as public equipment in the following proportion :— 9 Genl. No. 2533

	Per Unit.
Regiments of yeomanry	4*
Battalions of infantry	4*

108. An initial issue of bugles, trumpets, and strings will be made free, to units in accordance with the scale laid down in Table 3. A.O 113 1910

The responsibility for the maintenance and replacement of these musical instruments will devolve upon County Associations.

Bugles, trumpets, and strings may be obtained on repayment from the Army Ordnance Department. Corps marks may be added by the Army Ordnance Department, provided full particulars are furnished on the indents for the instruments. A.O. 111 1911

109. A set of picketing gear for instructional purposes comprises the following articles :—

Bags, corn, 8 lb.	10
Mallets, heel-peg	1
Pads, surcingle	10
Pegs, picketing, with rope loop	24
Ropes, head, hemp, with ring	10
Ropes, heel	12
Ropes, picketing, 4 ft. 9 in.	10

The number of sets issuable as public equipment to the various units will be found detailed in Table 4.

110. Each unit of the Territorial Force will be equipped for the purposes of peace instruction and training with ambulance stretchers and knee caps in the proportions detailed in Table 5. The maintenance of these articles must be effected by County Associations, supplies being obtained from the Army Ordnance Department on repayment. A.O. 111 1911

111. Unserviceable circular tents for instructional purposes may, if required, be issued as public equipment in the following proportions :—

To each regiment of yeomanry and battalion of infantry	4
To each other unit, R.A.M.C. excepted	1

112. An initial issue of six pick-axes and six shovels will be made free, for each company of infantry, other than those forming part of cyclist battalions. The responsibility for the maintenance and replacement of these tools will devolve upon County Associations.

113. Pioneer equipment for annual training of pioneers of cyclist battalions, will be supplied as public equipment on the scale laid down in Table 15. 9 Genl. No. 1306

* Will be issued as they become available.

Digitized by Google

114. The following scale of lubricating and preserving material may be issued free, annually, to Army Service Corps and Royal Army Medical Corps units for use with vehicles supplied as public equipment:—

Grease, lubricating, for cool climates	2 lbs. per wheel upon a certificate from the commanding officer that the vehicles are in constant use. ½ lb. per wheel when not in constant use.
Dubbing ...	... 1 lb. per 100 leather straps.

Lubricating and preserving material will not be issuable free in respect of hired vehicles.

A.O. 113 1910

115. Service pattern vehicles, machine guns and their carriages or mountings will be painted once every two years.

Paint, paint brushes and putty will be issued free, in the proportions laid down in Tables 21 and 22, and in Sections IX and X. No other paint is to be used.

The provision of labour for cleaning, priming, stopping, painting and re-marking will be arranged for by County Associations. To cover this service the allowances laid down in Table 21 and in Sections IX and X will be issued biennially to Associations. Claims must be transmitted to the local auditor through the chief ordnance officer and will be supported by a certificate signed by the officer commanding the unit, and countersigned by the secretary of the County Association to the effect that the work has been satisfactorily executed with the paint supplied.

A.O. 211 1910

In order that special payments of the small sums involved may be avoided, claims will be reserved for settlement with those made by Associations on the 1st November.

9 Eng. 641

116. Instructions for marking vehicles are given in Appendix XI. First issues of vehicles from store will have corps marks added by the Army Ordnance Department before issue, units giving the necessary marking particulars on their indents.

9 Western 21

117. Stores to admit of the local instruction of officers in reconnaissance and topography will be issued as public equipment in the proportions detailed in Appendix XII. Divisional and mounted brigade commanders will detail a unit to hold each set of stores on equipment ledger charge and to issue them from time to time as they may direct.

54 Officers 478

The drawing instruments and other articles as detailed in Appendix XIII will be supplied as public equipment for the headquarters office of each division. They should be accounted for in the equipment ledger of the unit responsible for the equipment of the Army Service Corps clerk attached to assist the general staff officer.

Stationery required for use with these stores will be supplied upon the receipt of indents on A.F. L 1381 from the commanding officers of units responsible for them. These commanding officers will also be responsible that the stationery office supplies are issued only for the purpose for which their supply has been authorized and that demands for stationery state clearly the service for which it is required.

Digitized by Google

SECTION VI.—MACHINE GUNS.

120. Machine guns will be issued to yeomanry and infantry in the proportion of two per regiment or battalion, and will be accounted for in the regimental equipment ledgers. For details of this equipment, *see* Tables 16 to 20.

Each gun will be provided with four barrels, viz.:— A.O. 211 1910

(*a*) Two new barrels distinguished by a band of white paint round the centre, to be kept in store and taken into use on mobilization, one in the gun and one as spare.

(*b*) One serviceable barrel for use in peace, for ball firing only. To be returned to store on mobilization.

(*c*) One D.P. barrel for use in peace for drill purposes, or for firing blank only. To be returned to store on mobilization.

121. Three handbooks for the ·303-inch Maxim machine gun will be supplied free to each regiment of yeomanry and to each battalion of infantry.

122. The commanding officer is responsible that machine guns on his charge are at all times in perfect order and in readiness for immediate service.

As a very little neglect may cause serious consequences, his arrangements will be most definite that these guns are always cleaned and examined after every occasion on which they are used.

123. In addition, the Chief Inspector of Small-Arms, Enfield Lock, will arrange for a biennial examination to be made by a viewer. A.O. 315 1910

124. When officers commanding find that the shooting of a gun falls off, and that the barrel appears worn, a diagram of 10 shots will be taken at 500 yards (three shots being first fired as trial shots, in order to give the barrel a chance of "settling down," and due care being taken that the gun is secure on the mounting). A.O. 211 1910

If the figure of merit exceeds 1·50 feet for 500 yards, they will at once indent for another peace barrel, and on receipt, will forward the doubtful barrel to the Chief Inspector of Small-Arms, in the manner directed in paragraph 125, for final sentence.

If a qualified non-commissioned officer is not available to replace the barrel, they will apply to the chief ordnance officer for the services of an armourer or armament artificer.

125. When machine guns, mountings, or equipment require more extensive repair than can be carried out locally, the chief ordnance officer of the area will arrange for their despatch to Woolwich or Enfield Lock as directed in Regulations for Army Ordnance Services, Part I. 77 6 4325

Digitized by Google

126. A memorandum of examination, or history sheet, will accompany each machine gun, when issued for service. It will be carefully preserved, and will be handed over with the gun to which it relates, whenever the latter is transferred from the charge of one officer to that of another. An immediate record will be made thereon of any accident which may occur to the gun, and the result of each official examination which it may undergo. On every occasion on which the gun is fired the number of rounds, showing whether blank or ball, will be inserted.

127. Spare parts and tools are issued (in a box) with each machine gun. The spare articles should not be taken into use until those issued with the gun are actually unserviceable, when the latter should be returned to store, and demands at once put forward for their replacement.

128. Materials for cleaning and oiling machine guns and their carriages will be supplied free in the following proportions:—

		For each machine gun and carriage or mounting, per annum. Peace only.
A.O. 113 1910	Dubbing ... ... lbs.	½
	Flannelette, Mk. III. ... ... yds.	11
	Linen, or cotton, old ... ... lbs.	3
	Oil, { mineral, burning ... ... pts.	½
	{ petroleum, Russian, lubricating ... ,,	8
A.O. 113 1910	Soap, yellow ... ... bars	4
	Turpentine, spirits of ... ... pts.	1

The following will be allowed to each store in which machine guns are kept or dealt with, and will be replaced when necessary:—

Flannel (old blanket is very effective)	1 square yard.
Wick, common*	8 ozs.
Twisted copper wire	1 rod, 42 inches long, of wire, 0·1-inch diameter in a double twist.

129. One "screen, manœuvre" will be supplied on demand to each regiment of yeomanry. This screen will be accounted for in the equipment ledger of the unit.

* Army Service Corps supply.

Digitized by Google

SECTION VII.—CAMP EQUIPMENT.

130. Camp equipment will be issued free for all camps which have been approved by the general officer commanding-in-chief.

The cost of transport both ways will be debited against the special money grant for training the Territorial Force. Carrier's notes will be endorsed "Training Grant, Territorial Force, ——— Command."

131. The proportions of all articles of camp equipment and intrenching tools to be demanded, except for manœuvres, are laid down in Table 6. Indents for camp equipment will be prepared on A.F. G 968, and sent to the chief ordnance officer by commanding officers as early as practicable, and not less than 14 days before the formation of the camp, in order to give time for checking and supply. Commanding officers will estimate as exactly as possible the number of men who are likely to take part in the encampment, and if any tents are found to be surplus to the approved accommodation after the camp has been formed, they should be struck and returned to store, together with any other articles of camp equipment found to be in excess of approved proportions for the number of men actually encamped.

132. For manœuvres, camp equipment will be issued in accordance with the scales laid down in Tables 8, 9, 10, and 11, provided in the case of stores issued under Table 11, the provisions of paragraph 148 are fulfilled.

133. Issues of camp equipment in excess of the authorized proportions will only be made when circumstances exist which, in the opinion of the general officer commanding-in-chief, are so exceptional in character as to render additions to the normal scales essential. In such cases the general officer commanding-in-chief will give written authority to the responsible ordnance officer to provide such additions as may be necessary.

134. Commanding officers, in demanding camp equipment, will, with a view to economy in transport, and to obviate charges for losses and damage to articles not used by them, exercise their discretion as to whether all articles allowed should be demanded: *e.g.*, camp kettles will not be required when private cooking apparatus is used; the full proportion of intrenching tools will not be required when the soil renders it unnecessary to intrench the tents; picketing gear will not be required when stabling is hired for horses.

135. Wood bottoms for circular tents for officers and men, or for marquees used for hospital purposes, may be issued, when, owing to the dampness of the ground or to other causes, their use is certified by the principal medical officer to be necessary. Tent bottoms will not be supplied for store, office or workshop tents.

Digitized by Google

136. At the time of making the first issue of camp equipment, A.F. G 973 will be given to the officer drawing the stores by the ordnance officer, and on this form the officer commanding will record all articles of camp equipment, received and returned by the unit.

137. At the close of the encampment, when the stores have been returned, the camp equipment account will be balanced and forwarded, with all supporting vouchers, to the chief ordnance officer of the area in which the issues were made, irrespective of the locality of the ordnance depôt to which the stores may have been returned. This officer will have the account examined and compared with the accounts of the ordnance officers by whom the issues were made. Should any questions arise, they will be decided by the chief ordnance officer after communication with the commanding officer.

138. At encampments where local conditions or circumstances render it impossible, or, in the opinion of the general officer commanding undesirable to dig trenches for latrine purposes, and the dry earth closet system has to be specially resorted to, latrine buckets may be issued in the following proportions to the contractor engaged to remove the soil:—

For officers ...	...	20 per cent. of number of officers encamped.
For other ranks	...	10 per cent. of number of other ranks encamped.

These numbers are regarded as sufficient to meet requirements for both dry earth closets and urinals.

The conditions to be fulfilled by the contractors with regard to collection, disinfection, cleaning, repairing and re-delivering these buckets will be found detailed in the "special conditions of contract" embodied in a tender form approved by the Army Council, and issued to general officers commanding to govern local contracts in connection with the dry earth closet system in encampments.

139. Horse shoes and nails may be drawn from the Army Ordnance Department in the proportion not exceeding 10 sets for every 100 horses present at the annual training in camp; they will be entered in the camp equipment account (A. F. G 973).

An expenditure not exceeding 5 sets for every 100 horses encamped will be allowed free upon a certificate from the commanding officer of the unit that the shoes and nails have been necessarily utilized, during the period of the camp, in shoeing horses hired for and employed upon military duties. This certificate must accompany the camp equipment account as one of the supporting vouchers referred to in paragraph 137.

The unexpended balance will be returned to the Army Ordnance Department at the termination of the camp. The value of any shoes and nails expended in excess of the 5 per cent. mentioned above will be claimed from County Associations concerned.

Digitized by Google

140. Wooden tent pins not exceeding 5 per cent. of the number issued may be written off as expended by fair wear, if such expenditure has actually taken place.

141. All deficiencies other than those mentioned in the preceding paragraph must be paid for unless the authority of the general officer commanding-in-chief is obtained to write them off as a charge against public funds.

No charge will be made for damages due to fair wear and tear, but the value of such damages as are obviously wilful or due to culpable negligence will be recovered from the unit concerned. Claims for such damages will be prepared in the manner directed in the Regulations for Army Ordnance Services, Part I, and submitted to the secretary of the County Association for settlement.

142. Shortly before the termination of the camp the commanding officer will arrange for an inspection of the whole of the camp equipment in his charge and the investigation (if necessary by a regimental board) of all cases in which articles are found to be damaged or deficient.

When it is possible to trace to individuals the responsibility for the damages or deficiencies the commanding officer will estimate the cost of repair or replacement and take steps to recover the amount from the individual or individuals responsible. (See also paragraph 17.)

143. Tents should not be struck before 10 A.M., otherwise serious damage may be caused to them by dew. Articles of camp equipment which have become wet while in use will be thoroughly dried and cleaned, as far as possible, by the troops, before being returned into store. When a camp is broken up in wet weather, and the ordnance officer, or, in his absence, the commanding officer, is of opinion that the tents should not be struck nor other articles of equipment be taken over in a wet state, a detachment will be left behind until the articles are in a proper condition to be returned into store. This detachment will consist of permanent staff only; or of such men as may be willing to remain, if a larger detachment be thought desirable.

144. The following instructions will be observed when handing over stores on the closing of a camp:—

(a) When Stores are handed into an Ordnance Depôt at the Camp.

(1) Each unit will be allotted a space at the ordnance depôt on the camping ground, in which its stores will be laid out for handing over to the Army Ordnance Department.

(2) Paillasse and bolster cases (after being emptied of straw), blankets, and waterproof sheets, will be laid out flat, in piles of any height; they will be checked off and tied in bundles when being taken over by the ordnance officer.

(3) Camp kettles will be packed in the cradles in which they were issued.

Digitized by Google

(4) Tents will be left in the valises and stacked in piles, except as stated in (8).
(5) Pin bags will be emptied and laid out flat in heaps of 20 or less, as may be convenient.
(6) Marquees will not be securely tied up, as they will have to be examined to check over the various parts, &c.
(7) Axes, mallets, tent poles, spades, and other small stores will be collected and placed so that they can be readily counted.
(8) In wet weather arrangements will be made for handing over, at the depôt, blankets, paillasses, bolsters, waterproof sheets, pin bags, and all other damageable stores, in a store tent, which will be told off to each unit on the morning of the day of the termination of the camp, but all tents will be left standing.

(b) When Stores are not handed over at an Ordnance Depôt at the Camp.

(1) As far as possible stores will be returned in the same cases or vats as those in which they were received; each package will be labelled and clearly addressed to the ordnance officer. Bundles will be securely tied, in at least two places, with spun yarn.
(2) Blankets will be rolled lengthwise in bundles of 20, and fastened near each end with spun yarn; horse rugs, paillasse cases, &c., and waterproof sheets (unless packed in cases or vats) in similar bundles of 10. Buckets, tubs, and pails will be nested five together and fastened with yarn; camp kettles will be packed in cradles (five each). Bolster cases will be packed (200) in a paillasse case. Tents will be in valises, pins and mallets in pin bags, poles tied in sets; the loose parts of Soyer's stoves and vehicles will be firmly secured with spun yarn.

(c) When a camp is handed over standing from one unit to another.

The chief ordnance officer will detail a representative of the Army Ordnance Department to witness the transfer, and to assess, as a charge against the outgoing unit, the cost of any damage done to the camp equipment not due to fair wear and tear.

FIELD HOSPITAL EQUIPMENT.

145. When regiments are encamped for training at places where no hospital building is available, field hospital equipment, as specified in Table 12, will be demanded on A.F. G 968.

This equipment will be accounted for in the camp equipment account, A.F. G 973, in the manner laid down in paragraphs 136 and 137.

Digitized by Google

MEDICAL AND SURGICAL EQUIPMENT.

146. Medical and surgical equipment as laid down in Table 12 will be supplied to each camp at the commencement of training, at stations where no military hospital is available. A.O. 20 1910

Deficiences and damages will be dealt with as directed in paragraph 206.

147. Medical officers will see that the equipment issued under paragraph 146 is properly packed and duly returned to store at the termination of training. When the equipment is returned to store, each article will be accompanied by an invoice or duplicate list of contents, in which damages, deficiencies, and expenditure will be carefully recorded. This document will be signed and dated by the medical officer in charge of the equipment, and placed inside the article as a voucher.

FIELD BAKERY EQUIPMENT.

148. When bread for consumption by the troops is actually baked in camp by Army Service Corps units of the Territorial Force, field bakery equipment may be issued in the proportions detailed in Table 11.

VETERINARY EQUIPMENT.

149. The following veterinary stores will be supplied to mounted units at the commencement of training, and will be returned on its conclusion. Applications will be sent to the Director-General, Army Veterinary Service, War Office, London, S.W.

One veterinary officer's wallet to each veterinary officer.
One Territorial Force unit chest to each unit.
One farrier's wallet to each unit.

The stores will be demanded from and returned to the Officer in Charge, Army Veterinary Stores, Woolwich Common.

150. In case of very urgent extra requirements during the period of training, telegraphic indent should be submitted to "Nudation, London."

SECTION VIII.—SMALL-ARM AMMUNITION.

153. Service small-arm ammunition will be held during peace for non-commissioned officers and men on the authorized establishment of units in the following proportions. It will not be held for supernumeraries other than those enrolled for service in the Special Reserve. A.O. 20 1910

Digitized by Google

Unit.	Cartridges, small arm, ball, ·303-in. cordite.	
Yeomanry	100	Per N.C.O. and man.
Artillery (all units)	20	
Engineers (all units)	50	
Infantry —		
Staff serjeants	25	
Drummers, buglers and pioneers	20	
Other ranks	100	
Army Service Corps	20	Per N.C.O. and man armed with a rifle.

154. Service ammunition will also be held for machine guns in the following proportions:—

Regiments of yeomanry and cyclist battalions of infantry	3,500	Rounds per machine gun.
Battalions of infantry other than cyclist battalions	4,000	

155. Care will be taken that the authorized proportions of service ammunition are, at all times, maintained in a condition of completeness.

On mobilization additional ammunition will be drawn as directed in paragraph 217.

156. The following quantities of small-arm ammunition are allowed annually for practice and exercise:—

A.O. 211 1910

—		Cartridges, small-arm. Ball, ·303-inch.	Blank, ·303-inch. Mark V.	Aiming tube.
(*a*) For each of the following ranks:—				
Officers, non-commissioned officers and men of the Territorial Force, and members of the permanent staff (other than adjutants) in the —	Yeomanry	90	25	25
	Artillery—coast defence companies ...	20	...	...
	Engineers— field companies ...	90	10	25
	other than field companies ...	20	...	...
	Infantry	90	60	25
	Army Service Corps...	20	...	...
(*b*) For each carbine in the approved equipment of artillery units		20	...	...

Digitized by Google

157. The following quantities of small-arm ammunition may be drawn annually for each Territorial Reservist (officer, non-commissioned officer, or man) attached to a unit in which musketry training is compulsory for men serving in the Territorial Force :— A.O. 211 1910

—	Cartridges, small-arm, ball, ·303-inch.
Yeomanry	20
Engineers (field companies)	20
Infantry...	20
Other units	10

The officer commanding the unit will certify that the number of rounds drawn has actually been expended at range practice during the year by the reservist for whom they were drawn.

158. In addition to the above, practice ammunition for use with machine guns will be allowed annually, as follows :—

Unit.	Rounds.	
	Ball.	Blank.
For a regiment of yeomanry or battalion of infantry	2,800	1,000

159. To avoid delay in beginning the annual course of musketry instruction, small-arm ammunition may be issued by the Army Ordnance Department in the proportions laid down by paragraphs 156 and 158. The amount of ammunition which the unit is entitled to expend during any year (1st November to 31st October) will be determined as follows :—

(i.) *In the case of units detailed at (a) of the table in paragraph* 156.

By the number of officers, non-commissioned officers and men qualified during that year. The expense vouchers by which the ammunition is written off charge should contain a statement, signed by the commanding officer, of the number of officers, non-commissioned officers and men that have qualified during the year, and a certificate that the quantity of ammunition written off charge agrees with that recorded as "expended" in the statement which accompanied the musketry return (paragraph 160). A.O. 211 1910

(ii.) *In the case of units detailed at (b) of the table in paragraph* 156.

By the number of rounds, within the approved annual allowance, that have actually been fired. Expense vouchers must contain a certificate, signed by the commanding officer, that the number of rounds written off as expended agrees with the statement of ammunition expenditure rendered to the general officer commanding-in-chief under paragraph 160.

Any ammunition drawn in excess must be paid for unless unexpended, in which case it should be returned to store or deducted from the demand for the ensuing year.

Digitized by Google

160. A statement must be rendered on the Annual Musketry Return showing how the whole of the ammunition has been disposed of. The figures shown in this statement must accord with those recorded in the diary of ammunition expended, A.B. 218. This book must be produced for audit when required. Units from which musketry returns are not rendered, will transmit to the general officer commanding-in-chief a statement detailing the manner in which the ammunition drawn by them under paragraphs 156 and 158 has been expended. The general officer commanding-in-chief will then forward the statement with his remarks to the Commandant, School of Musketry.

161. Subject to any special orders which may from time to time be issued from the War Office, the small-arm ammunition to be expended at practice and exercise will be taken from that already in possession of troops as service ammunition, and that received from Army Ordnance Department for practice in the following order:—

(i) The contents of broken boxes, viz., boxes, the tin linings of which have been opened.

(ii) Ammunition re-bundled or re-packed at stations other than Woolwich.

(iii) Ammunition examined and re-bundled at Woolwich, the original date of which is not known. Boxes containing this ammunition bear the words "EXAMINED (year)" on the labels. This ammunition will be used up in the order of the date of examination.

(iv) Ammunition examined and re-bundled at Woolwich, the original date of which is known. Boxes containing this ammunition bear the original date of the ammunition, with the addition of a white label (placed diagonally across the old label) on which are the words "EXAM^{d} (year) SERV^{ble}." This ammunition will be used up in the order of the date of manufacture.

(v) Re-made ammunition.

(vi) Ammunition not specified above; the oldest date of manufacture being used first.

Specimens of the labels used in the cases referred to in sub-paragraphs (iii), (iv), (v), and (vi) above, will be found in Appendix IX.

Aiming tube ammunition and blank ·303-inch ammunition will be expended at practice in order of the priority of date of manufacture.

The linings of boxes are not to be disturbed until the ammunition is actually required for use.

162. Pistol ball ammunition, at the rate of 12 rounds per pistol annually, may be drawn for all ranks who are armed with that weapon in time of war.

Digitized by Google

163. Pistol ammunition may be drawn annually in the following proportions for adjutants of the Territorial Force :—

	Ball.	Blank.	
Yeomanry	75	20	A.O. 211 1910
Artillery	75	10*	
Engineers	50	10*	
Infantry	50	—	A.O. 113 1910
R.A.M.C.	50	—	

* Mounted units only.

164. Small-arm ammunition of the following descriptions :—

·303-inch ball ;
·303-inch blank ;
·22-inch, or ·23-inch aiming tube ;

issuable gratuitously for practice and exercise may be commuted, within those descriptions, provided the following conditions are fulfilled :—

(*a*) Sufficient ball ammunition to allow of the standard test prescribed in Musketry Regulations, Part I, being fired, must be reserved for the purpose, except in the case of recruits who in their first year of service, may, in accordance with the Territorial Force Regulations, be permitted to fire the whole of their musketry course with miniature ammunition. A.O. 111 1911

Units which do not fire the standard test in their musketry course, and for which no open or 30 yards ranges are available, may commute the whole allowance of ball ammunition for aiming tube ammunition, provided that they are possessed of apparatus for firing miniature ammunition of which no free issue will be made.

(*b*) The commutations proposed, and the proportion of the authorized scale to be commuted, must be approved by the general officer commanding the division, the mounted brigade commander or the commander of coast defences as the case may require. A.O. 211 1910

(*c*) The money value of the ammunition to be drawn by commutation must not exceed the money value of the ammunition to be surrendered.

(*d*) The commutation must be effected prior to the completion of the supply of gratuitous ammunition for the year ; ammunition once issued cannot be again received into store for commutation.

165. Blank ·303-inch small-arm ammunition in addition to the proportions allowed under paras. 156 and 158 will, if required, be

Digitized by Google

issued gratuitously in the following proportions to units encamped with regular forces:—

Yeomanry—not exceeding 10 rounds per man per annum.
Other units—not exceeding 20 rounds per man per annum.

Any portion of this allowance unexpended at the close of the encampment will be returned to the nearest Army Ordnance Depôt.

A.O. 111 1911 / A.O. 211 1910

166. Commanding officers will be allowed to purchase on repayment at the reduced rate of £4 per 1,000 rounds, such quantities of ·303-inch ball ammunition as will not exceed in the aggregate 10 rounds per annum for each enlisted member. Chargers issued with ·303-inch ammunition will be charged for at vocabulary rates.

A.O. 111 1911 / A.O. 211 1910

167. Commanding officers are permitted to purchase on repayment from the Army Ordnance Department such quantity of small-arm ammunition, in addition to that fixed by paragraph 166, as may be required for regimental purposes. Ammunition and chargers will be charged for at vocabulary rates.

168. Indents for the gratuitous supply of small-arm ammunition will be made out on A.F. G 812, for the whole amount required by the units during the current year (reckoned as in paragraphs 156 and 158), and must be rendered not later than the 1st December to the chief ordnance officer.

169. All small-arm ammunition not drawn by the 31st October will be forfeited, and any remaining unexpended will be reckoned as part of the supply for the ensuing year, and will be shown in the indent for that year as "in hand."

170. Ammunition gratuitously supplied will be forwarded, free of cost, to the headquarters of the unit or to the authorized drill stations of outlying detachments.

The carriage of ammunition, and of empty packages and fired cartridge cases, between the units' storehouses and the ranges will not be defrayed from army funds.

171. Commanding officers will not draw at one time a greater quantity of practice ammunition than can be kept in safety until required for use, but, whenever local conditions for safe storage permit, they will draw in one consignment the whole allowance of ammunition for the year.

172. Should the paucity of magazine accommodation render part issues compulsory, a memorandum giving particulars of the detailed consignments must accompany the indent. Every care must be taken to ensure that the annual allowance is not unnecessarily sub-divided into part consignments. If any disregard of this instruction is observed, the excess cost incurred in transport will not be allowed as a charge against army funds.

173. A charge will be admitted against the public for any necessary transport of ammunition of oldest date, which in the course of the turnover, referred to in paragraph 161, has to be transferred to the authorized drill stations of outlying detachments from the place of storage of the service ammunition.

Digitized by Google

The carriage of ammunition supplied on payment will not be defrayed from army funds (*see* paragraph 14).

174. Ordnance officers are instructed to issue ammunition of the earliest manufacture in their magazines for the free supply, and for issues on repayment at reduced rates. For purchases at full vocabulary rates, ammunition of late date will be supplied.

175. Officers commanding units will be held strictly responsible for the safe keeping and proper issue and use of all government ammunition, whether issued gratuitously or supplied on repayment for their use.

176. Ammunition supplied gratuitously from government store may not be sold to any member of the unit or association, nor may it be used for any purpose other than the authorized practice for which it has been issued.

The sale, exchange, or gift of government ammunition outside the unit or association to which it has been supplied is also prohibited.

It is to be understood that any transaction of such a nature (except under orders from the War Office) is illegal and will render the parties concerned liable to proceedings at law.

177. The use in service arms of any ammunition (whether ball, blank or dummy), other than that obtained from the Army Ordnance Department, is forbidden.

178. When troops, at the termination of a field day, are to return by railway to their headquarters, their arms will be examined, and all the ammunition which has not been expended will be collected from the men and placed in a metal cylinder, or metal-lined case, for conveyance in safety to the headquarters of the unit to which it belongs. Commanding officers will be held responsible that this regulation is strictly carried out. Cases and cylinders will be issued on repayment, on indent for the same being made to the chief ordnance officer.

179. An outward inspection of all ammunition will be made each year before making out the annual indents under paragraph 168, and the result will be reported to the brigade commander.

180. Should any defect be discovered in ammunition supplied by the Army Ordnance Department full particulars should be furnished to the chief ordnance officer of the area.

RETURN TO STORE.

183. When small-arm ammunition boxes, metal-lined cases, powder-barrels, metal cylinders, or other packages are to be returned to store, commanding officers will as far as possible return them to the ordnance depôt from which they were issued.

184. When returning small-arm ammunition into store, officers commanding will apply to the nearest transport officer for instructions as to its mode of conveyance, specifying the number of small-arm ammunition boxes or half and quarter barrels to be conveyed.

Digitized by Google

185. The printed address labels on the barrels, &c., will not be removed. If any are accidentally defaced or removed, the official designation of the unit will be marked on each package.

186. When ammunition barrels and cases, whether full or empty, are to be returned to the government stores, they will be carefully examined to see that they are free from tacks, dirt and grit. Instructions will be given to the persons by whom such barrels are to be conveyed to keep them free from dirt and grit, during their transit. Address cards will be fixed to the barrels by means of paste or string, and not by tacks or nails.

187. Ball and blank ammunition must not be packed together in the same package.

188. The fired cases of small-arm ball and blank cartridges supplied gratuitously will be brought on equipment ledger charge by certificate receipt voucher by weight in the proportions shown below, and returned each year to the army ordnance depôts from which they were issued. The cost of carriage will be borne by army funds (see paragraph 30).

Nature of ammunition.	Weight to be brought to account per 1,000 rounds expended.
	lbs.
75 / 3 / 2049 ·303-inch ball	24
·303-inch blank	12
Pistol, Webley, ball and blank ...	9

189. The rates to be charged for any deficiencies in the above proportions for ammunition supplied gratuitously, and amounts to be refunded to units returning fired cases of ammunition supplied on payment, will be governed by the rates included in the "Statement of prices obtainable at the Royal Arsenal to guide disposal of produce, &c." (published half-yearly by the Deputy Director of Ordnance Stores, Royal Arsenal, Woolwich). These rates will be notified in command or district orders.

The number and date of the ordnance voucher on which the cartridges were received should be quoted on the pay list voucher of the officer charging the value of the empty cases.

A.O. 111 / 1911 **190.** When empty cases from ammunition supplied on repayment are returned to store, the cost of carriage will not be defrayed from army funds.

191. The cases will be returned to store in the empty ammunition packages, not oftener than once a quarter, and commanding officers will not return a less weight than that representing 1,000 cases except in the last quarter of the year, when the outstanding balance, whatever it may be, will be sent in. The cases must be in good condition when returned, care being taken that grit and dirt are removed beforehand, and that no live cartridges are included with them.

Digitized by Google

192. Each package will contain a packing note on A. F. G 904, showing the rank, name, and unit of :—

(*a*) The person by whom the cartridge cases were sorted and packed.

(*b*) Of the responsible individual by whom the supervision of the sorting and packing operations was carried out.

If live cartridges are found in any of the packages, the matter will be reported to the general officer commanding-in-chief, for such action as he may consider desirable.

193. The foregoing general instructions apply equally to the chargers issued with charger, packed, ·303-inch ball ammunition.

The chargers will be written off charge by numbers at the same time as the expended ammunition and brought on charge by weight by certificate receipt voucher with the fired cases. The weight to be brought to account in respect of each 1,000 chargers will be 25 lbs. 8 Equipt. 352

Vocabulary rates will be employed in calculating :—

(*a*) Charges for deficiencies.

(*b*) The sums to be refunded to units for chargers returned from issues of ammunition on repayment, provided the chargers are serviceable upon receipt from the troops by the Army Ordnance Department. No refund will be made in the case of unserviceable chargers. A.O. 111 1911

The cardboard boxes employed for ·303-inch charger, packed, ammunition should be returned to local Army Ordnance Department store with fired cartridge cases and chargers.

No allowance will be made for cardboard boxes returned to store from ammunition issued on repayment. A.O. 111 1911

194. An allowance at the rate of 10*s.* per 100 lb. of fired cartridge cases will be given to pay for the labour of collecting and sorting cases and chargers obtained from ammunition supplied gratuitously. The general officer commanding-in-chief may, in addition to disciplinary action, direct that this allowance be withheld or refunded to the public when live cartridges are discovered in packages purporting to contain fired cases only.

SECTION IX.—ARTILLERY EQUIPMENT.

197. Instructions relating to artillery equipment, together with details of the peace and war equipment of Artillery units, are issued separately.

Digitized by Google

SECTION X.—ENGINEER EQUIPMENT.

198. Instructions relating to engineer equipment, together with details of the peace and war equipment of Engineer units, are issued separately.

SECTION XI.—ARMY SERVICE CORPS EQUIPMENT.

199. The following articles will be supplied to each Army Service Corps company for the purposes of peace instruction and training :—

Wagons, ammunition and store, R.A. fitted for pole draught—2.

Details of the number of sets of harness, saddlery and pack-saddlery to be maintained for these units are contained in Table 13.

200. The tools detailed in Table 24 may be issued as public equipment to each Army Service Corps company to enable artificers to execute such minor repairs as become necessary whilst units are on the march or in camp.

A.O. 290 1909

201. 1 jack, lifting, G.S., will be supplied to each Army Service Corps company for use when washing or lubricating the wheels of vehicles on charge.

SECTION XII.—R.A.M.C. EQUIPMENT.

203. Stores for instruction and training may, if required, be issued in the proportions detailed in Table 25.

204. The value of all non-consumable articles found deficient at each annual inspection will be claimed from the County Association.

A.O. 20 1910

205. Scales of medical and surgical equipment for peace and war are laid down in Table 26. The peace equipment will always be in possession of the unit and will be available for instructional purposes. It will be accounted for by the medical officer in charge of the unit on A.F. I 1234, which will be rendered annually, in January, to the War Office, through the administrative medical officer of the division and the principal medical officer of the command.

A duplicate copy of A.F. I 1234 will be retained by the accounting officer, together with copies of all observations and correspondence regarding the account, and will be available for examination by the local auditor of the command.

Digitized by Google

206. Articles lost or rendered unserviceable other than by fair wear and tear will be dealt with on A.F. I 1230, in accordance with the King's Regulations. When the cost of such articles is not chargeable to the public, the value will be credited to the public on A.F. O 1680, a copy of which will be attached to the account as a voucher for writing the deficiencies off charge. The authority for writing any article off charge will be quoted in and will accompany the account. A.O. 20 1910

207. Administrative medical officers of divisions will arrange for the equipment to be inspected annually, in January, by a medical officer—if possible, not the accounting officer.

208. Articles required to complete the equipment will be demanded on A.F. I 1209 in duplicate, which will accompany A.F. I 1234 annually, or at such other times as may be found necessary. These demands will be carefully examined by the principal medical officer of the command, who will see that the only authorized articles are included. He will approve their issue from Loan equipment store. 8 T. F. 103

209. On mobilization the additional articles required to bring the equipment held by units up to the war scale as laid down in Table 26 will be supplied by the Army Medical Department.

SECTION XIII.—MOBILIZATION EQUIPMENT.

212 Mobilization equipment, as defined in the Regulations for Mobilization, will be provided for all field units (even if temporarily allotted to garrison duties) and, with the exception of 2nd line transport, for all mounted and cyclist units permanently allotted to garrison duties. It will not be provided for dismounted units permanently allotted to garrison duties.

213. The details of war equipments, as defined in the Regulations for Mobilization, of those units for which mobilization equipment will be provided are summarized in mobilization store tables which, for convenience, are issued separately. (Army Form G. 1099.)

The tables discriminate between the mobilization equipment which will be provided by the Army Ordnance Department on mobilization and that for which County Associations will be responsible.

214. Chief ordnance officers will, during peace, make arrangements to ensure the immediate issue on mobilization of the stores to be supplied by the Army Ordnance Department.

County Associations will, during peace, make arrangements that the stores which are to be provided by them shall be forthcoming on mobilization. These stores will be provided out of an allowance which will be granted on mobilization. (*See* Regulations for the Territorial Force.)

The mobilization store tables have been prepared on the principle that stores, which are to be provided by County Associations, should be of a nature easily procurable at short notice from local tradesmen and institutions.

Digitized by Google

The nomenclature of the Priced Vocabulary of Stores has been adopted in framing the tables, but it is not intended that stores to be purchased by County Associations should be of strictly government pattern, provided they are articles suitable for the purpose for which they would be required. In order to assist Associations and commanding officers in determining the object for which any article is included in the war equipment of a unit, samples of government pattern may be obtained on loan, as desired, from the Army Ordnance Department. As the whole object of the scheme is to save time by tapping as far as possible local resources on mobilization, County Associations are at liberty to delegate the power to purchase and collect the various items on mobilization to officers commanding units; for the same reason and to avoid overlapping of orders no arrangements should be entered into with manufacturers outside the county area nor with local tradesmen for the supply of articles which they do not ordinarily keep in stock.

215. The regiments of Irish Horse, except the two squadrons allotted to the expeditionary force, will be provided with mobilization equipment on the scale laid down for yeomanry, but the whole of the stores will be provided by the Army Ordnance Department. Transport, in complete turnout, will be impressed under Section 115 of the Army Act.

79
2608

216. The additional requirements of units allotted to garrison duties, which are not in possession of mobilization equipment, will be met by the issue of equipment by the Army Ordnance Department locally under the Defence Scheme. (*See* Regulations for Mobilization.)

A.O. 20
1910
8
Equipt.
340

217. Regimental reserve of ·303-inch small-arm ammunition will be drawn from the Army Ordnance Department in the command in which the peace headquarters of the unit is situated, on the following scale:—

	Rounds.	
A.O. 113 1910 — Yeomanry	100	Per N.C.O. and man.
	6000	Per machine gun.
Artillery (All units)	30	Per N.C.O. and man.
Infantry:—		
Staff-serjeants	Nil	
Drummers, buglers, and pioneers	40	
Other ranks	100	
Machine guns	6000	Per gun.

8
Equipt.
340

This ammunition will normally be taken by units in regimental charge to war stations. If, however, the war station is in the same command as the peace headquarters of the unit, the issue of ammunition may be arranged for as the general officer commanding-in-chief may direct.

Digitized by Google

218. A further reserve of ·303-inch small-arm ammunition on the following scale per arm for divisional and mounted brigade units forms part of the mobilization equipment of brigade and mounted brigade ammunition columns. This ammunition will be drawn from the Army Ordnance Department in the command in which the peace headquarters of the column is situated. A.O. 211 1910

Yeomanry	100	Rounds.
Infantry	100	
Machine guns—Yeomanry and infantry ...	10,000	

A.O. 113 1910

For army troops battalions (including cyclist battalions) and for squadrons of Irish Horse not allotted to the expeditionary force, this further reserve of ammunition will be held by the Army Ordnance Department in the command where the war station of the unit is situated. 79 2711

219. Pistol ammunition on the following scale will be drawn for officers from the Army Ordnance Department in the command in which the peace headquarters of the unit is situated. 79 2724

UNIT.	Number of rounds carried.		
	On the officer.	In regimental transport.	In brigade ammunition column.
Yeomanry	12	12	12
Artillery	12	12	...
Engineers:—			
Other than railway battalions and staff corps	12	12	12
Railway battalions and staff corps	12	...	...
Infantry	12	12	12
Army Service Corps	12	12	...
Royal Army Medical Corps ...	12	12	...
Army Veterinary Corps	12	...	...

220. The place of storage of reserve ammunition in peace and any detailed arrangements for its supply will be laid down in local mobilization orders, command schemes, and coast defence schemes respectively. All units will be kept informed during peace of these arrangements as far as they are concerned.

Digitized by Google

SECTION XIV.—COUNTY RIFLE ASSOCIATIONS.

N.B.—The following instructions are to be regarded as temporary only. The question of future administration of County Rifle Meetings, and their connection with the Territorial Force County Associations, is under consideration.

223. Small-arm ammunition is issued, free and carriage paid, for use at the annual meeting of a County Rifle Association, the formation of which has been sanctioned by the general officer commanding-in-chief, provided the competitions are to take place at a range approved by the War Office. The gratuitous supply is not
A.O. 211 1910 to exceed 5 rounds for each officer and man of the Territorial Force in the county, as shown in the annual returns rendered to the War Office on the 1st October. If, on receipt of indents by the Army Ordnance Department, the printed Annual Return of the Territorial Force for the 1st October preceding has not been received in the command, the figures given by indenting officers should be verified by reference to brigade commanders. The verified figures so obtained should govern the issues and should be entered on the vouchers by which the ammunition is written off charge in the accounts of the Army Ordnance Department.

224. Indents for small-arm ammunition for use at a meeting of a County Rifle Association will be made on A.F. G 811, and will be addressed to the general officer commanding-in-chief, who, should he approve of the competitions, will authorize the issue. Copies of this form may be obtained from the chief ordnance officer. Only such number of rounds as will probably be required for actual use at the meeting will be demanded.

225. If more than the regulated number of rounds are required
A.O. 111 1911 for use at a meeting, an additional supply will be made on repayment.

226. All ammunition remaining unexpended after a meeting of a County Rifle Association will be returned to the ordnance depôt from which it was drawn within 14 days after the close of the
A.O. 111 1911 meeting, together with a statement showing how the ammunition issued free and on repayment has been expended. The value of any repayment ammunition so returned will be refunded.

227. An allowance at the rate of 10*s.* per 100 lb. of fired cartridge cases will be given to pay for the labour of collecting and sorting cases and chargers obtained from ammunition supplied gratuitously.

228. In the case of ammunition supplied gratuitously the
A.O. 211 1910 ordnance officer making the issue will see that the proper proportion of empty cases and chargers is returned to store or their value credited to the public.

Digitized by Google

229. One Rifle Association only will be recognized in each county. When two or more counties are united in one association, separate associations for such counties cannot also be recognized. Units belonging to more than one County Rifle Association will not be included in more than one application for the gratuitous supply of ammunition.

230. The supply of camp equipment to County Rifle Associations will be limited to the marquees and office tents necessary for the business of the meeting, and for the number of enlisted men who actually go into camp and compete in the shooting matches of the Association. A certificate to this effect will be given by the president or secretary in support of the camp equipment demanded. The carriage of the camp equipment will be paid by the public.

(*Referred to in paragraph* 5.)

CERTIFICATE ON CHANGE OF COMMAND.

WE CERTIFY, in accordance with paragraph 5, Equipment Regulations, Part 3, that on the transfer of the equipment

of the*_____

on the†_____

the whole has been verified, and has been found to be properly appropriated, in good condition, and to agree in the quantities and numbers of the several articles actually in possession, with those shown in the equipment ledger of the unit.‡

_____

Accountant giving over charge.

_____

Accountant taking over charge.

_____

* Here insert the unit.

† Here insert the date.

‡ In cases where discrepancies are found to exist between the quantities actually in possession and the equipment ledger, the following words are to be added to the certificate, "*with the exception of the items shown in the accompanying list of discrepancies.*" Any explanation that can be given to account for such discrepancies should also be forwarded.

Digitized by Google

APPENDIX II.

(*Referred to in paragraphs* 35 *to* 39.)

INSTRUCTIONS FOR KEEPING EQUIPMENT LEDGERS.

1. The ledgers will contain a faithful record of all permanent equipment, the property of the Government, received or issued. They will be balanced up to 31st October in each year, and will be forwarded, before the 1st December, with the vouchers in support, through the County Association, to the local army audit office. The vouchers are to be laid flat in the equipment ledger.

2. Copies will be kept of all equipment ledgers sent for examination. Should any queries arise on the examination of the ledgers, copies of such queries and of the replies will be retained by the accountant, who will correct his copy of the ledger accordingly.

3. On a unit being disbanded the equipment ledger will be balanced and forwarded to the local army audit office.

4. When, upon a change of command, equipment is transferred from one accountant to another, the procedure laid down in paragraphs 4 to 6 of these regulations will be followed.

5. Any stores found to be surplus will at once be brought on charge in the ledger by certificate receipt voucher. The voucher will be signed by the officers who sign the certificate. All stores found to be deficient will be struck off charge, and dealt with as laid down in paragraphs 17 and 21 of these regulations.

A balance will then be struck, as directed in paragraph 12 of this appendix, which will show the total of each article of equipment for which the officer who takes over command is responsible.

6. Articles supplied in sets for which a single heading is provided in the printed equipment ledgers, will be so accounted for. Thus, chests with tools will be shown as "chests, tool, filled." A certificate will be given at the end of the ledger by the commanding officer to the effect that the sets and tool chests are complete, and that they contain the articles which should be comprised in them, as detailed in the regulations. When articles charged in detail are taken on in the equipment ledger as sets, reference will be given to the paragraph or table of the regulations which gives the detail. The articles drawn from the Army Ordnance Department to replace losses, &c., in these sets will be taken on charge in the ledger, and the corresponding articles paid for or returned to store will be written off under the same heading.

If the two transactions do not occur in the same period of account, explanatory cross references will be given on each of the vouchers concerned.

7. All transactions of receipt and issue that should be recorded in the ledgers will be posted as soon as possible after they occur, and will be supported by voucher.

Digitized by Google

8. Vouchers for stores issued are called issue vouchers, and are posted on the right hand or credit side. Vouchers for stores received are called receipt vouchers, and are entered on the left hand or debit side of the ledger.

9. Both receipt and issue vouchers will be filled in by the insertion of the total numbers only in the column of the voucher headed "total number or quantity," the columns S. R. D. and U. being left for use of the Army Ordnance Department.

10. The ledger folios at which entries are made should invariably be noted on the vouchers supporting the account in the column headed "ledger folio."

11. Receipt vouchers and issue vouchers will be kept distinct from each other, arranged consecutively according to date, and numbered on the face of the voucher in two distinct series from 1 upwards for the whole period of the account. The total number of each series will be stated on the inside cover of the ledger.

12. The ledger is balanced by adding up the receipts on the left hand side, and the issues on the right hand side of the ledger, by bringing the total issues over to the left hand side and writing them immediately under the total receipts; the quantities left become the ledger balance or "remain." The remain, when carried forward as the commencing line of the next account, is called the "state."

13. Officers will take care that the ledgers and vouchers are not ticked or altered with coloured pencil or coloured ink, that no correspondence is carried on upon them, and that no erasures are made. No entries should be made in black lead pencil either in the ledgers or on the vouchers. Any necessary corrections should be made in black ink or indelible pencil, and will be duly initialed, in the case of vouchers by the person who signs the vouchers, and in the case of ledgers by the responsible accounting officer; but the original entries should remain legible.

14. In forwarding the equipment account, the officer commanding the unit will certify that it has been carefully checked by an officer appointed by him for that purpose, who will sign it in evidence of such examination.

The commanding officer's certificate will state that the remain shown in the account has been verified and found to agree in quantities and numbers with the several articles actually in possession of the unit. In cases where discrepancies are found to exist between the quantities actually in possession and the equipment ledger, a statement of such discrepancies should accompany the account.

APPENDIX III.

(Referred to in paragraph 20.)

DURATION OF PUBLIC EQUIPMENT.

General Instructions.

Periods of duration have been assigned to the articles enumerated in the following table, with the object of informing County Associations, commanding officers and ordnance officers of the length of time public equipment should remain serviceable under ordinary circumstances if new when issued. Equipment issued in a part worn condition should normally last at least half the period prescribed for new articles. The periods of duration are not intended in any way to govern the times for exchanging the stores, which must continue to be used until actually unserviceable. Should it appear that articles are becoming unserviceable before they have been in use the prescribed periods, inquiry should be made into the cause thereof, since, in the absence of sufficient reason to explain the circumstance, the troops become liable to be charged in accordance with paragraphs 17 to 22 of these regulations.

On active service the periods of duration are liable to vary according to the conditions to which the articles may have to be subjected, but the prescribed periods will be kept in view, and adhered to as far as practicable.

APPENDIX IV.

(Referred to in paragraph 46.)

CONDITIONS GOVERNING THE SALE OF CARBINES AND RIFLES.

Carbines or rifles, of any service pattern, may be issued on prepayment, under the following conditions, to officers, non-commissioned officers and men of the Territorial Force.

A.O. 211 1910 Issues of arms on payment will not be made to members of the Territorial Force Reserve.

Conditions.

(1) Issues, which will be limited to one arm of each type per officer, non-commissioned officer or man, will be authorized on the distinct understanding that the arms are not required for the purposes of sale or trade.

(2) All carbines or rifles must be obtained from Weedon, and are not to be issued on prepayment from local stock. They will be demanded through the usual channels on quarterly indents, which should be submitted so as to reach Weedon on the 1st January, 1st April, 1st July, and 1st October.

A nominal roll showing the ranks, names, and units of the individuals for whom arms are demanded should accompany each indent.

(3) Prior to despatch from Weedon a special sale mark will be applied to all carbines or rifles issued for sale.

(4) Only carbines or rifles bearing the special sale mark will be issued on prepayment.

Local stocks of arms bearing the special sale mark will not be held in anticipation of prepayment demands.

(5) The vocabulary rate current at date of issue, plus 1*s.* per arm to cover the cost of special sale marking, will be charged, and recovered locally by the district paymaster.

(6) All carbines or rifles sold under the foregoing conditions will become the personal property of the purchaser, and will not be accounted for in the equipment ledgers of units.

(7) Spare parts and components may also be supplied on prepayment for the repair of service arms issued under the foregoing instructions. Barrels with bodies must be obtained from Weedon in the manner prescribed for complete arms. They will be marked with the special sale mark, for which a charge of 1*s.*, in addition to vocabulary rate, will be made. Credit for replaced parts, if returned to store, cannot be allowed.

APPENDIX VII.

(*Referred to in paragraphs* 93 *and* 99.)

THE FOLLOWING INSTRUCTIONS FOR THE CARE AND PRESERVATION OF BROWN LEATHER ACCOUTREMENTS AND THE LEATHER OF HARNESS AND SADDLERY ARE FOR GENERAL GUIDANCE.

(I.) ACCOUTREMENTS.

When brown leather accoutrements require to be cleansed from dust and dirt, they should be washed with yellow bar soap and water, and dried in the shade.

To preserve and polish brown leather accoutrements, a dubbing composed of—

10 ozs. of clean mutton tallow,
6 ozs. of pure beeswax,
3 drams of camphor,

melted and mixed over a slow fire, should be used. These ingredients will make one pound of the composition, which should be rubbed on to the grain, or smooth side of the accoutrements, with a piece of coarse cloth, using as much friction as possible to enable the fatty substance to penetrate. A portion of the wax will then remain on the surface, and dry rubbing will always bring on a polish. An application of this composition once a month will, in ordinary circumstances, be found sufficient, and an allowance of 2 ozs. per man per month will be found ample; but whenever it is necessary to clean the accoutrements with soap and water, an application of the composition should always be made before the leather is quite dry. When accoutrements get stained with mildew or perspiration, or otherwise, a slight application of limejuice will remove the stains.

(II.) HARNESS AND SADDLERY.

1. Once in every six months the saddlery and harness in possession will be laid by in dubbing for two or three days.

2. The whole of the strapping composing the saddlery and harness will be taken to pieces; and after the articles have been cleaned, and while they are damp from the use of a wet sponge, the dubbing will be lightly rubbed in. It may be applied with a rag, sponge, or brush. Dubbing spreads more uniformly, and is incorporated more thoroughly with the fibres of the leather, if applied when the leather is damped. In the winter months the dubbing should be warmed.

Digitized by Google

3. When the dubbing has had time to penetrate the leather, which will be in two or three days, the residue of tallow on the surface should be rubbed off, and the article polished up with a cloth or brush. If this is properly done, and only a sufficiency of dubbing has been used, the leather will not soil the hand or glove when handled.

4. Rifle buckets, and seats and flaps of saddles, being of uncurried leather and requiring to be kept stiff, should only be very lightly dubbed *annually*, but occasional soap sponging is necessary to preserve the grain.

5. Soap should be used daily, where articles are in constant use, to produce mellowness in the leather rather than an outward gloss. Inspecting officers should handle the straps to ascertain that they are pliable, and in good preservation.

6. So long as leather remains dry and clean it needs but little attention, beyond receiving a little grease half-yearly; but when wetted, either by rain or by the water necessary to clean it, the leather becomes hard and stiff, if not softened with some oily matter.

7. Leather must not be washed with soda nor soaked in water. Its vitality is quite destroyed by being soaked in hot water, and it will be found afterwards to readily crack when bent. Washing the leather with soap and *luke-warm* water, quickly and without soaking, will not injure it if the precaution is taken to apply oil, dubbing, or good soap, while the article is slightly damp.

8. Drying the leather by the fire destroys its durable properties, and is strictly forbidden.

9. Leather articles exposed to the action of ammonia, which is continually given off in stables, become weak and rotten sooner than those not so exposed. But the grease of oil, soap, or dubbing, applied from time to time, penetrates the leather, nourishes it, and fits it to resist the deleterious effects of ammonia, and of atmospheric moisture; it also fills up the fibres, makes the leather more mellow, and increases its tensile strength.

10. Soft soap contains an excess of alkali, and should be sparingly used; if applied freely it gives the leather a dark and sodden appearance.

11. Bees-wax and saddle soaps, commonly used in the service to give a polish to the grain of the leather, are not objectionable, providing good yellow soap is used to the flesh (under) side to keep the leather mellow.

12. Harness and saddlery, when kept in store, should be properly cleaned, and soaped, or dubbed, before being stored. The officer immediately responsible should inspect them monthly.

APPENDIX XI.

(Referred to in paragraph 116.)

9 Eng. 641

INSTRUCTIONS FOR MARKING VEHICLES AND PACKSADDLERY.

1. These instructions are issued with the object that when vehicles are required for use on mobilization, they will be marked so as to show the title of the unit to which they belong and the formation to which the unit is allotted.

2. These marks, called "Corps marks," are to be on the same system for all vehicles, and for all branches of the service. The position of the marks will be as follows:—

B.L.C., Q.F. guns and ...	On trail off side.
B.L. Howitzer carriages ...	
B.L. 10-Pr. gun carriages. ...	
Limbers and Ammunition Wagons:—	Centre of back of ammunition boxes.
B.L.C. 15-Pr. Q.F. 15-Pr. and 4·7-inch	
B.L. 6-in. Howitzer	Back of limber box, near side, close to top.
B.L. 5-in. Howitzer	Back of ammunition or limber box, off side, close to top.
Carriage M.G. Infantry ·303-in.:—	
Mark I.	On centre of front plate.
„ II.	On back of off locker.
„ III.	On rear of carriage, off side.
Carts—Cable	Off side of front box.
Tool, R.E.	Off side at front.
Water tank:—	
Mks. I* and II.	On rear end of tank, off side.
Mks. IIA and IIB	Off side of tank, low down at front.
Wagons:—	
Air Line	Off side of front box, low down.
Ambulance Mark V*	Off side of body, low down.
„ light ...	
„ Mark VI. ...	Off side on locker.
Cable	Off side of futchel of body and Off side of footboard of limber.
Pontoon (or trestle)	Off side at front.
Wireless telegraphy	Off side of body and off side of limber low down.
Other vehicles (if construction admits)	On body of vehicles, on off side as far to the front as possible, and low enough to be clear of tarpaulin or other cover.
Mountain Artillery:—	
Packsaddlery saddles ...	Off side as convenient.

Digitized by Google

Corps marks should appear on both portions of limbered vehicles.

Hired vehicles to be marked on mobilization as most convenient for identification.

3. In addition to the above-named "Corps marks" there are a number of details chiefly for regimental convenience, marked on certain vehicles, such as the nature of gun, number or letter of subsection, number of wagon, &c. These details are not to be mixed up with the corps marks, and will be placed as in Table III. The general principles indicated in that table should be followed in marking any vehicles for which specific details are not given.

4. The details of the marking are given in the following paragraphs. All vehicles detailed for use with medical units will be marked with the Geneva cross, in addition to corps marks, &c.

5. Drawings to illustrate the method of marking, and the typical position of the marks, will be issued on demand to chief ordnance officers, who will arrange for necessary promulgation to the troops requiring them. These drawings are only issued as guides, and where they differ from equipment regulations the latter must be followed. The markings of vehicles will be performed by hand-painting.

All marking will be in white paint (except the Geneva cross, which will be in red on white ground) in letters and numerals as laid down in Table IV.

6. "Corps marks" generally require two lines:—

First line—Title of unit, *e.g.*, 4 Gord. Highrs.

Second line—Formation to which unit is allotted, *e.g.*, Gord. Inf. Bde. T.F.

Table I shows the abbreviations to be used for titles of units.

Table II gives examples of first and second lines.

7. Vehicles in possession of units and those held by A.O.D. to complete war equipments of units will be marked in full.

REGULATIONS FOR THE EQUIPMENT OF THE ARMY, 1914.

PART 3.—TERRITORIAL FORCE.

SECTION I.—GENERAL REGULATIONS.

CARE AND CUSTODY OF PUBLIC EQUIPMENT.

1. The term "Public Equipment" relates to all stores (such as arms, ammunition, ordnance, and technical military equipment) issued in kind and maintained by the Government, and for which an equipment account has to be rendered to local auditors for audit on behalf of the War Office. Articles such as clothing, personal equipment, harness and saddlery, which are provided or maintained by County Associations out of money grants allotted to them, do not fall within the category of public equipment.

2. A County Association is responsible to the Army Council for all public equipment supplied to units administered by the Association. The C.O. of a unit will, on behalf of the County Association, be responsible that all public equipment supplied for the use and equipment of his unit is maintained in a serviceable condition, complete in all details and in the authorized proportions.

3. The C.O. will make, or cause to be made, frequent inspections of the whole of the equipment for which he is responsible, and if any defects are discovered will take steps to remedy them. Should any men be absent from the inspection a certificate will be furnished by the C.O. (or, in the case of yeomanry or infantry, by the squadron or company commander) that the arms allotted to such men have been inspected and that they are in an efficient condition; this certificate will be appended to the report made by the officer who carries out such inspection.

9
Gen. No.
3617

Digitized by Google

4. An officer on assuming command, and thereafter annually during October, will ascertain by inspection and stocktaking carried out either by himself or by an officer acting under his authority, the actual state of the public equipment on charge, satisfying himself that the articles agree in quantity with those shown in the equipment account, that all the equipment is properly appropriated, that it is in a thoroughly serviceable condition and complete in all details, and that it is under proper protection, and in all respects in accordance with the orders of the Army Council.

The formal receipts given by the men allowed to retain arms under paragraph 55 are not to be regarded as dispensing with the actual production of the arms when stocktaking is being carried out.

A.O. 98 1913

5. On a change of command of a unit, a certificate in duplicate, in the form given in Appendix I, as to the state of the equipment, signed by the retiring C.O. and the next senior officer upon whom the command devolves, will be forwarded to the G.O.C.-in-C. One copy of the certificate will be transmitted by the G.O.C.-in-C. to the local auditor, and the duplicate will be returned to the officer assuming command, to accompany his equipment account.

Should the officer temporarily taking over the command be appointed C.O., no further certificate will be necessary.

Should another officer be appointed, a similar certificate, signed by himself and the officer temporarily in command, will be forwarded by the former to the G.O.C.-in-C.

6. Should a difference of opinion exist between C.Os. on the occasion of transfer of public equipment, as to the state, quantity, or description of the articles to be transferred, application will be made to the G.O.C. by either of the officers concerned, for the assembly of a board of officers to investigate and report on the matter.

7. No trials or experiments involving the use of any article of public equipment will be made without first obtaining the sanction of the Army Council through the G.O.C.-in-C.

8. All communications connected with the supply of equipment, whether authorized by, or in excess of regulations, will be addressed to the C.O.O., who will, if necessary, take the orders of superior authority on the subject.

INDENTS AND ESTIMATES FOR PUBLIC EQUIPMENT.

9. Indents for stores (except ammunition and camp equipment) will be prepared on A.F. G 997, and for camp equipment on A.F. G 968. Special forms are provided for ammunition. The instructions for the preparation of the indents printed on the army forms are to be strictly adhered to.

10. All indents for public equipment will be signed by the O.C. the unit, or by an officer acting in his name, and will be made in

Digitized by Google

sufficient time to allow of the issue or exchange of the stores without difficulty by the date they are required.

11. Indents for public equipment to replace articles deemed unserviceable will not be made until the C.O. has satisfied himself that the articles are thoroughly unserviceable or cannot be repaired by the means at his disposal.

12. In the case of units having outlying detachments, the indents will be made by the O.C. the unit, who will state to what place or places the articles are to be sent. The vouchers will be signed by the O.C. such detachments, and sent to the O.C. the unit, to be countersigned by him, or, in his absence, by the adjutant.

13. Stores and equipment other than public equipment and those mentioned in paragraphs 46 and 69 may be supplied on repayment to County Associations at the rates prescribed in the Priced Vocabulary of Stores subject to the following conditions and restrictions :—

(1) That the articles demanded are not ordinarily obtainable from outside sources and are of an exclusively military nature, necessitating standardization of pattern or expert technical inspection. A.O. 248 1913

(2) The articles demanded are solely for use of units of the Territorial Force and will not be used for any private purpose.

(3) The articles purchased will be retained, so long as they are serviceable, as Association property, and will not be disposed of until worn out.

(4) The units for which articles are required will be shown on the indents, and the stores, etc., demanded must be of pattern identical to, or of a kindred nature to those supplied under the Equipment Regulations to corresponding units of the regular army. The numbers required must not be in excess of the proportions allowed for the regular army.

War Office approval must be obtained prior to issues being made, when :—

(1) The total value of the articles demanded exceeds £200.

(2) The articles demanded are of a new pattern which is being gradually introduced into the regular army.

(3) The articles demanded are intended to supplement scales of which free issues are made or to anticipate such free issues (except as provided for in paragraphs 16, 66, 83 and 167).

(4) The articles are included in the Barrack and Hospital Schedules.

Applications should be addressed to the C.O.O., and they should contain full details of the reasons which render them necessary

The following will not be supplied :—

(1) Articles of an experimental pattern under trial in the regular army.

Digitized by Google

(2) Articles of a special pattern not in general use in the regular army.

(3) Guns, gun carriages and mountings, technical vehicles, explosives and gun ammunition.

All indents for issues on repayment must be signed by the secretary of the County Association concerned and be headed in red ink with the words "On Repayment." If it is desired that the stores should be distributed by the A.O.D. to units, or detachments of units, a detailed distribution list with full consignment particulars must accompany the indent.

A.O. 276 1912

14. Articles of store which form part of the regulation field kit of an officer of the Territorial Force, and are required for his personal use, may be issued on prepayment. (*See* Regulations for the Territorial Force.) Such issues, however, must be confined to articles which are not provided for his use on mobilization at the public expense.

15. The value of stores issued on repayment will be recovered by the command paymaster of the command in which the Association indenting for the stores is located, except in the case

A.O. 276 1912

of issues from Woolwich Arsenal which will be recovered by the Cashier, Army Pay Office, Red Barracks, Woolwich. Priced vouchers on Woolwich, Form 1 (for Woolwich) and on A.F. G 982 (for other stations) will be rendered by the A.O.D. as follows :—

(*a*) Three copies to the County Association, who will obtain receipt of the unit on one, and forward the same to the command paymaster, with amount shown thereon.

A.O. 248 1913

(*b*) Two copies to the command paymaster, who will forward one copy as a claim to the Association, and retain the other as a voucher to the cash account. The voucher bearing the unit's receipt should be returned to the A.O.D. by the paymaster with a reference to the cash credit.

In the case of stores issued under paragraphs 14, 46 and 69 the issues will be on prepayment, and the vouchers in triplicate will be forwarded to the unit, who at the time of making payment will forward two of the copies of the voucher to the command paymaster, who will retain one as a voucher to the cash account and return the other to the A.O.D. with a reference to the cash credit. The stores will then be issued and the receipt of payers obtained.

The cost of carriage of stores issued by the A.O.D., as initial issues ordered by the War Office will be chargeable to army funds.

The cost of carriage of stores issued on repayment to County Associations for the care, repair, replacement or maintenance of authorized equipment will not be defrayed from army funds.

16. Stores required by County Associations for the care, repair, replacement or maintenance of authorized equipment may be

A.O. 248 1913

obtained from the A.O.D. on repayment, subject to the conditions laid down in paragraph 13.

Digitized by Google

RECEIPT OF STORES.

17. C.Os. and adjutants of units will personally examine stores upon receipt from the A.O.D. The result of their examination, if unfavourable, will be reported to the C.O.O.

Should vouchers not correctly represent the stores received by the unit, either as to numbers or description, a report will at once be made to the O.O. by whom the issue was made.

DAMAGES AND DEFICIENCIES.

18. When public equipment is lost, stolen, destroyed, or damaged, and it is a matter for consideration on whom the expense of repairing or replacing it should fall, owing to the responsibility not being clear or the charge being demurred to by the person held responsible, or for other reasons, the C.O. will make a full enquiry into the circumstances, and forward a report thereon to the C.O.O. for submission to the G.O.C.-in-C. The report will be accompanied by a list of the damaged or deficient stores on A.F. G. 998 duly completed in strict accordance with the instructions contained thereon.

19. When the G.O.C.-in-C. decides the action to be taken in the case, the date and registered number of such decision will be quoted on the indent on the A.O.D. for any stores required in replacement. When the case is referred to the War Office for decision, indents for the stores required in replacement may be put forward on the A.O.D. without waiting for the decision of the War Office in the matter, but the date and number of the letter from the G.O.C.-in-C. to the War Office will be quoted on the indents.

20. When public equipment is lost or rendered unserviceable by neglect or culpable mismanagement, or if arms are rendered unserviceable by the use of ammunition not of government issue (see paragraph 178), charges will be made for such amount as may be assessed by the County Association or O.C. the unit on its behalf, due regard being paid to the condition of the article according to the best evidence obtainable. The assessment will ordinarily be the value of the unexpired period of wear, but no charge shall be less than one quarter rate, even though the article has been in use for the full period of duration, unless it is established by evidence that the actual value (which will then be charged) is less. A.O. 248 1913

The assessment in cases of repairable damage should be the cost of repair, including materials.

The maximum charge against a territorial soldier on account of any one arm is £2.

21. For the purpose of assessing charges, but not in any way to govern the times for exchanging the stores, it will be considered that articles should last the periods assigned to them in Appendix III. 24 years will be taken as the period of duration for any

Digitized by Google

article for which no period has been laid down. The unexpired period will be calculated in years, any period of less than 12 months being charged as a full year against the individual responsible.

22. The charges to be made for carrying out repairs to small arms will be in accordance with the following scale :—

	s.	*d.*
Rifles—barrel	1	0
Swords, sword-bayonets, and dirks—all patterns :—		
Blade slightly cut on edge, or rusty	0	6
Rusty or damaged hilts or sockets	1	0
Scabbards, leather, sword-bayonet	0	6
A.O. 248 1913 Scabbards, steel—all patterns :—		
Rusty or dented (or both)	0	6
Tubes, aiming, rusty or slightly damaged	0	6

The charge on account of barrels of rifles cord worn at muzzle or breech, if they are not rendered unserviceable thereby, will be 1*s.* If cord worn at both muzzle and breech, a charge of 2*s.* will be made.

Barrels slightly rusted inside will be thoroughly cleaned by the certificated serjeant instructor at a charge (to be credited to the public) of 4*d.* each.

23. Articles of public equipment which are lost and not chargeable against the public will be paid for, and struck off charge in the equipment account by A.F. P 1925. The value will be paid to the cashier of the command, and the voucher striking them off A.O. 165 1913 will be signed by the command paymaster, who will give a reference to the cash account in which the value will be found credited to the public.

When articles of public equipment rendered unserviceable are not chargeable against the public, a similar reference will be given, but the unserviceable articles will be returned to the ordnance depôt. The indent for new stores required to replace those lost or destroyed will also give a reference to the expense voucher by which the latter are struck off. These indents should be rendered quarterly from the 1st January.

24. Claims against units for deficiencies or damages of public A.O. 98 1913 equipment which cannot be borne by the public will be made through the County Association concerned, who will take the necessary steps for recovery from those actually responsible for the loss or damage. (See also Regulations for the Territorial Force.)

RETURN OF EQUIPMENT INTO STORE.

25. Whenever it becomes necessary or advisable to return equipment into store, except empty packages and such articles as have been replaced on indent, C.Os. will make application to the C.O.O. to receive them, stating their description, number, the time they have been in use, and the reasons and authority (if any) for returning them to store. The C.O.O. will add his instructions and

Digitized by Google

return the document to the unit, by whom it will be attached to the voucher on which the stores are charged to the A.O.D.

26. Issues of public equipment to replace similar unserviceable articles in possession of a unit will not be made until the unserviceable articles have been returned to the A.O.D., inspected, and condemned.

27. No articles will be returned into store on account of being of an obsolete pattern without the authority of the G.O.C.-in-C., obtained through the C.O.O.

28. When stores are returned to the A.O.D. in packages, a detail of the contents on A.F. G 1028, signed by the packer, and also by the person witnessing the packing, will be placed in each package.

29. Vouchers will be prepared in triplicate by carbon process on A.F. G 1033 for all stores returned to the A.O.D. except as stated in paragraph 38. The vouchers will be signed by the consignor; and one copy, duly signed by the consignee, will be returned as soon as practicable after the stores have been received. When stores are issued to other accountants, the vouchers will be prepared in duplicate only.

30. When stores are returned from a distance, vouchers will be sent by post on the same day that the stores are despatched, to the O.O. to whom they are consigned. The date and number of the order directing the return of the stores will be inserted in the headings of the vouchers, and a corresponding date and number will be conspicuously marked on the outside of each case or package, so as to enable the consignee to identify them immediately on receipt. Each case, bale, or package will be weighed, and the weight marked upon it by the consignor prior to despatch.

31. C.Os. are responsible that all chests, cases, barrels, and cylinders, received with equipment of any kind, are handed over, as soon as they can be dispensed with, to the A.O.D.; and, if possible, without cost to the public. The packages will be addressed:—

The Ordnance Officer.....
From the Officer Commanding.....

32. Where the carriage of ammunition, stores, or equipment is payable by the public, a carrier's note (A.F. G 980 for stores, or G 996 for explosives) detailing the number and weight of the packages, bundles, and loose articles, as well as the number of articles in each bundle, will be sent to the local transport officer, who will arrange the mode of conveyance.

33. When stores and explosives are authorized by the C.O.O. to be returned to the Ordnance Depôt, Woolwich, or Weedon, application for instructions as to the mode of transport will be made to the Assistant Director of Military Transport, Royal Arsenal, or to the Transport Officer, Weedon; the carrier's note will be made payable by "Transport, Royal Arsenal," or "Transport, Weedon," as the case may be.

Digitized by Google

34. The utmost vigilance is required on the part of officers returning stores, in order to guard against explosives being returned into ordinary store depôts, instead of into the magazines, as well as to preclude the possibility of matches, nails, &c., being left among stores of any kind. Ball and blank small-arm ammunition should never be returned to store in the same package, nor should live ammunition of any description be packed with empty cartridge cases (*see* paragraphs 187 and 191).

35. If articles returned into store as unserviceable are found on receipt by the A.O.D. to be still serviceable or capable of repair, or if any of those which are unserviceable are considered to have become so from improper use or negligence, the C.O.O. will call upon the officer returning the stores to furnish an explanation, and, in the event of this not being satisfactory, the C.O.O. will bring the matter to the notice of the G.O.C. Should it be decided to return articles to the unit for further wear, the cost of carriage unnecessarily incurred will be claimed from the County Association.

REGIMENTAL EQUIPMENT ACCOUNTS.

36. An equipment ledger containing a record of all articles of public equipment, and of all ammunition supplied gratuitously will be kept under the orders of the O.C. the unit.

For the purposes of regimental equipment accounts the term "unit" may be defined as under :—

Yeomanry ...	...	... The regiment.
Infantry (including cyclist battalions)	...	... The battalion.
All other units	...	... The battery, company, etc.

When the equipment is not all located at the headquarters of the unit, a distribution book will be kept to show the manner in which the articles are allocated between the outlying squadrons, companies, or stations, as the case may be. A.F. G 1054 will be used for this purpose except by artillery units, who will use A.B. 211. In such cases a record of the equipment, duly certified by the officer in charge, will be kept at the station and will be forwarded to headquarters on 31st October for comparison with the distribution book and the equipment ledger of the unit. After verification it will be initialed by the adjutant or other responsible officer and returned to the officer in charge of the equipment.

A.O. 276 / 1912

Detailed instructions for keeping equipment ledgers are contained in Appendix II.

37. Camp equipment, issues on payment, and consumable stores (except ammunition, explosives and the consumable stores referred to in paragraph 39) drawn in regulated proportions, will not be shown in the account. Any quantities of consumable stores remaining unused at the end of the year will be shown as in possession in the indent for the next year's supply.

A.O. 388 / 1913

Digitized by Google

38. Stores sent to the A.O.D. for repair and return to the unit will not be struck off equipment ledger charge unless the C.O.O. gives special instructions for vouchers to be passed. This course will, as a rule, only be necessary when stores have to be sent on to Woolwich or Enfield Lock, or are condemned as being beyond repair.

39. The whole of the expendable stores issued annually for the instruction of engineer units under Section X and those allowed under paragraph 113 will be brought on equipment ledger charge by the unit. Quantities expended will be written off charge by expense vouchers upon the certificate of the C.O. that the expenditure has actually taken place. A.O. 388 1913

Any unexpended balance remaining at the end of the training season may be retained towards meeting the following year's requirements, the quantities in hand being shown on the annual indent submitted to the C.O.O. Sandbags may be accumulated up to, but not exceeding, treble the quantities allowed as the annual supply. A.O. 388 1913

40. Ammunition issued gratuitously for practice and exercise will be written off charge, when expended, by expense vouchers as follows :—

Army Form.	Ammunition, Unit, &c.
G 863	Gun ammunition for horse, field, and heavy batteries. (To show full particulars of the allowance, ammunition used, authority for allowance, &c.)
P 1926	Gun ammunition expended under a money allowance by companies, R.G.A.
P 1925	Small-arm and machine gun ammunition.

Digitized by Google

SECTION II.—ARMS.

ISSUE.

42. Arms of the description shown in Table I will be issued gratuitously by the A.O.D.

They will be supplied only for the ranks detailed in that table, the total number issuable (subject to the proviso in paragraph 44) being limited to :—

(*a*) THE FULL ESTABLISHMENT OF SUCH RANKS	When the strength of the unit is equivalent to its approved establishment.
(*b*) THE ACTUAL STRENGTH plus 5 per cent. spare in the case of rifles or such additional numbers as the G.O.C.-in-C. may approve	When the strength of the unit is below its approved establishment, provided always the maximum number issuable under (*a*) is not exceeded.

A.O. 276 / 1912

In any instance in which a unit is, temporarily, much below its approved establishment and arms additional to those issuable under (*b*) are required for the use of members of the Territorial Force Reserve proceeding to camp, temporary issues* of additional arms may be made subject to the condition that at no time, unless War Office authority be first obtained, will units be permitted to hold arms in excess of the maximum authorized establishment for whom arms are normally issuable under these regulations.

43. Sufficient arms will be maintained by the A.O.D. in each command to complete the war equipments of all units on mobilization.

44. The only supernumeraries for whom arms will be issuable will be those members of the Territorial Force who have been enrolled for service in the Special Reserve. Arms of the approved pattern, and in the approved proportions, may be drawn for such men, in addition to the numbers issuable under (*a*) and (*b*) of paragraph 42.

A0.98 / 1913

45. The necessary adjustment in the number of arms held on charge will be made on the 1st of April of each year, according to the strength, exclusive of officers, shown on A.F. E 548 rendered on that date.

9 / Arty / 1353

46. Officers, N.C.Os. and men of the Territorial Force may obtain, on prepayment, rifles required for their personal use, under the conditions laid down in Appendix IV. Pistols may also be obtained by officers on prepayment, when required to form part of the officers' regulation equipment.

* As defined in the Regulations for Army Ordnance Services, Part I.

Digitized by Google

47. Issues of arms on payment will not be made to members of the Territorial Force Reserve.

48. Swords will, on mobilization being ordered, be sharpened with a fine whetstone of the type used for sharpening scythes, knives, etc., in the following manner :— A.O. 248 1913

Hold the sword with the point resting on a support, then use the whetstone, as if filing in a crosswise manner, restricting the operation to those portions of the blade that have already been reduced to the thickness of ·01 inch and taking care to maintain the same angle of edge as that which already exists.

After sharpening, wipe the blade clean and lubricate with "oil, lubricating, G.S." The work will be carried out only by competent persons, and a grant of funds to meet the cost of this service, including hire or purchase of whetstones, is sanctioned under Regulations for the Territorial Force.

CARE, CUSTODY AND INSPECTION.

52. All arms issued to units remain the property of the public, and the O.C. will take such precautions as shall prevent them being hired by, or lent to other persons, or used for purposes other than those for which they were issued to the units.

53. The duty of selecting suitable armouries devolves upon County Associations. Armouries must be of sufficient size to contain all the arms of the unit or detachment of the unit to which they may be allocated. They should also be thoroughly dry and well aired, free from worm-eaten timber and be kept perfectly clean.

54. All the arms on charge of units, including those kept in private custody under paragraph 55, will be inspected twice a year by the O.C., or by an officer deputed by him. Steps will be taken for replacing any deficient or unserviceable stores by indents upon the C.O.O., and for payment of the value of deficiencies and damages as directed in paragraph 23. One of these inspections must take place between the 1st and the 31st October.

55. The arms will be deposited after drill in the armouries of the units, except when the C.O. gives a written permission to members to take custody of their arms at their own houses.

Such permission does not relieve the C.O. of his responsibility for these arms, and will not under any circumstances be given to members of the Territorial Force Reserve. It will be given with care, and may be withdrawn at the discretion of the C.O. The arms should be called in during times of riot or of anticipated disturbance.

Arms retained in private custody will be subject to inspection at any time by the brigade commander, and must always be produced for inspection as required by paragraphs 3, 4 and 54. In any case in which the arms are neglected, the discretionary power granted to the C.O. in this paragraph will be withdrawn.

56. A record will be kept in each armoury of all articles of public equipment issued therefrom to individuals.

Digitized by Google

Except where a central armoury exists for the whole unit, this record will be kept by squadron or company commanders in A.B. 316A, a separate book being used for each company, etc. In central armouries the record will be kept by the O.C. the unit in A.B. 316. The keeping of the record by a company officer will not in any way relieve the C.O. of his responsibility as laid down in paragraph 2.

A. O. 388 1913

Soldiers to whom public equipment is issued under the authority contained in paragraph 55, should be warned that they are individually responsible for keeping such equipment in good order and condition, and for producing the same when required. Their responsibility in the matter will continue until the equipment has been returned to the custody of the unit, and duly entered and signed for in the army book above mentioned.

57. Drill purpose arms must not be used for ball firing, and no charge for damages to them will be made, except for such as are manifestly wilful.

ARMS.—EXAMINATION, REPAIR, BROWNING, AND CLEANING.

61. A certificated serjeant-instructor will examine thoroughly every arm in possession of the unit once every three months; will keep a record of the condition of the arms; will make detailed reports to the C.O., who will be held responsible that the duties of the serjeant are properly performed; and will execute such minor repairs as are laid down in the code of instructions he has received at Birmingham or Enfield Lock.

62. When arms require repairs at times other than those specified in paragraph 80, either on account of fair wear or accidental injury, and repairs are such as cannot be executed in accordance with paragraph 61, the circumstances will be reported at once to the C.O.O., who will take the necessary steps to have the repairs executed. When the cost of such repairs is recoverable through the County Association, the cost of carriage will also be defrayed by the Association.

63. No repairs to arms of any kind will be executed by soldiers (other than certificated serjeant-instructors), or by any civilian employed by them. Tampering with government arms is a serious breach of discipline, and will render any man who may be guilty of it liable to punishment. Any rifles which on inspection may be found to have had their actions or any other parts improperly altered will be at once returned into store, and repaired at the expense of the unit.

64. A copy in large characters of paragraph 63 will be affixed to the door of all armouries and drill sheds, together with a notice that permission to keep his rifle in private custody will be at once withdrawn from any man who may offend against the regulation above quoted.

65. Great attention must be paid to the proper cleaning and care of the arms, instructions for which will be found in the Musketry Regulations.

Digitized by Google

C.Os. will caution their men that any neglect in this respect may be attended with danger to themselves, and will impair the accuracy of the weapon as well as render the unit or themselves liable for the cost of any repairs or removal of rust or dirt that may be found necessary on the inspection of the arms. Arms will be cleaned immediately after use.

All arms must on first issue be thoroughly cleaned before being placed in the hands of the troops.

66. The following scale of material for cleaning, lubricating, and preserving small-arms will be issued free, once per annum :—

Weedon Section.			
Jute, dressed	... hanks	½	For each 100 stand of arms.
Wire, brass, No. 26 W.G. hard, 3-inch lengths ...	... ozs.	2	
Section No. 9a.			
Composition, preserving arms	... pints	2	
Oil, lubricating G.S.	... „	15	
Section No. 13c.			
Flannelette	... yards	350	
N.I.V.			
Oil, paraffin*	... pints	½	
Sheeting, old	... lbs.	8	

A.O. 248 / 1913

A.O. 98 / 1913

Should any further supplies be required they must be obtained from the A.O.D. on repayment, with the exception of paraffin, which should be obtained locally.

A.O. 248 / 1913

67. Should a C.O. doubt whether arms of any description under his charge are serviceable, he will report the matter, stating the reasons for his opinion, to the C.O.O.

Testing weapons of any kind in charge of troops, except as provided in the Musketry Regulations, is strictly forbidden.

Ammunition obtained from the A.O.D. will alone be used.

68. When arms are removed from the arm-chests care must be taken not to damage the chest fittings. When the fittings appear to have been injured by unfair treatment, their value will be charged against the unit concerned.

69. In the event of a soldier of the Territorial Force desiring to have a new barrel fitted to his rifle at his own expense, he may apply, through his C.O., to the Chief Inspector of Small-Arms, Enfield Lock, who, if circumstances permit, will arrange to carry out the work. The cost of carriage both ways, in addition to the cost of the new barrel and the labour expended in fitting it, will be defrayed by the soldier.

* Local purchase should be authorized by the C.O.O. when the quantity issuable is less than the minimum quantity for which carriage is charged by the railway company.

Digitized by Google

VIEWING PRIVATE ARMS.

73. Any private arm of government pattern which it may be desired to use in shooting matches, or any new barrel that may be required for such arm to replace a worn-out barrel may be inspected by the Chief Inspector of Small-Arms. Application will be made by the owner of the arm or barrel through his C.O. to the Chief Inspector of Small-Arms, Royal Small-Arms Factory, Enfield Lock, who will cause the same to be viewed. The name of the maker from whom the rifle or new barrel has been ordered will be stated in the application.

74. A charge of one shilling for each arm, and sixpence for each barrel viewed will be made against the owner, in addition to the cost of carriage to and from the Small-Arms Factory.

75. A certificate to the following effect will be returned with each arm viewed and passed :—

"This is to certify that the* barrel (and breech action) submitted by
has been viewed and found to be correct and in conformity with the government pattern so far as regards length, weight, bore, rifling, form of chamber (and fitting of breech action); that it takes the government ammunition and that it may be used in any match restricted to government military rifles of this pattern."

COMPONENTS AND TOOLS FOR REPAIRS AND CLEANING.

76. The proportions of components of arms detailed in Appendix VI will be issued on demand to enable serjeant-instructors to execute repairs, provided the conditions prescribed in paragraph 79 are complied with.

Indents will be rendered annually on the 1st March, on A.F. G 997, for articles required to replace those expended during the year.

77. Should additional numbers of these components be required, they should be obtained through the County Association by demand upon the C.O.O. on repayment. Os.C. units will be responsible that government arms are only repaired with components supplied by the A.O.D.

78. The sale, exchange, or gift outside the units of any components obtained from store on payment is prohibited.

79. Tools in the proportions laid down in Appendix VI, Table 1, will be issued on demand, by the C.O.O., as public equipment for each serjeant-instructor holding a certificate from the Chief Inspector of Small-Arms, provided the C.O. certifies that a properly fitted armourers' shop exists locally for the separate use of such instructor.

* Here insert description of arms or barrels.

Digitized by Google

80. The arms will be sent every fourth year for examination and repair, and re-browning if necessary. In commands where a central armourers shop has been established the work will be carried out there, and the necessary arrangements will be made by the A.D.O.S. of the command.

In other cases the work will be carried out in the Royal Small-Arms Factory, Enfield Lock, and the Chief Inspector of Small-Arms will issue the necessary instructions.

Arms sent to central armourers shops will not be taken on charge in the store accounts, but will be dealt with as stores received for repair (*see* paragraph 38). Vouchers must, however, be passed for all small-arms and components of small-arms sent to Royal Small-Arms Factory, Enfield Lock.

81. Deficiencies of arms or parts of arms will be charged for. Repairs necessitated by fair wear will be executed free of charge; the expense of other repairs will be claimed from the County Association.

82. When the extent of repairs not chargeable against the public has been ascertained, a claim will be prepared in triplicate by the carbon process on A.F. G 838. The original will be sent to the secretary of the County Association and the duplicate and triplicate to the command paymaster, who, when payment has been secured, will return the duplicate to the O.O., with a reference to the account where credit will be found. A. O. 165 1913

83. Full instructions for the use of aiming tubes will be found in the Musketry Regulations. ·22 inch tubes will be used only in the aiming tube rifles supplied for the purpose; they are not to be used in service rifles. Aiming tubes and their appurtenances in excess of the free supply authorized by regulations may be issued on repayment.

84. Arms will be marked before issue by the A.O.D., in accordance with the Regulations for Army Ordnance Services, Part I. No further marking will be necessary. The full designation of the unit, and the consecutive numbers to be marked on the arms, will be stated on all indents for arms. Arms issued to replace others will receive the consecutive numbers of those replaced.

SECTION III.—ACCOUTREMENTS.

9 Arty. 1358

88. A sling for each rifle issued under Table 1 will be supplied as public equipment, and, if so desired, will be marked before issue by the A.O.D. Full particulars of the marking should accompany the indent. A.O. 248 1913

89. Bags, ammunition, canvas, will be supplied, as public equipment, in the undermentioned proportions:— A.O. 98 1913

Yeomanry	32 per regiment.
Infantry (except cyclists)	48 „ battalion.
Cyclists	40 „ „

Digitized by Google

90. Accoutrements for serjeant-instructors, including acting serjeant-majors, will be provided as public equipment in the proportions detailed in Table 2 (viii.).

91. The maintenance of all accoutrements (other than those referred to in paragraphs 88 and 90) must be effected by County Associations from the money grant allotted to them for that purpose.

92. The articles to be provided for the various arms of the Territorial Force are detailed in Table 2.

93. On mobilization a complete set of accoutrements, as detailed for R.A.M.C. in Table 2, will be provided for the men enlisted into the general hospitals of the Territorial Force to complete these units to war establishments.

94. Instructions for the care and preservation of brown leather accoutrements, which may be of assistance to units in possession of such accoutrements, will be found in Appendix VII.

SECTION IV.—HARNESS, SADDLERY, AND PACKSADDLERY.

95. Harness, saddlery, and packsaddlery, will not be supplied nor held as public equipment.

Initial issues will, however, be made free under the following circumstances :—

(1) HARNESS of government patterns :—
- (*a*) On first formation of unit.
- (*b*) For any increase to the approved establishment that may be authorized.

(2) PACKSADDLERY as for government pattern harness.

(3) SADDLERY (officers and men) :—
- (*a*) On first formation of unit.
- (*b*) For any increase of strength within the approved establishment, over and above the numbers for which saddlery has already been issued free.
- (*c*) For any increase to the approved establishment that may be authorized.

96. Government pattern harness is the harness required for use with those technical vehicles with which it is not practicable to employ harness obtainable from civil sources.

97. All harness for technical vehicles, and all packsaddlery or saddlery purchased by County Associations during peace, must be obtained exclusively from the A.O.D. on repayment. The composition of the sets of such harness, packsaddlery, and saddlery, will be found detailed in Section IX and in Appendix V.

A.O. 276 1912 — The harness, packsaddlery, and saddlery authorized for peace training, and in respect of which annual upkeep grants are issuable under the Regulations for the Territorial Force, are given in Table 13.

Digitized by Google

Harness and saddlery will, if desired, be marked with corps marks by the A.O.D. prior to issue. The request that the marking should be performed, and full particulars of the corps marks, must accompany the indent.

98. Arrangements for the purchase or hire of harness for use with non-technical military vehicles must be made by County Associations.

98a. Bags, nose, for 50 per cent. of the total number of horses shown in the War Establishments of units will be held as peace equipment (except for headquarters units); the maintenance of which must be effected by County Associations. 79 3774

99. Instructions for the care and preservation of harness and saddlery will be found in Appendix VII.

SECTION V.—MISCELLANEOUS.

100. Articles for musketry instruction will be supplied as public equipment in the proportions detailed in the following tables:—

TABLE 1.

(*d*) For allowance for machine guns, *see* Table 16.

NOTE.—Additional supplies of the articles detailed in Tables 1 and 2 may be obtained from the A.O.D. on repayment.

Flags, musketry instruction, and boards, black, complete, may also be obtained from the A.O.D. on repayment.

Digitized by Google

101. The following articles will be supplied to units, under arrangements to be made by the County Associations, from sources other than government store :—

Brushes, large (1-lb. brushes) for colouring targets.
" small (sash tool) " "
Chalk.
Files (to retain documents).
Glue to make size.
Lamp-black.
Sponges.
Targets.
Whiting.

The targets provided will be of such dimensions that the instructions contained in the Musketry Regulations can be complied with.

102. The undermentioned stamps will be supplied for each Territorial Force unit for the purpose of marking identity discs :—

Stamps, steel for { figures, 0—8, sets 1.
metal, $\frac{1}{8}$ inch { letters, alphabet, sets 1.

103. Irons, branding, as under, will be supplied for marking horses purchased or impressed on mobilization.

Army Service Corps company	1	1	...	...	...	1	

* If necessary. For regiments not having a regimental district number. (See Army List.)

Digitized by Google

104. Details of the signalling stores with which units must be equipped are given in Table 14. Signalling equipment must be maintained by the County Associations, supplies being obtained from the A.O.D. on repayment.

105. An initial issue of 8 compasses, magnetic, pocket, will be made free to each regiment of yeomanry, for the purpose of training scouts. The responsibility for the maintenance and replacement of these compasses will devolve upon County Associations.

106. Mekometers of infantry, artillery (1 reel only—§ 14753 List of Changes in War Matériel), or general service pattern, according to stocks available, will be issued as public equipment in the following proportion :—

Regiments of yeomanry	4*
Battalions of infantry	4*

107. An initial issue of bugles, trumpets, and strings will be made free to units in accordance with the scale laid down in Table 3.

The responsibility for the maintenance and replacement of these musical instruments will devolve upon County Associations.

Bugles, trumpets, and strings may be obtained on repayment from the A.O.D. Corps marks may be added by the A.O.D., provided full particulars are furnished on the indents for the instruments.

108. A set of picketing gear for instructional purposes comprises the following articles :—

Bags, corn, 8-lb.		10
Mallets, heel-peg		1
Pads, surcingle		10
Pegs, picketing, with rope loop		24
Ropes,	head, hemp, with ring	10
	heel	12
	picketing, 4 ft. 9 in.	10

A.O. 276 1912

The number of sets issuable as public equipment to the various units will be found detailed in Table 4, and should only be demanded if actually required, and local facilities exist for their use.

109. Each unit of the Territorial Force will be equipped for the purposes of peace instruction and training with ambulance stretchers and knee caps in the proportions detailed in Table 5. The maintenance of these articles must be effected by County Associations, supplies being obtained from the A.O.D. on repayment.

110. Unserviceable circular tents for instructional purposes may, if required, be issued as public equipment in the following proportions :—

To each regiment of yeomanry and battalion of infantry	4
To each other unit, R.A.M.C. excepted... ...	1

* Will be issued as they become available.

Digitized by Google

111. An initial issue of six pick-axes and six shovels will be made free, for each company of infantry, other than those forming part of cyclist battalions. The responsibility for the maintenance and replacement of these tools will devolve upon County Associations.

111A. An initial issue of the following items will be made, free, to yeomanry regiments. The responsibility for the maintenance will devolve upon County Associations :— 57 Gen. No 1384

Cutters, wire, Mark V	18 per squadron.
Frogs, brown, wire cutter, Mark III	1 per Mark V wire cutter.
Straps { with buckle ... ... / „ stud... ... ... }	1 per Mark III frog.

112. Intrenching implements will be supplied as public equipment for infantry battalions (including cyclist battalions), in the following proportions :—

Implements, intrenching, patt. 1908—	
Heads	1 per all ranks except quartermaster-serjeants, transport-serjeants, serjeant drummers, serjeant buglers, serjeant pipers, serjeant cooks, serjeant shoemakers, colour-serjeants, orderly room clerks and pipers. A.O. 388 1913
Helves	1 per implement head and 5 per cent. spare.

113. For pioneers of cyclist battalions, pioneer equipment for annual training will be supplied as public equipment on the scale laid down in Table 15.

For special courses arranged annually by the G.O.C.-in-C. for instruction of pioneers, expendable material and explosives may be issued in the proportions laid down in Table 15. A.O. 98 1913

114. An initial issue of 20 pairs of hedging gloves will be made free to each R.E. field company for use when handling barbed wire entanglements. The responsibility for the maintenance and replacement of these gloves will devolve upon County Associations. A.O. 388 1913

115. The following scale of lubricating and preserving material may be issued free, annually, to A.S.C. and R.A.M.C. units for use with vehicles supplied as public equipment :—

Grease, lubricating, for cool climates	2 lbs. per wheel, upon a certificate from the C.O. that the vehicles are in constant use. ½ lb. per wheel when not in constant use.
Dubbing	1 lb. per 100 leather straps.

Lubricating and preserving material will not be issuable free in respect of hired vehicles.

116. Service pattern vehicles, machine guns and their carriages or mountings will be painted once every two years.

Paint, paint brushes and putty will be issued free, in the proportions laid down in Tables 21 and 22, and in Sections IX. and X. No other paint is to be used.

The provision of labour for cleaning, priming, stopping, painting and re-marking will be arranged for by County Associations. To cover this service the allowances laid down in Table 21 and in Sections IX and X will be issued biennially to Associations

Digitized by Google

Claims must be transmitted to the local auditor through the C.O.O. and will be supported by a certificate signed by the O.C. the unit, and countersigned by the secretary of the County Association, to the effect that the work has been satisfactorily executed with the paint supplied.

In order that special payments of the small sums involved may be avoided, claims will be reserved for settlement with those made by Associations on the 1st November.

117. Instructions for marking vehicles are given in Appendix XI. First issues of vehicles from store will have corps marks added by the A.O.D. before issue, units giving the necessary marking particulars on their indents.

118. Stores to admit of the local instruction of officers in reconnaissance and topography will be issued as public equipment in the proportions detailed in Appendix XII. Divisional and mounted brigade commanders will detail a unit to hold each set of stores on equipment ledger charge and to issue them from time to time as they may direct.

The drawing instruments and other articles as detailed in Appendix XIII will be supplied as public equipment for the headquarters office of each division. They should be accounted for in the equipment ledger of the unit responsible for the equipment of the A.S.C. clerk attached to assist the general staff officer.

Stationery required for use with these stores will be supplied upon the receipt of indents on A.F. L 1381 from the C.Os. of units responsible for them. These C.Os. will also be responsible that the stationery office supplies are issued only for the purpose for which their supply has been authorized and that indents for stationery state clearly the service for which it is required.

119. Boxes, stationery, field, Mark III (wood), will be supplied as public equipment and held on charge in peace in the proportions shown in the various Mobilization Store Tables, A.F. G 1099 series. They should be kept packed with the regulations, army forms, books and stationery to be taken into the field on mobilization as detailed in the tables issued with Army Orders.

57
3
3371

SECTION VI.—MACHINE GUNS.

120. Machine guns will be issued to yeomanry and infantry in the proportion of two per regiment or battalion, and will be accounted for in the regimental equipment ledgers. For details of this equipment, *see* Tables 16 to 20.

Each gun will be provided with four barrels, viz.:—

(*a*) Two new barrels distinguished by a band of white paint round the centre, to be kept in store and taken into use on mobilization, one in the gun and one as spare.

(*b*) One serviceable barrel for use in peace, for ball firing only. To be returned to store on mobilization.

(*c*) One D.P. barrel for use in peace for drill purposes or for firing blank only. To be returned to store on mobilization.

Digitized by Google

121. Three handbooks for the ·303-inch Maxim machine gun will be supplied free to each regiment of yeomanry and to each battalion of infantry.

122. The C.O. is responsible that machine guns on his charge are at all times in perfect order and in readiness for immediate service.

As a very little neglect may cause serious consequences, his arrangements will be most definite that these guns are always cleaned and examined after every occasion on which they are used.

123. In addition, the Chief Inspector of Small-Arms, Enfield Lock, will arrange for a biennial examination to be made by an examiner.

After every such inspection a report showing the repairs necessary to put the guns in a serviceable condition will be forwarded to the O.C., who will subsequently forward a certificate to the Chief Inspector of Small-Arms, through the C.O.O. of the area, to the effect that the repairs shown thereon have been carried out. A.O. 47 1912

124. When Os.C. find that the shooting of a gun falls off, and that the barrel appears worn, a diagram of 10 shots will be taken at 500 yards (three shots being first fired as trial shots, in order to give the barrel a chance of "settling down," and due care being taken that the gun is secure on the mounting).

If the figure of merit exceeds 1·50 feet for 500 yards, they will at once indent for another peace barrel, and on receipt, will forward the doubtful barrel to the Chief Inspector of Small-Arms, in the manner directed in paragraph 125, for final sentence.

If a qualified N.C.O. is not available to replace the barrel, they will apply to the C.O.O. for the services of an armourer or armament artificer.

125. When machine guns, mountings, or equipment require more extensive repair than can be carried out locally, the C.O.O. of the area will arrange for their despatch to Woolwich or Enfield Lock as directed in Regulations for Army Ordnance Services, Part I.

126. A memorandum of examination, or history sheet, will accompany each machine gun, when issued for service. It will be carefully preserved, and will be handed over with the gun to which it relates, whenever the latter is transferred from the charge of one officer to that of another. An immediate record will be made thereon of any accident which may occur to the gun, and the result of each official examination which it may undergo. On every occasion on which the gun is fired, the number of rounds, showing whether blank or ball and number of barrel, will be inserted. A.O. 47 1912

127. (i) Spare parts for the repair of machine guns may be issued annually in the proportions detailed in Table 4, Appendix VI. A.O. 388 1913

(ii) Other spare parts and tools are issued as part of the machine gun equipment.

Digitized by Google

A.O. 388 1913

The contents of the spare parts box are not to be drawn upon until the components of the gun and the annual allowances authorized by sub-paragraph (i) have been used up. When articles are withdrawn from the spare parts box, indents will at once be put forward for their replacement.

128. Materials for cleaning and oiling machine guns and their carriages will be supplied free in the following proportions :—

	For each machine gun and carriage or mounting, per annum. Peace only.
Dubbing ... ... lbs.	$\frac{1}{2}$
Flannelette ... ... yds.	11
Linen, or cotton, old ... ... lbs.	3
A.O. 98 1913 Oil, mineral, burning* ... ... pts.	$\frac{1}{2}$
Oil, lubricating, G.S. ... ... „	8
Soap, yellow ... ... bars	4
Turpentine ... ... pts.	1

The following will be allowed to each store in which machine guns are kept or dealt with, and will be replaced when necessary :—

Flannel (old blanket is very effective)	1 square yard.
Wick, common†	8 ozs.
Twisted copper wire	1 rod, 42 inches long, of wire, 0·1-inch diameter in a double twist.

128A. One Maxim gun per unit may be stripped to afford the men of machine gun detachments opportunities of becoming thoroughly acquainted with the mechanism and working of the gun. Detachments provided by units of R.G.A. allotted to machine guns of coast defences will carry out the stripping in the presence of an officer who has passed the machine gun course at one of the various schools of instruction.

A.O. 388 1913

In other cases the stripping must be carried out in the presence of an officer who has passed the machine gun course at Hythe, or of a N.C.O. who has passed the Enfield course.

Guns must not be stripped more often than is absolutely necessary for the instruction of the detachments. Only one of the guns of a unit may be stripped, and the fact noted on the history sheet of the gun.

129. One "screen, manœuvre," will be supplied on demand to each regiment of yeomanry. This screen will be accounted for in the equipment ledger of the unit.

* Local purchase should be authorized by the C.O.O. when the quantity issuable is less than the minimum quantity for which carriage is charged by the railway company.

† Army Service Corps supply.

SECTION VII.—CAMP EQUIPMENT.

130. Camp equipment will be issued free for all camps which have been approved by the G.O.C.-in-C.

The cost of transport both ways will be debited against the special money grant for training the Territorial Force. Carrier's notes will be endorsed "Training Grant, Territorial Force,——— Command."

131. The proportions of all articles of camp equipment and intrenching tools to be demanded, except for manœuvres, are laid down in Table 6. Indents for camp equipment will be prepared on A.F. G 968, in triplicate, and sent to the C.O.O. by C.Os. as early as practicable, and not less than 21 days before the formation of the camp, in order to give time for checking and supply. As soon as the indents have been passed by the C.O.O., the triplicate copies will be returned to units. C.Os. will estimate as exactly as possible the number of men who are likely to take part in the encampment, and if any tents or other equipment are found to be surplus to the approved accommodation after the camp has been formed, the tents, if pitched, will be struck, and repacked in their valises, and the matter will be reported to the C.O.O. of the administrative area, who will give instructions regarding disposal of the tents and other surplus stores. 8 Equip. 445

The scales of camp equipment authorized for the various branches of the service are sufficient to meet the ordinary requirements, and no other article in excess of these scales will be allowed, unless the authority of the G.O.C.-in-C. has been previously obtained through the C.O.O.

132. For manœuvres, camp equipment will be issued in accordance with the scales laid down in Tables 8, 9, 10 and 11, provided in the case of stores issued under Table 11 the provisions of paragraph 148 are fulfilled.

133. Issues of camp equipment in excess of the authorized proportions will only be made when circumstances exist which, in the opinion of the G.O.C.-in-C., are so exceptional in character as to render additions to the normal scales essential. Blankets in excess of authorized scales will only be allowed on the certificate of the D.D.M.S., that they are necessary for the health of the troops. Written authority to issue will in all such cases be given to the responsible C.O. 8 Equip. 445

134. C.Os., in demanding camp equipment, will, with a view to economy in transport, and to obviate charges for losses and damage to articles not used by them, exercise their discretion as to whether all articles allowed should be demanded: *e.g.*, camp kettles will not be required when private cooking apparatus is used; the full

Digitized by Google

proportion of intrenching tools will not be required when the soil renders it unnecessary to intrench the tents ; picketing gear will not be required when stabling is hired for horses. Information on these points should be obtained before putting forward indents.

8 Equip. 445 When stoves, Soyers, are demanded as allowed by Table 6 , steps will be taken to ensure that a supply of coal is available for use with them. The use of wood fuel with these stoves is prohibited.

135. Wood bottoms for circular tents for officers and men, or for marquees used for hospital purposes, may be issued, when, owing to the dampness of the ground or to other causes, their use is certified by the D.D.M.S. of the command to be necessary. It should be remembered that their provision should be the exception and not the rule, as waterproof sheets should generally suffice.

A.O. 98 1913 Tent bottoms will not be supplied for store, office or workshop tents of units.

136. For camps where there is an ordnance depôt, the equipment will be drawn from, and returned to, such depôt. The officer drawing the equipment will arrange for the necessary transport between the depôt and the camping ground, both when drawing and returning the equipment. A responsible representative of the unit must attend at the depôt to take over the equipment ; he will give a temporary receipt for it directly he has drawn it.

8 Equip. 445 When the stores are returned to the camp ordnance depôt, a representative of the unit should attend and obtain a temporary receipt on a triplicate copy of the voucher which will be marked "subject to examination for damages," if there is no time to examine the stores.

136A. When stores are sent by rail (both issuing and returning), "Truck Notes" will be prepared by the consignor for each railway truck, in triplicate ; one copy to be affixed to truck, one sent to consignee, and one retained by consignor.

136B. When it is not possible for a representative of the unit to take over the stores, the vouchers and A.F. G 973 will be forwarded when possible, so as to reach the unit three clear days before the opening of the camp, and they should be handed over to advance parties for the purpose of checking stores.

136C. The stores charged on the vouchers should be checked directly the consignment has been delivered. Should any discrepancies be found to exist, they will at once be reported to the O.O. who made the issue. Discrepancies should be reported within 48 hours of the delivery of the consignment. Any information which will assist the O.O. in tracing the deficiencies, such as packages having been received broken, or a bundle delivered short, should be given on the report. No remarks regarding discrepancies should be made on the vouchers, but must be reported on a separate paper. When there is no discrepancy, the vouchers should be completed in right-hand top corners, and the duplicate copy signed and returned to the O.O. at once. The receipted voucher (unless a discrepancy has been reported) should be sent off within 48 hours of the delivery of the consignment.

Digitized by Google

137. A.F. G 973, which will be given to the officer drawing the first issue of camp equipment by the O.O., will be used to record all transactions of receipt and return of camp equipment. On the opening of a camp, as soon as the vouchers have been checked with the stores, the receipt will at once be entered under their appropriate headings on the first line of the form, and any subsequent transactions will be duly entered on the date upon which they occur. Under no circumstances will this form, which is a ledger account, be merely filled in at the termination of the encampment.

At the close of the encampment, when the stores have been returned, the camp equipment account will be balanced and forwarded, with all supporting vouchers, to the C.O.O. of the area in which the issues were made, irrespective of the locality of the ordnance depôt to which the stores may have been returned. This officer will have the account examined and compared with the accounts of the O.Os. by whom the issues were made. Should any questions arise, they will be decided by the C.O.O. after communication with the C.O.

137A. Ammunition received during periods of encampment will not be accounted for in camp equipment accounts.

8 Equip. 445

138. At encampments where local conditions or circumstances render it impossible, or, in the opinion of the G.O.C. undesirable, to dig trenches for latrine purposes, and the dry earth closet system has to be specially resorted to, latrine buckets may be issued in the following proportions to the contractor engaged to remove the soil :—

For officers ...	...	20 per cent. of number of officers encamped.
For other ranks	...	10 per cent. of number of other ranks encamped.

These numbers are regarded as sufficient to meet requirements for both dry earth closets and urinals. The number of buckets and scoops required should be included in the indent referred to in paragraph 131.

8 Equip. 445

The name and address of the contractor will be furnished to the C.O.O. 14 days prior to the date of encampment in order to consign the buckets to him.

The conditions to be fulfilled by the contractors with regard to collection, disinfection, cleaning, repairing and re-delivering these buckets will be found detailed in the "special conditions of contract" embodied in a tender form approved by the Army Council, and issued to G.Os.C. to govern local contracts in connection with the dry earth closet system in encampments.

Latrine paper will be demanded as laid down in the Allowance Regulations.

8 Equip. 445

139. Horse shoes and nails may be drawn from the A.O.D. in the proportion not exceeding 10 sets of shoes (with 40 nails per set) for every 100 horses present at the annual training in camp ; they will be entered in the camp equipment account (A.F. G 973).

9 Gen. No. 3627

Digitized by Google

9
Gen. No.
3627

An expenditure not exceeding—

5 per cent. shoes and 10 per cent. nails ... ... } For units other than heavy batteries R.G.A.

10 per cent. shoes and nails ... For heavy batteries R.G.A.

will be allowed, free, for horses encamped, upon a certificate from the C.O. of the unit that the shoes and nails have been necessarily utilized, during the period of the camp, in shoeing horses hired for and employed upon military duties. This certificate must accompany the camp equipment account as one of the supporting vouchers referred to in paragraph 137.

The unexpended balance will be returned to the A.O.D. at the termination of the camp. The value of any shoes and nails expended in excess of the percentages mentioned above will be claimed from County Associations concerned.

8
Gen. No.
3627

140. Wooden tent pins not exceeding 5 per cent. of the number issued may be written off as expended by fair wear, if such expenditure has actually taken place.

141. All deficiencies other than those mentioned in the preceding paragraph must be paid for unless the authority of the G.O.C.-in-C. is obtained to write them off as a charge against public funds.

No charge will be made for damages due to fair wear and tear, but the value of such damages as are obviously wilful or due to culpable negligence will be recovered from the unit concerned. Claims for such damages will be prepared in the manner directed in the Regulations for Army Ordnance Services, Part I, and submitted to the secretary of the County Association for settlement.

8
Equip.
445

141A. C.Os. should arrange for all questions of losses, damages, etc., for which it is necessary to obtain the authority of G.O.C.-in-C. for writing off as chargeable to the public, or otherwise, to be reported as soon as they occur to the C.O.O. of the area in which the camp is situated. When there is any suspicion that the losses are due to theft, the civil police should be informed at once. The report should consist of A.F. G 998 duly completed, corroborative statements of evidence, and the opinion of the C.O., all in duplicate. This applies to cases dealt with under paragraph 668, King's Regulations. Camp equipment accounts are adjusted by the A.O.D. on A.F. G 973, and claims submitted for payment accordingly.

142. Shortly before the termination of the camp the C.O. will arrange for an inspection of the whole of the camp equipment in his charge and the investigation (if necessary by a regimental board) of all cases in which articles are found to be damaged or deficient.

When it is possible to trace to individuals the responsibility for the damages or deficiencies the C.O. will estimate the cost of repair or replacement and take steps to recover the amount from the individual or individuals responsible. (See also paragraph 18.)

143. Tents should not be struck before 10 A.M., otherwise serious damage may be caused to them by dew. Articles of camp equip-

Digitized by Google

ment which have become wet while in use will be thoroughly dried and cleaned, as far as possible, by the troops, before being returned into store. When a camp is broken up in wet weather, and the O.O., or, in his absence, the C.O., is of opinion that the tents should not be struck nor other articles of equipment be taken over in a wet state, a detachment will be left behind until the articles are in a proper condition to be returned into store. This detachment will consist of permanent staff only; or of such men as may be willing to remain, if a larger detachment be thought desirable.

143A. After striking camp, the stores will be carefully checked, and the numbers of each item compared with the numbers on charge as shown in A.F. G 973, any surpluses and deficiencies being noted at the time to save subsequent correspondence.

143B. The vouchers recharging the stores to the A.O.D. should be lists of stores actually returned, and not copies of the issue vouchers. They should, if possible, be in possession of the A.O.D. when stores arrive.

8
Equip.
445

143C. Credit can only be given for the equipment actually returned to store. Any articles found afterwards on the camping ground are brought on charge in A.O.D. accounts by certificate receipt voucher. No claim on these surpluses can be recognized, and credit on account of them will only be admitted if approved by the G.O.C.-in-C.

144. The following instructions will be observed when handing over stores on the closing of a camp:—

(a) When Stores are handed into an Ordnance Depôt at the Camp.

(1) Each unit will be allotted a space at the ordnance depôt on the camping ground, in which its stores will be laid out for handing over to the A.O.D.

(2) Paillasse and bolster cases (after being emptied of straw), blankets and waterproof sheets will be laid out flat, in piles of any height; they will be checked off and tied in bundles when being taken over by the O.O.

(3) Camp kettles will be packed in the cradles in which they were issued.

(4) Tents will be left in the valises and stacked in piles, except as stated in (8).

(5) Pin bags will be emptied and laid out flat in heaps of 20 or less, as may be convenient.

(6) Marquees will not be securely tied up, as they will have to be examined to check over the various parts, &c.

(7) Axes, mallets, tent poles, spades, and other small stores will be collected and placed so that they can be readily counted.

(8) In wet weather arrangements will be made for handing over at the depôt, blankets, paillasses, bolsters, waterproof sheets, pin bags, and all other damageable stores, in a store tent which will be told off to each unit on the morning of the day of the termination of the camp, but all tents will be left standing.

Digitized by Google

(b) When Stores are not handed over at an Ordnance Depôt at the Camp.

(1) As far as possible stores will be returned in the same cases or vats as those in which they were received; each package will be labelled and clearly addressed to the O.O. Bundles will be securely tied, in at least two places, with spun yarn.

(2) Blankets will be rolled lengthwise in bundles of 20, and fastened near each end with spun yarn; paillasse cases, &c., and waterproof sheets (unless packed in cases or vats) in similar bundles of 10. Buckets, tubs and pails will be nested five together and fastened with yarn; camp kettles will be packed in cradles (five each). Bolster cases will be packed (200) in a paillasse case. Tents will be in valises, pins and mallets in pin bags, which will be placed in the valises in the case of C.S.L. tents, poles tied in sets; the loose parts of Soyer's stoves and vehicles will be firmly secured with spun yarn.

8 Equip. 445

(3) A packing note giving contents signed by packer and witness is to be placed in each box or case.

(4) The labels should clearly show the name of the unit and station from which the stores are returned. The reverse side of the label (A.F. G 1025) originally sent with the stores can be used for returning them.

8 Equip. 445

(c) When a Camp is handed over standing from one unit to another.

The C.O.O. will detail a representative of the A.O.D. to witness the transfer, and to assess, as a charge against the outgoing unit, the cost of any damage done to the camp equipment not due to fair wear and tear.

FIELD HOSPITAL EQUIPMENT.

145. When regiments are encamped for training at places where no hospital building is available, field hospital equipment, as specified in Table 12, will be demanded on A.F. G 968 when required.

This equipment will be accounted for in the camp equipment account, A.F. G 973, in the manner laid down in paragraph 137.

145A. Cleaning and washing materials will be issued upon the written authority of the G.O.C.-in-C. The quantities issued should not exceed those authorized in the Hospital Schedules for hospitals generally.

A.O. 25 1913

MEDICAL AND SURGICAL EQUIPMENT.

146. Medical and surgical equipment as laid down in Table 12 will be supplied to each camp at the commencement of training, at stations where no military hospital is available.

Deficiencies and damages will be dealt with as directed in paragraph 225.

147. M.Os. will see that the equipment issued under paragraph 146 is properly packed and duly returned to store at the termination of training. When the equipment is returned to store, each article will be accompanied by an invoice or duplicate list of contents, in which damages, deficiencies, and expenditure will be

Digitized by Google

carefully recorded. This document will be signed and dated by the M.O. in charge of the equipment, and placed inside the article as a voucher.

FIELD BAKERY EQUIPMENT.

148. When bread for consumption by the troops is actually baked in camp by A.S.C. units of the Territorial Force, field bakery equipment may be issued in the proportions detailed in Table 11.

VETERINARY EQUIPMENT.

149. The following veterinary stores will be supplied to mounted units at the commencement of training, and will be returned on its conclusion :—

One veterinary officer's wallet per V.O.

One T.F. unit chest ... } Per regiment of Cavalry, brigade of Artillery, Divisional Engineers (2 Field Companies and 1 Signal Company), and Divisional T. and S. Column.
One farrier's wallet ... }

Smaller mounted units when training at camps away from their headquarters will be supplied with one T.F. unit chest and one farrier's wallet.

A.O. 118 1914

Veterinary Officers' wallets will not be demanded unless a V.O. is present with the unit.

Indents on A.F. G 997 will be sent to the Officer i/c Army Veterinary Stores, Woolwich Common, through the A.D.V.S., in time to enable the equipment to be issued 7 days prior to date of encampment.

150. In case of very urgent extra requirements during the period of training, telegraphic indent should be submitted to "Veterinary Stores, Woolwich."

SECTION VIII.—SMALL-ARM AMMUNITION.

153. Service small-arm ammunition will be held during peace for N.C.Os. and men on the authorized establishment of units in the following proportions. It will not be held for supernumeraries other than those enrolled for service in the Special Reserve.

Unit.	Cartridges, small arm, ball, ·303-in. cordite.	
Yeomanry	100	Per rifle.
Royal Engineers (all units) ...	50	
Infantry—		
Staff-serjeants	25	
Pioneers	20	
Other ranks, except drummers and buglers	100	
Army Service Corps	20	
Royal Artillery (all units)	20	Per N.C.O. and man.

A.O. 47 1912

Digitized by Google

154. Service ammunition will also be held for machine guns in the following proportions :—

Regiments of yeomanry and cyclist battalions of infantry...	3,500	Rounds per machine gun.
Battalions of infantry other than cyclist battalions	4,000	

155. Care will be taken that the authorized proportions of service ammunition are, at all times, maintained in a condition of completeness.

On mobilization, additional ammunition will be drawn as directed in paragraph 239.

A.O. 276 1912 **156.** The following quantities of small-arm ammunition are allowed annually for practice and exercise, subject to the conditions in paragraph 159.

A.O. 165 1913 Ammunition surplus from rifle practices is not to be fired in machine guns in addition to the allowances authorized by paragraph 158.

		Cartridges, small-arm.		
		Ball, ·303-inch.	Blank, ·303-inch. Mark V.	Aiming tube.
9 Yeo. 228	For each of the following ranks :—			
A.O. 248 1913 A.O. 276 1912 A.O. 98 1913	(*a*) Officers (including adjutants), N.C.Os. and men, except motor cyclists and N.C.Os. of the permanent staff in the — Yeomanry	90	55	25
	— Royal Artillery—coast defence companies ...	20	...	...
	— Royal Engineers— Field companies (except drivers) ...	90	10	25
	— Field companies (drivers)	40	10	25
	— Other than field companies	20	...	...
	— Infantry...	90	55	25
9 Yeo. 228	— Army Service Corps ...	20	...	...
	(*b*) For N.C.Os. of the permanent staff in the — Yeomanry	150	55	25
	— Royal Engineers— (field companies) ...	110	10	25
9 Arty. 1358	— Infantry	150	55	25
	(*c*) Royal Artillery units per rifle (except coast defence companies)	20	...	...

157. The following quantities of small-arm ammunition may be drawn annually for each Territorial Reservist (officer, N.C.O.,

Digitized by Google

or man) attached to a unit in which musketry training is compulsory for men serving in the Territorial Force :—

	Cartridges, small-arm, ball ·303-inch.
Yeomanry	20
Royal Engineers (field companies) ...	20
Infantry	20
Other units	10

The O.C. the unit will certify that the number of rounds drawn has actually been expended at range practice during the year by the reservist for whom they were drawn.

158. In addition to the above, practice ammunition for use with machine guns will be allowed annually, as follows :—

Unit.	Rounds.	
	Ball.	Blank.
For a regiment of yeomanry or battalion of infantry ...	2,800	1,000

Ammunition surplus from rifle practices is not to be fired in machine guns in addition to the allowances authorized above. A.O. 165 1913

159. To avoid delay in beginning the annual course of musketry instruction, small-arm ammunition may be issued by the A.O.D. in the proportions laid down by paragraphs 156 and 158. The amount of ammunition which the unit is entitled to expend during any year (1st November to 31st October) will be determined as follows :—

(i.) *In the case of yeomanry, R.E. (field companies) and infantry.* A.O. 98 1913

By the number of officers, N.C.Os. and men qualified during that year. The expense vouchers by which the ammunition is written off charge should contain a statement, signed by the C.O., of the number of officers, N.C.Os. and men that have qualified during the year, and a certificate that the quantity of ammunition written off charge agrees with that recorded as "expended" in the statement which accompanied the musketry return (paragraph 160).

(ii.) *In the case of all other units.* A.O. 98 1913

By the number of rounds, within the approved annual allowance, that have actually been fired. Expense vouchers must contain a certificate, signed by the C.O., that the number of rounds written off as expended agrees with the statement

Digitized by Google

of ammunition expenditure rendered to the G.O.C.-in-C. under paragraph 160.

Any ammunition drawn in excess must be paid for unless unexpended, in which case it should be returned to store or deducted from the demand for the ensuing year.

A.O. 276 1912

160. A statement must be rendered on the Annual Musketry Return showing how the whole of the ammunition has been disposed of. The figures shown in this statement must accord with those recorded in the diary of ammunition expended, A.B. 218. This book must be produced for audit when required.

161. Subject to any special orders which may from time to time be issued from the War Office, the small-arm ammunition to be expended at practice and exercise will be taken from that already in possession of troops as service ammunition, and that received from A.O.D. for practice in the following order :—

(i) The contents of broken boxes, viz., boxes, the tin linings of which have been opened.

(ii) Ammunition re-bundled or re-packed at stations other than Woolwich.

(iii) Ammunition examined and re-bundled at Woolwich, the original date of which is not known. Boxes containing this ammunition bear the words "EXAMINED (year)" on the labels. This ammunition will be used up in the order of the date of examination.

(iv) Ammunition examined and re-bundled at Woolwich, the original date of which is known. Boxes containing this ammunition bear the original date of the ammunition, with the addition of a white label (placed diagonally across the old label) on which are the words "EXAM (year) SERV^{ble}." This ammunition will be used up in the order of the date of manufacture.

(v) Ammunition not specified above ; the oldest date of manufacture being used first.

Specimens of the labels used in the cases referred to in sub-paragraphs (iii), (iv) and (v) above, will be found in Appendix IX.

Aiming tube ammunition and blank ·303-inch ammunition will be expended at practice in order of the priority of date of manufacture.

The linings of boxes are not to be disturbed until the ammunition is actually required for use.

A.O. 248 1913

162. Pistol ball ammunition, at the rate of 12 rounds per pistol annually, may be drawn for all ranks armed with that weapon in time of war who commence the prescribed course.

(For adjutants of the Territorial Force see paragraph 163.)

Digitized by Google

163. Pistol ammunition may be drawn annually in the following proportions for adjutants of the Territorial Force who commence the prescribed course :— A.O. 248 1913

	Ball.	Blank.
Yeomanry	75	20
Royal Artillery...	75	10*
Royal Engineers	50	10*
Infantry	50	...
Army Service Corps	50	10
Royal Army Medical Corps	50	...

A.O. 248 1913

* Mounted units only

164. Small-arm ammunition of the following descriptions :—

·303-inch ball ;
·303-inch blank ;
·22-inch, or ·23-inch aiming tube ;

issuable gratuitously for practice and exercise may be commuted, within those descriptions, provided the following conditions are fulfilled :—

(*a*) Sufficient ball ammunition to allow of the standard test prescribed in Musketry Regulations, Part I, being fired, must be reserved for the purpose, except in the case of recruits who in their first year of service, may, in accordance with the Territorial Force Regulations be permitted to fire the whole of their musketry course with miniature ammunition.

Units which do not fire the standard test in their musketry course, and for which no open or 30 yards ranges are available, may commute the whole allowance of ball ammunition for aiming tube ammunition, provided that they are possessed of apparatus for firing miniature ammunition of which no free issue will be made.

(*b*) The commutations proposed, and the proportion of the authorized scale to be commuted, must be approved by the G.O.C. the division, the mounted brigade commander or the commander of coast defences as the case may require. A certified copy of the authority for the commutation should be annexed to the expense vouchers on which the ammunition is written off charge. A.O. 276 1912

(*c*) The money value of the ammunition to be drawn by commutation must not exceed the money value of the ammunition to be surrendered.

(*d*) The commutation must be effected prior to the completion of the supply of gratuitous ammunition for the year ; ammunition once issued cannot be again received into store for commutation.

Digitized by Google

9 Yeo. 228

165. Blank ·303-inch small-arm ammunition, not exceeding 20 rounds per man per annum, in addition to the proportions allowed under paras. 156 and 158 will, if required, be issued gratuitously to units encamped with regular forces.

Any portion of this allowance unexpended at the close of the encampment will be returned to the nearest A.O. Depôt.

166. C.Os. will be allowed to purchase on repayment at the reduced rate of £4 per 1,000 rounds, such quantities of ·303-inch ball ammunition as will not exceed in the aggregate 10 rounds per annum for each enlisted member. Chargers issued with ·303-inch ammunition will be charged for at vocabulary rates.

167. C.Os. are permitted to purchase on repayment from the A.O.D. such quantity of small-arm ammunition, in addition to that fixed by paragraph 166, as may be required for regimental purposes. Ammunition and chargers will be charged for at vocabulary rates.

168. Indents for the gratuitous supply of small-arm ammunition will be made out on A.F. G 812, for the whole amount required by the units during the current year (reckoned as in paragraphs 156 and 158), and must be rendered not later than the 1st December to the C.O.O.

169. All small-arm ammunition not drawn by the 31st October will be forfeited and any remaining unexpended will be reckoned as part of the supply for the ensuing year, and will be shown in the indent for that year as "in hand."

170. Ammunition gratuitously supplied will be forwarded, free of cost, to the headquarters of the unit or to the authorized drill stations of outlying detachments.

The carriage of ammunition, and of empty packages and fired cartridge cases, between the units' storehouses and the ranges will not be defrayed from army funds.

171. C.Os. will not draw at one time a greater quantity of practice ammunition than can be kept in safety until required for use, but, whenever local conditions for safe storage permit, they will draw in one consignment the whole allowance of ammunition for the year.

A.O. 98 1913

172. Should the paucity of storage accommodation render part issues compulsory, a memorandum giving particulars of the detailed consignments must accompany the indent. Every care must be taken to ensure that the annual allowance is not unnecessarily sub-divided into part consignments. If any disregard of this instruction is observed, the excess cost incurred in transport will not be allowed as a charge against army funds.

173. A charge will be admitted against the public for any necessary transport of ammunition of oldest date, which in the course of the turnover, referred to in paragraph 161, has to be transferred to the authorized drill stations of outlying detachments from the place of storage of the service ammunition.

Digitized by Google

The carriage of ammunition supplied on payment will not be defrayed from army funds (see paragraph 15).

174. O.Os. are instructed to issue ammunition of the earliest manufacture in their magazines for the free supply, and for issues on repayment at reduced rates. For purchases at full vocabulary rates, ammunition of late date will be supplied.

175. Os.C. units will be held strictly responsible for the safe keeping and proper issue and use of all government ammunition, whether issued gratuitously or supplied on repayment for their use.

176. Where no specially provided accommodation is available for storage, small-arm ammunition in service packages may be stored to an unlimited amount in a "small-arm ammunition lock-up," consisting of any substantially constructed building, or in any room, cupboard, or other compartment, in such a building, provided the following conditions are fulfilled, viz. :—

(1) The lock-up must be free from easily inflammable material (*i.e.*, it must not be constructed of matchboarding or other such material) and must be subject to no undue risk of fire. Provided these conditions are fulfilled, it is not necessary that the lock-up should be detached from other buildings. A.O. 98 1913

(2) The lock-up must be in charge of a responsible person, must be kept scrupulously clean, and devoted exclusively to such storage.

(3) The safe custody of the ammunition must be provided for at all times, and Os.C. will be responsible that the places selected are suitable in all the above respects.

177. Ammunition supplied gratuitously from government store may not be sold to any member of the unit or association, nor may it be used for any purpose other than the authorized practice for which it has been issued.

The sale, exchange, or gift of government ammunition outside the unit or association to which it has been supplied is also prohibited.

It is to be understood that any transaction of such a nature (except under orders from the War Office) is illegal and will render the parties concerned liable to proceedings at law.

178. The use in service arms of any ammunition (whether ball, blank or dummy), other than that obtained from the A.O.D., is forbidden.

179. When troops, at the termination of a field day, are to return by railway to their headquarters, their arms will be examined, and all the ammunition which has not been expended will be collected from the men and placed in a metal cylinder, or metal-lined case, for conveyance in safety to the headquarters of the unit to which it belongs. C.Os. will be held responsible that this regulation is strictly carried out. Cases and cylinders will be issued on repayment, on indent for the same being made to the C.O.O.

Digitized by Google

180. Small-arm ammunition in charge of units will be examined by the I.O.O. only when it is considered necessary by the A.D.O.S. or C.O.O.

When an inspection has been arranged, the O.C. the unit will forward a statement, in duplicate, of the ammunition in his charge to the A.D.O.S. or the C.O.O. A.F. G 803 will be used for this purpose, and columns 1 to 5 should be carefully completed in accordance with the instructions given on the form ; columns 6 to 11 will be completed by the I.O.O.

A O. 276 1912

On completion of the inspection, the report will be returned by the I.O.O. through the A.D.O.S., or the C.O.O., to the O.C. the unit, for transmission through the headquarters of the command to the Chief Inspector, Woolwich.

181. Should any defect be discovered in ammunition supplied by the A.O.D., full particulars should be furnished to the C.O.O. of the area.

RETURN TO STORE.

183. When small-arm ammunition boxes, metal-lined cases, powder-barrels, metal cylinders, or other packages are to be returned to store, C.Os. will as far as possible return them to the ordnance depôt from which they were issued.

184. When returning small-arm ammunition into store, Os.C. will apply to the nearest transport officer for instructions as to its mode of conveyance, specifying the number of small-arm ammunition boxes or half and quarter barrels to be conveyed.

185. The printed address labels on the barrels, &c., will not be removed. If any are accidentally defaced or removed, the official designation of the unit will be marked on each package.

186. When ammunition barrels and cases, whether full or empty, are to be returned to the government stores, they will be carefully examined to see that they are free from tacks, dirt and grit. Instructions will be given to the persons by whom such barrels are to be conveyed to keep them free from dirt and grit, during their transit. Address cards will be fixed to the barrels by means of paste or string, and not by tacks or nails.

187. Ball and blank ammunition must not be packed together in the same package.

188. The fired cases of small-arm ball and blank cartridges supplied gratuitously will be brought on equipment ledger charge by certificate receipt voucher by weight in the proportions shown below, and returned each accounting year to the A.O.D. The cost of carriage will be borne by army funds (see paragraph 32).

A.O. 276 1912

Nature of ammunition.	Weight to be brought to account per 1,000 rounds expended.
	lbs.
·303-inch ball	24
·303-inch blank	12
Pistol, Webley, ball and blank... ...	9

Digitized by Google

189. The rates to be charged for any deficiencies in the above proportions for ammunition supplied gratuitously, and amounts to be refunded to units returning fired cases of ammunition supplied on payment, will be governed by the rates included in the "Statement of prices obtainable at the Royal Arsenal to guide disposal of produce, &c." (published half-yearly by the D.D.O.S., Royal Arsenal, Woolwich). These rates will be notified in command or district orders.

The number and date of the ordnance voucher on which the cartridges were received should be quoted on the voucher charging the value of the empty cases. Charges and refunds under this paragraph will be dealt with by the command paymaster. A.O. 165 1913

190. When empty cases from ammunition supplied on repayment are returned to store, the cost of carriage will not be defrayed from army funds.

191. The cases will be returned to store in the empty ammunition packages, not oftener than once a quarter, and C.Os. will not return a less weight than that representing 1,000 cases, except in the last quarter of the accounting year, when the outstanding balance, whatever it may be, will be sent in on 31st October or as soon as possible thereafter, in any case not later than 30th November. The cases must be in good condition when returned, care being taken that grit and dirt are removed beforehand, and that no live cartridges are included with them. A.O. 276 1912

192. Each package will contain a packing note on A.F. G 904, showing the rank, name, and unit of :—

(*a*) The person by whom the cartridge cases were sorted and packed.

(*b*) The responsible individual by whom the supervision of the sorting and packing operations was carried out.

If live cartridges are found in any of the packages, the matter will be reported to the G.O.C.-in-C., for such action as he may consider desirable.

193. The foregoing general instructions apply equally to the chargers issued with charger, packed, ·303-inch ball ammunition.

The chargers will be written off charge by numbers at the same time as the expended ammunition and brought on charge by weight by certificate receipt voucher with the fired cases. The weight to be brought to account in respect of each 1,000 chargers will be 25 lbs.

Vocabulary rates will be employed in calculating :—

(*a*) Charges for deficiencies.

(*b*) The sums to be refunded to units for chargers returned from issues of ammunition on repayment, provided the chargers are serviceable upon receipt from the troops by the A.O.D. No refund will be made in the case of unserviceable chargers.

The cardboard boxes employed for ·303-inch· charger packed ammunition should be disposed of locally. A.O. 276 1912

Digitized by Google

A.O. 165 1913

194. An allowance at the rate of 10*s.* per 100 lbs. of fired cartridge cases will be paid by the command paymaster for the labour of collecting and sorting cases and chargers obtained from ammunition supplied gratuitously. The G.O.C.-in-C. may, in addition to disciplinary action, direct that this allowance be withheld or refunded to the public when live cartridges are discovered in packages purporting to contain fired cases only.

SECTION VIII a.—BICYCLES.

198. A bicycle may be issued from the A.O.D. for each member of the permanent staff of cyclist battalions.

54 Gen. No. 850

199. Clips, rifle, bicycle, butt and fore-end, at the rate of one each, per bicycle, may be issued to cyclist battalions as public equipment.

200. A.B. 388 will be kept by each unit in possession of government bicycles and the instructions contained therein will be strictly adhered to. Os.C. units will render abstracts from this book to the Chief Inspector of Small-Arms (through the A.D.O.S.) as may be called for.

8 Equip. 386

201. Detailed instructions regarding the care, preservation and repair of government bicycles are contained in the Handbook on Military Bicycles (a copy of which will always be carried in the tool bag of the bicycle to which it belongs) and will apply to all government bicycles.

202. N.C.Os. of the permanent staff in possession of the certificate referred to in King's Regulations, will, for the purpose of these instructions, be considered as having the same qualifications as certificated armourers.

203. In order to fix responsibility for loss or damage, transfers of bicycles between individuals will be recorded in this book.

(*a*) Any loss or damage should be immediately reported by the rider concerned. The decision as to the cause of the loss or damage will be recorded in A.B. 388, and will be supported by the signature of an officer.

(*b*) N.C.Os. in possession of a certificate granted by the Chief Inspector of Small-Arms or by the Commandant, Ordnance College, as having passed a course of instruction in the repair of bicycles will carry out repairs to the bicycles on charge of the unit to which they are attached, except repairs which necessitate brazing or stove enamelling, for which services bicycles should be returned to Portsmouth for the Southern Command, and to Woolwich for all other commands and districts.

When the services of a qualified N.C.O. are not available, arrangements will be made with the C.O.O. of the area for any necessary repairs to be carried out.

(*c*) Units in possession of government bicycles (and provided with a certificated N.C.O.) may keep up a stock of components and material for repair, which will be accounted for in A.B. 388. No one article must exceed one shilling

Digitized by Google

in value, and the total value of such stock must not exceed five shillings per bicycle on charge.

Indents for the maintenance of these stocks will be submitted as directed in paragraphs 9, 10 and 12.

When extensive repairs are necessary and the stock of components is inadequate to meet requirements, intermediate indents will be submitted.

Only such components as are supplied by the A.O.D. will be used in the repair of government bicycles. Local purchase is prohibited, except in the case of repair outfits which will be purchased locally by units on the authority of the C.O.O.

(*d*) Qualified N.C.Os. will examine monthly and clean all government bicycles on charge.

204. Government bicycles will be periodically inspected by the Chief Inspector of Small-Arms, and after every such inspection a report showing the repairs necessary to put the bicycles in a serviceable condition will be forwarded to the O.C., who will subsequently forward a certificate to the Chief Inspector of Small-Arms, through the C.O.O. of the area, to the effect that the repairs shown thereon have been carried out.

204A. Instructions for marking bicycles are given in Appendix XI. First issues of bicycles from store will have corps marks added by the A.O.D. before issue, units giving the necessary marking particulars on their indents.

205. The following scale of materials for lighting, cleaning and lubricating each government bicycle on charge of cyclist battalions will be issued free, once per annum :—

Section No. 9a.

Oil, lubricating, G.S.	pints	1
Tallow	lbs.	1

Section No. 13c.

Cotton wool (for replenishing lamps)...	oz.	1

8 / Equip. / 436

Section No. 21b.

Brushes, bicycle		1

N.I.V.

Linen, old	lbs.	1½
Oil, paraffin * for cleaning purposes	quart	1
Oil, paraffin * for replenishing lamps	„	1

8 / Equip. / 436

206. Lamp oil and wick will be obtained from the officer in charge of barracks.

207. A set of tools as detailed below will be issued for use at the headquarters of each cyclist battalion :—

Section No. 7.

Brushes, hair, flat—		
1 inch		1
½ „		1

* Local purchase should be authorized by the C.O.O. when the quantity issuable is less than the minimum quantity for which carriage is charged by the railway company.

SECTION IX.—ARTILLERY EQUIPMENT.

211. Instructions relating to artillery equipment, together with details of the peace and war equipment of R.A. units, are issued separately.

SECTION X.—ENGINEER EQUIPMENT.

213. Instructions relating to engineer equipment, together with details of the peace and war equipment of R.E. units, are issued separately.

SECTION XI.—ARMY SERVICE CORPS EQUIPMENT.

216. The following articles will be supplied to each A.S.C. company for the purposes of peace instruction and training :—

Wagons, ammunition and store, R.A. fitted for pole draught—2.

Details of the number of sets of harness, saddlery and pack-saddlery to be maintained for these units are contained in Table 13.

217. The tools detailed in Table 24 may be issued as public equipment to each A.S.C. company to enable artificers to execute such minor repairs as become necessary whilst units are on the march or in camp.

218. 1 jack, lifting, G.S., will be supplied to each A.S.C. company for use when washing or lubricating the wheels of vehicles on charge.

Digitized by Google

SECTION XII.—R.A.M.C. EQUIPMENT.

222. Stores for instruction and training may, if required, be issued in the proportions detailed in Table 25.

223. The value of all non-consumable articles found deficient at each annual inspection will be claimed from the County Association.

224. Scales of medical and surgical equipment for peace and war are laid down in Table 26. The peace equipment will always be in possession of the unit and will be available for instructional purposes. It will be accounted for by the M.O. in charge of the unit on A.F. I 1234, which will be rendered annually, in January, to the War Office, through the A.D.M.S. of the division and the D.D.M.S. of the command. A.O. 71 1912

A duplicate copy of A.F. I 1234 will be retained by the accounting officer, together with copies of all observations and correspondence regarding the account, and will be available for examination by the local auditor of the command.

225. Articles lost or rendered unserviceable other than by fair wear and tear will be dealt with on A.F. I 1230, in accordance with the King's Regulations. When the cost of such articles is not chargeable to the public, the value will be credited to the public in the accounts of the command paymaster on A.F. O 1680, a copy of which will be attached to the account as a voucher for writing the deficiencies off charge. The authority for writing any article off charge will be quoted in and will accompany the account. A.O. 165 1913

226. A.Ds.M.S. of divisions will arrange for the equipment to be inspected annually, in January, by a M.O.—if possible, not the accounting officer. A.O. 71 1912

227. Articles required to complete the equipment will be demanded on A.F. I 1209 in duplicate, which will accompany A.F. I 1234 annually, or at such other times as may be found necessary. These demands will be carefully examined by the D.D.M.S. of the command, who will see that only the authorized articles are included. He will approve their issue locally. A.O. 71 1912

228. On mobilization the additional articles required to bring the equipment held by units up to the war scale as laid down in Table 26 will be supplied by the A.M.D. 24 Genl. No. 2748

SECTION XIII.—MOBILIZATION EQUIPMENT.

234. Mobilization equipment, as defined in the Regulations for Mobilization, will be provided for all field units (even if temporarily allotted to garrison duties) and, with the exception of 2nd line transport, for all mounted and cyclist units permanently allotted to garrison duties. It will not be provided for dismounted units permanently allotted to garrison duties.

Digitized by Google

235. The details of war equipments, as defined in the Regulations for Mobilization, of those units for which mobilization equipment will be provided are summarized in mobilization store tables which, for convenience, are issued separately. (See Appendix XIV.)

The tables discriminate between the mobilization equipment which will be provided by the A.O.D. on mobilization and that for which County Associations will be responsible.

236. C.O.Os. will, during peace, make arrangements to ensure the immediate issue on mobilization of the stores to be supplied by the A.O.D.

County Associations will, during peace, make arrangements that the stores which are to be provided by them shall be forthcoming on mobilization. These stores will be provided out of an allowance which will be granted on mobilization. (See Regulations for the Territorial Force.)

The mobilization store tables have been prepared on the principle that stores, which are to be provided by County Associations, should be of a nature easily procurable at short notice from local tradesmen and institutions.

The nomenclature of the Priced Vocabulary of Stores has been adopted in framing the tables, but it is not intended that stores to be purchased by County Associations should be of strictly government pattern, provided they are articles suitable for the purpose for which they would be required. In order to assist Associations and C.Os. in determining the object for which any article is included in the war equipment of a unit, samples of government pattern may be obtained on loan, as desired, from the A.O.D. As the whole object of the scheme is to save time by tapping as far as possible local resources on mobilization, County Associations are at liberty to delegate the power to purchase and collect the various items on mobilization to Os.C. units ; for the same reason and to avoid overlapping of orders no arrangements should be entered into with manufacturers outside the county area nor with local tradesmen for the supply of articles which they do not ordinarily keep in stock.

54
Reserve
264

237. The regiments of Irish Horse, except the two squadrons allotted to the expeditionary force, and King Edward's Horse will be provided with mobilization equipment on the scale laid down for yeomanry, but the whole of the stores will be provided by the A.O.D. Transport, in complete turnout, will be impressed under Section 115 of the Army Act.

238. The additional requirements of units allotted to garrison duties, which are not in possession of mobilization equipment, will be met by the issue of equipment by the A.O.D. locally under the Defence Scheme. (See Regulations for Mobilization.)

239. Regimental reserve of ·303-inch small-arm ammunition will be drawn from the A.O.D. in the command in which the peace headquarters of the unit is situated, on the following scale :—

Digitized by Google

	Rounds.	
Yeomanry	100	Per rifle.
	6000	Per machine gun.
Infantry:—		
Staff-sergeants, drummers and buglers	Nil	Per rifle.
Pioneers	40	
Other ranks	100	
Machine guns	6000	Per gun.
Royal Artillery (all units)	30	Per N.C.O. and man.

A.O. 47 / 1912

This ammunition will normally be taken by units in regimental charge to war stations. If, however, the war station is in the same command as the peace headquarters of the unit, the issue of ammunition may be arranged for as the G.O.C.-in-C. may direct.

239A. In the case of cyclist battalions who proceed to their war stations at once on mobilization, the small-arm ammunition required (service and regimental reserve) may be held during peace at the headquarters of companies.

79 / 4569

240. A further reserve of ·303-inch small-arm ammunition on the following scale per arm (except for rifles in possession of drummers and buglers) for divisional and mounted brigade units forms part of the mobilization equipment of brigade and mounted brigade ammunition columns. This ammunition will be drawn from the A.O.D. in the command in which the peace headquarters of the column is situated.

A.O 47 / 1912

Yeomanry	100
Infantry	100
Machine guns—Yeomanry and infantry	10,000

} Rounds.

For army troops battalions (including cyclist battalions) and for squadrons of Irish Horse not allotted to the expeditionary force, this further reserve of ammunition will be held by the A.O.D. in the command where the war station of the unit is situated.

241. Pistol ammunition on the following scale will be drawn for officers and other ranks armed with a pistol in time of war, from the A.O.D. in the command in which the peace headquarters of the unit is situated :—

8 / Equip. / 459

Unit.	Number of rounds carried.		
	On the officer, or man.	In regimental transport.	In brigade ammunition column.
Yeomanry	12	12	12

8 / Equip. / 459 / 437

Digitized by Google

242. The place of storage of reserve ammunition in peace and any detailed arrangements for its supply will be laid down in local mobilization orders, command schemes, and coast defence schemes respectively. All units will be kept informed during peace of these arrangements as far as they are concerned.

SECTION XIV.—COUNTY RIFLE ASSOCIATIONS.

N.B.—The following instructions are to be regarded as temporary only. The question of future administration of County Rifle Meetings, and their connection with the Territorial Force County Associations, is under consideration.

A.O. 98 1913

246. ·303-inch ball ammunition is issued, free and carriage paid, for use at the annual meeting of a County Rifle Association, the formation of which has been sanctioned by the G.O.C.-in-C., provided the competitions are to take place at a range approved by the War Office. The gratuitous supply is not to exceed 5 rounds for each officer and man of the Territorial Force in the county, as shown in the annual returns rendered to the War Office on the 1st October. If, on receipt of indents by the A.O.D., the printed Annual Return of the Territorial Force for the 1st October preceding has not been received in the command, the figures given by indenting officers should be verified by reference to brigade commanders. The verified figures so obtained should govern the issues and should be entered on the vouchers by which the ammunition is written off charge in the accounts of the A.O.D.

247. Indents for small-arm ammunition for use at a meeting of a County Rifle Association will be made on A.F. G 811, and will be addressed to the G.O.C.-in-C., who, should he approve of the competitions, will authorize the issue. Copies of this form may be obtained from the C.O.O. Only such number of rounds as will probably be required for actual use at the meeting will be demanded.

248. If more than the regulated number of rounds are required for use at a meeting, an additional supply will be made on repayment.

249. All ammunition remaining unexpended after a meeting of a County Rifle Association will be returned to the ordnance depôt from which it was drawn within 14 days after the close of the meeting, together with a statement showing how the ammunition issued free and on repayment has been expended. The value of any repayment ammunition so returned will be refunded.

A.O. 165 1913

250. An allowance at the rate of 10*s.* per 100 lbs. of fired cartridge cases will be paid by the command paymaster for the labour of collecting and sorting cases and chargers obtained from ammunition supplied gratuitously.

Digitized by Google

251. In the case of ammunition supplied gratuitously the O.O. making the issue will see that the proper proportion of empty cases and chargers is returned to store or their value credited to the public.

252. One Rifle Association only will be recognized in each county. When two or more counties are united in one association, separate associations for such counties cannot also be recognized. Units belonging to more than one County Rifle Association will not be included in more than one application for the gratuitous supply of ammunition.

253. The supply of camp equipment to County Rifle Associations will be limited to the marquees and office tents necessary for the business of the meeting, and for the number of enlisted men who actually go into camp and compete in the shooting matches of the Association. A certificate to this effect will be given by the president or secretary in support of the camp equipment demanded. The carriage of the camp equipment will be paid by the public.

WE CERTIFY, in accordance with paragraph 5, Equipment Regulations, Part 3, that on the transfer of the equipment

of the* .....

on the† .....

the whole has been verified, and has been found to be properly appropriated, in good condition, and to agree in the quantities and numbers of the several articles actually in possession, with those shown in the equipment ledger of the unit.‡

.....

Accountant giving over charge.

.....

Accountant taking over charge.

.....

* Here insert the unit.

† Here insert the date.

‡ In cases where discrepancies are found to exist between the quantities actually in possession and the equipment ledger, the following words are to be added to the certificate, "*with the exception of the items shown in the accompanying list of discrepancies.*" Any explanation that can be given to account for such discrepancies should also be forwarded.

Digitized by Google

APPENDIX II.

(Referred to in paragraphs 36 to 40.)

INSTRUCTIONS FOR KEEPING EQUIPMENT LEDGERS.

1. The ledgers will contain a faithful record of all permanent equipment, the property of the Government, received or issued. They will be balanced up to 31st October in each year, and will be forwarded, before the 1st December, with the vouchers in support, through the County Association, to the local army audit office. The vouchers are to be laid flat in the equipment ledger.

2. Copies will be kept of all equipment ledgers sent for examination. Should any queries arise on the examination of the ledgers, copies of such queries and of the replies will be retained by the accountant, who will correct his copy of the ledger accordingly.

3. On a unit being disbanded the equipment ledger will be balanced and forwarded to the local army audit office.

4. When, upon a change of command, equipment is transferred from one accountant to another, the procedure laid down in paragraphs 4 to 6 of these regulations will be followed.

5. Any stores found to be surplus will at once be brought on charge in the ledger by certificate receipt voucher. The voucher will be signed by the officers who sign the certificate. All stores found to be deficient will be struck off charge, and dealt with as laid down in paragraphs 18 and 23 of these regulations.

A balance will then be struck, as directed in paragraph 12 of this appendix, which will show the total of each article of equipment for which the officer who takes over command is responsible.

6. Stores supplied in sets or as complete articles for which a single heading is provided in the printed equipment ledgers, will be so accounted for. Thus, chests with tools will be shown as "chests, tool, filled." A certificate will be given at the end of the ledger by the C.O. to the effect that the sets and tool chests are complete, and that they contain the articles which should be comprised in them, as detailed in the regulations. When articles charged in detail are taken on in the equipment ledger as sets, reference will be given to the paragraph or table of the regulations which gives the detail. The articles drawn from the A.O.D. to replace losses, &c., in these sets will be taken on charge in the ledger, and the corresponding articles paid for or returned to store will be written off under the same heading. Transactions in component parts of complete articles will be recorded in the ledgers in the same way (but see paragraph 36).

A.O. 276 1912

A.O. 276 1912

If the two transactions do not occur in the same period of account, explanatory cross references will be given on each of the vouchers concerned.

7. All transactions of receipt and issue that should be recorded in the ledgers will be posted as soon as possible after they occur, and will be supported by voucher.

Digitized by Google

8. Vouchers for stores issued are called issue vouchers, and are posted on the right hand or credit side. Vouchers for stores received are called receipt vouchers, and are entered on the left hand or debit side of the ledger.

9. Both receipt and issue vouchers will be filled in by the insertion of the total numbers only in the column of the voucher headed "total number or quantity," the columns S. R. D. and U. being left for use of the A.O.D.

10. The ledger folios at which entries are made should invariably be noted on the vouchers supporting the account in the column headed "ledger folio."

11. Receipt vouchers and issue vouchers will be kept distinct from each other, arranged consecutively according to date, and numbered on the face of the voucher in two distinct series from 1 upwards for the whole period of the account. The total number of each series will be stated on the inside cover of the ledger.

12. The ledger is balanced by adding up the receipts on the left hand side, and the issues on the right hand side of the ledger, by bringing the total issues over to the left hand side and writing them immediately under the total receipts; the quantities left become the ledger balance or "remain." The remain, when carried forward as the commencing line of the next account, is called the "state."

13. Officers will take care that the ledgers and vouchers are not ticked or altered with coloured pencil or coloured ink, that no correspondence is carried on upon them, and that no erasures are made. No entries should be made in black lead pencil either in the ledgers or on the vouchers. Any necessary corrections should be made in black ink or indelible pencil, and will be duly initialed, in the case of vouchers by the person who signs the vouchers, and in the case of ledgers by the responsible accounting officer; but the original entries should remain legible.

A.O. 388 1913

14. Before signing and forwarding the equipment account the O.C. the unit will cause the stores to be verified as required by paragraph 4 of these regulations. In cases where discrepancies are found to exist between the quantities actually in possession and the equipment ledger, a statement of such discrepancies should accompany the account.

The C.O. or an officer on his behalf, who should not be the officer immediately supervising the accounts and stores, shall at the same time examine the ledger and its vouchers.

ACTIVE SERVICE.

A O. 276 1912

15. Units (including those formed on mobilization) will account for equipment as in peace, unless other instructions are issued by the Army Council.

Digitized by Google

APPENDIX III.

(Referred to in paragraph 21.)

DURATION OF PUBLIC EQUIPMENT.

General Instructions.

Periods of duration have been assigned to the articles enumerated in the following table, with the object of informing County Associations, C.Os. and O.Os. of the length of time public equipment should remain serviceable under ordinary circumstances if new when issued. Equipment issued in a part worn condition should normally last at least half the period prescribed for new articles. The periods of duration are not intended in any way to govern the times for exchanging the stores, which must continue to be used until actually unserviceable. Should it appear that articles are becoming unserviceable before they have been in use the prescribed periods, inquiry should be made into the cause thereof, since, in the absence of sufficient reason to explain the circumstance, the troops become liable to be charged in accordance with paragraphs 18 to 24 of these regulations.

On active service the periods of duration are liable to vary according to the conditions to which the articles may have to be subjected, but the prescribed periods will be kept in view, and adhered to as far as practicable.

Periods of Duration.

APPENDIX IV.

(Referred to in paragraph 46.)

9 Arty. 1358

CONDITIONS GOVERNING THE SALE OF RIFLES.

Rifles of any service pattern may be issued on prepayment, under the following conditions, to officers, N.C.Os. and men of the Territorial Force.

Issues of arms on payment will not be made to members of the Territorial Force Reserve.

Conditions.

9 Arty. 1358

(1) Issues, which will be limited to one rifle per officer, N.C.O. or man, will be authorized on the distinct understanding that it is not required for the purposes of sale or trade.

(2) Rifles must be obtained from Weedon, and are not to be issued on prepayment from local stock. They will be demanded through the usual channels on quarterly indents, which should be submitted so as to reach Weedon on the 1st January, 1st April, 1st July, and 1st October.

A nominal roll showing the ranks, names, and units of the individuals for whom arms are demanded should accompany each indent.

9 Arty. 1358

(3) Prior to despatch from Weedon a special sale mark will be applied to all rifles issued for sale.

(4) Rifles bearing the special sale mark will be issued on prepayment.

Local stocks of arms bearing the special sale mark will not be held in anticipation of prepayment demands.

A.O. 165 1913

(5) The vocabulary rate current at date of issue, plus 1*s.* per arm to cover the cost of special sale marking, will be charged, and recovered locally by the command paymaster.

9 Arty. 1358

(6) Rifles sold under the foregoing conditions will become the personal property of the purchaser, and will not be accounted for in the equipment ledgers of units.

(7) Spare parts and components may also be supplied on prepayment for the repair of service arms issued under the foregoing instructions. Barrels with bodies must be obtained from Weedon in the manner prescribed for complete arms. They will be marked with the special sale mark, for which a charge of 1*s.*, in addition to vocabulary rate, will be made. Credit for replaced parts, if returned to store, cannot be allowed.

APPENDIX VII.

(Referred to in paragraphs 94 and 99.)

THE FOLLOWING INSTRUCTIONS FOR THE CARE AND PRESERVATION OF BROWN LEATHER ACCOUTREMENTS AND THE LEATHER OF HARNESS AND SADDLERY ARE FOR GENERAL GUIDANCE

(I.) ACCOUTREMENTS.

When brown leather accoutrements require to be cleansed from dust and dirt, they should be washed with yellow bar soap and water, and dried in the shade.

To preserve and polish brown leather accoutrements, a dubbing composed of—

10 ozs. of clean mutton tallow,
6 ozs. of pure beeswax,
3 drams of camphor,

melted and mixed over a slow fire, should be used. These ingredients will make one pound of the composition, which should be rubbed on to the grain, or smooth side of the accoutrements, with a piece of coarse cloth, using as much friction as possible to enable the fatty substance to penetrate. A portion of the wax will then remain on the surface, and dry rubbing will always bring on a polish. An application of this composition once a month will, in ordinary circumstances, be found sufficient, and an allowance of 2 ozs. per man per month will be found ample; but whenever it is necessary to clean the accoutrements with soap and water, an application of the composition should always be made before the leather is quite dry. When accoutrements get stained with mildew or perspiration, or otherwise, a slight application of limejuice will remove the stains.

(II.) HARNESS AND SADDLERY.

1. Once in every six months the saddlery and harness in possession will be laid by in dubbing for two or three days.

2. The whole of the strapping composing the saddlery and harness will be taken to pieces; and after the articles have been cleaned, and while they are damp from the use of a wet sponge, the dubbing will be lightly rubbed in. It may be applied with a rag, sponge, or brush. Dubbing spreads more uniformly, and is incorporated more thoroughly with the fibres of the leather, if applied when the leather is damped. In the winter months the dubbing should be warmed.

Digitized by Google

3. When the dubbing has had time to penetrate the leather, which will be in two or three days, the residue of tallow on the surface should be rubbed off, and the article polished up with a cloth or brush. If this is properly done, and only a sufficiency of dubbing has been used, the leather will not soil the hand or glove when handled.

4. Rifle buckets, and seats and flaps of saddles, being of uncurried leather and requiring to be kept stiff, should only be very lightly dubbed *annually*, but occasional soap sponging is necessary to preserve the grain.

5. Soap should be used daily, where articles are in constant use, to produce mellowness in the leather rather than an outward gloss. Inspecting officers should handle the straps to ascertain that they are pliable, and in good preservation.

6. So long as leather remains dry and clean it needs but little attention, beyond receiving a little grease half-yearly; but when wetted, either by rain or by the water necessary to clean it, the leather becomes hard and stiff, if not softened with some oily matter.

7. Leather must not be washed with soda nor soaked in water Its vitality is quite destroyed by being soaked in hot water, and it will be found afterwards to readily crack when bent. Washing the leather with soap and *luke-warm* water, quickly and without soaking, will not injure it if the precaution is taken to apply oil, dubbing, or good soap, while the article is slightly damp.

8. Drying the leather by the fire destroys its durable properties, and is strictly forbidden.

9. Leather articles exposed to the action of ammonia, which is continually given off in stables, become weak and rotten sooner than those not so exposed. But the grease of oil, soap, or dubbing, applied from time to time, penetrates the leather, nourishes it, and fits it to resist the deleterious effects of ammonia, and of atmospheric moisture ; it also fills up the fibres, makes the leather more mellow, and increases its tensile strength.

10. Soft soap contains an excess of alkali, and should be sparingly used ; if applied freely it gives the leather a dark and sodden appearance.

11. Bees-wax and saddle soaps, commonly used in the service to give a polish to the grain of the leather, are not objectionable, providing good yellow soap is used to the flesh (under) side to keep the leather mellow.

12. Harness and saddlery, when kept in store, should be properly cleaned and soaped, or dubbed, before being stored. The officer immediately responsible should inspect them monthly.

APPENDIX XI.

(*Referred to in paragraph* 117.)

INSTRUCTIONS FOR MARKING VEHICLES, BICYCLES AND PACKSADDLERY.

1. These instructions are issued with the object that when vehicles are required for use on mobilization, they will be marked so as to show the title of the unit to which they belong and the formation to which the unit is allotted.

2. These marks, called "Corps marks," are to be on the same system for all vehicles, and for all branches of the service. The position of the marks will be as follows :—

B.L.C., Q.F. guns and	On trail off side.
B.L. Howitzer carriages	
B L. 10-pr. gun carriages ...	
Limbers and Ammunition Wagons—	
B.L.C. 15-pr., Q.F. 15-pr. and 4·7-inch	Centre of back of ammunition boxes.
B.L. 6-inch Howitzer	Back of limber box, near side, close to top.
B.L. 5-inch „	Back of ammunition or limber box, off side, close to top.
Carriage M.G. Infantry ·303-in.—	
Mark I	On centre of front plate.
„ II	On back of off locker.
„ III	On rear of carriage, off side.
Carts—	
Cable	Off side of front box.
Tool, R.E.	Off side at front.
Water tank—	
Marks I* and II	On rear end of tank, off side.
„ IIA and IIB	Off side of tank, low down at front.
Wagons—	
Air Line...	Off side of front box, low down.
Ambulance Mark V*	Off side of body, low down.
„ light	
„ Mark VI	Off side on locker.
Cable	Off side of futchel of body and Off side of footboard of limber.
Pontoon (or trestle)	Off side at front.
Wireless telegraphy	Off side of body and offside of limber low down.
Other vehicles (if construction admits)	On body of vehicles, on off side as far to the front as possible, and low enough to be clear of tarpaulin or other cover.

Digitized by Google

INSTRUCTIONS FOR MARKING VEHICLES—*continued.*

Bicycles	Across the rear mudgard 4 inches above the bridge and on the upper side of the bottom tube, commencing just clear of the bottom lug of the ball head.
Mountain Artillery— Packsaddlery saddles	Off side as convenient.

9
London County
551
A.O. 248
1913

Corps marks should appear on both portions of limbered vehicles.

Vehicles obtained by impressment on mobilization will be marked as most convenient for identification. Thin sheet iron plates, about 10 inches by 5 inches, should be obtained and marked during peace ready for attachment to these vehicles. For headquarters units these plates will be stored during peace by the A.O.D.

3. In addition to the above-named "Corps marks" there are a number of details chiefly for regimental convenience, marked on certain vehicles, such as the nature of gun, number or letter of subsection, number of wagon, &c. These details are not to be mixed up with the corps marks, and will be placed as in Table III. The general principles indicated in that table should be followed in marking any vehicles for which specific details are not given.

4. The details of the marking are given in the following paragraphs. All vehicles detailed for use with medical units will be marked with the Geneva cross, in addition to corps marks, &c.

5. Drawings to illustrate the method of marking, and the typical position of the marks, will be issued on demand to C.O.Os., who will arrange for necessary promulgation to the troops requiring them. These drawings are only issued as guides, and where they differ from equipment regulations the latter must be followed. The markings of vehicles will be performed by hand-painting.

All marking will be in white paint (except the Geneva cross, which will be in red on white ground) in letters and numerals as laid down in Table IV.

6. "Corps marks" generally require two lines :—

First line—Title of unit, *e.g.*, 4 Gord. Highrs.

Second line—Formation to which unit is allotted, *e.g.*, Gord. Inf. Bde. T.F.

Table I shows the abbreviations to be used for titles of units.

Table II gives examples of first and second lines.

7. Vehicles in possession of units and those held by A.O.D. to complete war equipments of units will be marked in full.

NOTE.—For details of Arms, Accessories, Accoutrements, Small-Arm Ammunition, Camp, Picketing and Signalling Equipment, &c., to be supplied to or provided by artillery units, *see* Equipment Regulations, Part 3.

COAST DEFENCE UNITS.

1. Details of the arms and accessories supplied, and accoutrements to be provided, are shown in Tables 1 and 2 of Equipment Regulations, Part 3.

2. Guns are allotted for instructional purposes to meet the requirements of corps.

3. The guns will be provided with the proper equipment of side-arms, &c., *see* Details of equipment for practice batteries and drill guns (fixed mountings) issued separately. Stores will also be allowed for instruction and repository exercises as shown in Table 1. The proportions laid down in these tables will not be exceeded.

4. Depression range finders and tripod stands are allowed for instructional purposes, as also laid down in Table 1.

Pedestals for instructional purposes, where considered necessary, are provided to meet the requirements of units.

5. Gyns, &c., have been allowed in certain exceptional cases. All issues of such stores must be specially authorised.

6. The officer commanding will be responsible that the artillery matériel is kept in an efficient state, and that due economy is observed in its maintenance. He will forward all reports on and recommendations proposing the comdemnation of matériel, in the case of Coast Defence units, to the Commander of Coast Defences. *See* also paragraph 24 with regard to the provision of local labour to assist artificers.

7. The serjeant instructors, or non-commissioned officers of the Royal Artillery attached as temporary drill instructors will act under the orders of the adjutant as custodians of the guns, gun ammunition, and artillery stores.

Allowance for Practice.

8. Gun ammunition (including that for aiming rifles, aiming tubes, &c., and blank) will be allowed to the value and amounts shown below.

(i) Garrison Companies.

Per company ... ... £73 annually

Digitized by Google

(ii) **Officers undergoing courses of Instruction.**

(*a*) Garrison artillery course comprising— £
1st, 2nd, and further months ... ... 40 per officer
(*b*) Fire discipline and coast defence ... ... 10 „

Officers undergoing subsequent courses of gun practice will participate in the ammunition expended in connection with either of the courses above referred to.

9 Artillery 447. ... 1685. ... 1302.

(*c*) Thirty rounds of 12-pr. B.L. ammunition annually for each officer of Territorial Horse, Field, or Heavy Artillery, who attends the Artillery practice camp at Glen Imaal, Okehampton, Salisbury or Trawsfynydd, or the short course of Field Gunnery at Shoeburyness.

(*d*) Ten rounds (heavy) 6-inch B.L. Howitzer or 10 rounds 4·7-inch Q.F. shrapnel for each officer of a Heavy Battery, Royal Garrison Artillery, who attends courses of instruction at Lydd, up to a maximum of 20 officers per annum.

Commutation will be allowed as follows under (*d*):—

One round of 4·7-inch Q.F. shrapnel for six rounds of 12-pr. B.L. ammunition up to a maximum of 40 rounds (4·7-inch) per annum.

(iii) **Permanent Staff.**

The value of ammunition on the basis of £1 per Company will be divided equally between, and credited annually to, the Schools of Instruction at Golden Hill, Plymouth, Sheerness, and Broughty Ferry for practice of N.C.Os. of the permanent staff undergoing re-drilling, and N.C.Os. qualifying for permanent staff. The amount available will be notified annually. When practicable, gun practice will be carried out in conjunction with the practice of officers' classes.

9. The approval of the general or other officer commanding, obtained through the Commander of Coast Defences responsible for the training of the corps, will be obtained for the proposed expenditure under (i) of paragraph 8.

10. Ammunition to be used for guns on Royal Artillery charge will be accounted for by the armament officer, and on conclusion of the season's practice of each unit vouchers will be passed transferring to the unit or corps such ammunition as has been actually expended, which will then be dealt with as laid down in Section I, Part 3, Equipment Regulations.

11. Indents for gun ammunition will be made on Army Form G. 988.

Heavy Batteries.

12. The instructions under the head of Divisional Artillery, para. 15 *et seq.*, will, as far as applicable, also apply to these batteries.

13. Gun ammunition for practice will be allowed as follows:—

4·7-inch Q.F. As laid down for heavy batteries of Divisional Artillery.

Digitized by Google

6-inch B.L. howitzer :—

Cartridges, B.L. filled 6-inch Howitzer	1 lb. 15½ oz. Cordite, size 5... ...	50
	2 lb. 8½ oz. Cordite M.D. size 4¼ ...	50
Shells B.L. filled 6-inch Howitzer	Common Iron, heavy	45
	Common Lyddite, heavy	5
	Shrapnel	50
Fuzes	Percussion D.A. with cap, No. 1 ...	45
	„ „ with cap, No. 17...	5
	T. & P. middle, No. 54	50
Tubes	T. friction	110

14. Paragraphs 21, 22, 24 and 25 also apply to Coast Defence units.

DIVISIONAL ARTILLERY.

(Also mounted brigades.)

15. The details of War Equipments as defined in Regulations for Mobilization of those units for which mobilization equipment will be provided are summarized in mobilization store tables which, for convenience, are issued separately in pamphlet form as sub-numbers of Army Form G 1099 (*see* para. 71) and stores for use in peace only will be found in Table 3.

16. The equipment for brigade headquarters will be held by the ammunition column or one of the batteries of the brigade as may be most convenient.

17. A non-commissioned officer of the permanent staff will act as custodian under the orders of the adjutant.

18. The following instructions are to be observed with regard to the storage of technical vehicles, ammunition, &c., in charge of the unit :—

9 Art. 927

The whole of the technical vehicles with the ammunition and stores appertaining to them which form the war equipment of batteries and ammunition columns, will as a general rule be in possession of the Territorial Force Artillery in peace time, and will be stored as follows :—

(*a*) Gun cartridges in magazines and lyddite shells in shell stores.

(*b*) Plugged shrapnel shells and tubes and fuzes in cylinders packed, as a general rule, in the vehicles to which they belong.

This ammunition is perfectly safe, if stored as above, and danger is not to be apprehended, nor is risk of damage to life or property in any way increased, even if fire should attack wagons and buildings so packed. Buildings containing this ammunition will however be subject to para. 104, Regulations for Magazines and Care of War Matériel, so that in cases where vehicles are stored in drill halls or other buildings to which the requisite restrictions cannot be applied, it will be necessary to arrange for separate and suitable accommodation for the shells, &c.

Digitized by Google

(*c*) Vehicles should as a rule be stored on their wheels, but ammunition wagons not required for peace training may, to economize space, be dismounted and packed as close as possible. In the latter case the shrapnel shells, tubes and fuzes may be stored in boxes near the vehicles (see *b*).

Wagons not required for training and all gun ammunition, may be stored in charge of the Army Ordnance Department or of the Royal Artillery (Regular Army) where accommodation exists, but only if equipment thus stored could be drawn by the Territorial Force unit concerned within 24 hours by road and without entailing despatch by the holder.

19. Service ammunition to make up the difference between the approved scale and that to be held by units in accordance with mobilization store tables will be stored in Army Ordnance Department charge.

20. The work of examination and repair of vehicles, harness, saddlery and equipment should be carried out by the battery artificers so far as may be possible. The work so done may be counted as drills as laid down in the Regulations for the Territorial Force. No payment can be made for the work done under these conditions from Army or Association funds.

21. Applications for the inspection or repair of public equipment which cannot be carried out by the artificers should be addressed to the Chief Ordnance Officer of the area.

22. Instructions for periodical technical examination of ordnance and public equipment will be found in the Regulations for *Army* Ordnance Services, Parts I and II, and in the Regulations for Magazines and Care of War Matériel.

23. Spare parts are supplied solely for the purpose of replacing similar or damaged parts, and will not be used for any purpose other than that for which they are maintained, unless specially authorized.

24. The expense incurred in providing assistance to enable examiners, or artificers from Woolwich, to carry out the examination or repair of guns, will be borne by the public. The rate of pay for such assistance will not exceed 4*s.* per man for a full day's work, or 6*d.* per hour for a shorter period. The officer commanding will submit the account through the Chief Ordnance Officer of the area to the Chief Inspector, Woolwich, to be certified as correct before payment, which will then be made locally.

25. When assistance has to be provided for district armament artificers, payment for the service may be made locally at the above rates on the certificate of the Inspector of Ordnance Machinery in the area.

26. All spare parts should be tried for interchangeability as soon as possible after receipt, and a report of the defects, if any, forwarded to the Chief Inspector, Woolwich, through the Chief Ordnance Officer of the area.

27. Spare wheels and poles for technical vehicles are allowed to commands in accordance with table 2.

Digitized by Google

28. Gun Ammunition for practice will be allowed as shown below :—

* Only 25 per cent. of No. 60 fuzes will be allowed.

† This reduced charge may be used instead of the full charge when considered desirable for local reasons.

NOTE.—No commutation will be allowed, except in the case of heavy batteries equipped with 4·7-inch Q.F. guns who may commute some of their gun ammunition for aiming rifle cartridges.

Digitized by Google

9
Artillery
1377

29. At the discretion of the General Officer Commanding, units may practise biennially and expend two years allowance of ammunition in one year, but practice in the following year must be omitted or vice versa as the case may be.

30. Units which have facilities for carrying out practice at local ranges within easy reach of their headquarters, may, at the discretion of the General Officer Commanding, expend part of one year's allowance in this way, the balance to be taken in aid of the other year's allowance when they practise in camp.

31. No carry over of ammunition from one period of two years to another will be allowed. The periods will be reckoned as commencing on the 1st November, 1910, and the 1st November in succeeding even years.

32. Blank ammunition for Reviews and Field Days will be allowed as follows :—

	Annually.
Horse, Field, Mountain, and Heavy, per battery ...	50 rounds.
Per Territorial Division, at the discretion of the Territorial Divisional Commander	500 „
Per Mounted Brigade, at the discretion of the Mounted Brigade Commander	40 „

33. Officers commanding artillery units, the headquarters of which are distant from government magazines, will, in order as far as possible to avoid the necessity of making supplementary indents, apply at the beginning of the training season for the estimated number of rounds of blank ammunition for use during the year with the guns in possession.

0143
130

34. To ensure a proper "turnover" of ammunition, all service ammunition fired at annual practice by batteries will, as far as possible, be taken from their service equipment; that in peace equipment being used up first. Ammunition of oldest date of manufacture will be used up first.

Demands (on Army Form G. 988) to complete equipment will be put forward prior to the departure of batteries to practice, so that on their return to their stations the ammunition may be in readiness. In order to further ensure turnover, the ammunition to complete units will be supplied as far as possible from that stored in Army Ordnance Department charge for units of the Divisional Artillery.

GENERAL INSTRUCTIONS.

35. Except for Coast Defence Companies, shells containing undrowned explosives, fuzed or unfuzed, may not be fired over sea ranges at a towed target, and when fired at a drifting or anchored target, it must be over deep water.

36. Empty common shells to be fired plugged will be filled with salt cake (to bring them to the required weight), and have their metal plugs screwed in the fuze holes. Only those shells required for immediate practice will be filled with salt cake. Shells filled with salt cake which have not been expended in practice, or which have been recovered after practice, will be washed out and dried before being placed in store.

Digitized by Google

37. When filled shells are to be fired plugged, the bursting charge must first be drowned by filling the shells with water.

38. When sealed cylinders of tubes, fuzes, primers, &c., or packages of Q.F. ammunition have been opened for use, and their contents have not been expended, they will be re-closed and retained in excess of equipment and used up at practice on the first opportunity.

39. Tubes, friction T push, will, as soon as possible, and not later than 24 hours after firing, be immersed in ordinary mineral oil for 24 hours, and after removal be allowed to drain. The tubes will then be returned to the Army Ordnance Department for transmission to Woolwich to be cleaned and refilled.

To enable this service to be carried out, half a gallon of oil is allowed under Appendix I. Table E. Any of the oil actually expended in the treatment of the tubes (which is about $\frac{1}{10}$-pint per 100 tubes) will be replaced annually by indent on the Army Ordnance Department. Tubes, friction T, will not be immersed in oil but will be returned to the Army Ordnance Department for transmission to Woolwich.

40. The following will be brought on charge by certificate voucher and returned to Army Ordnance Department charge :—

Empty cases of Q.F. cartridges.

Fired primers, electric large, which should not be treated as components of the empty cartridge cases.

Fuze hole plugs taken from fuzed shells.

41. Any prematures or other failures which may occur in the ammunition used at practice will be reported in accordance with the instructions laid down in Instructions for Practice Seawards, and Instructions for Practice Horse, Field, and Heavy Artillery. Articles taken from previously opened cylinders will be distinguished from others in the report.

42. Immediately on the close of artillery practice each day, search will be made on land ranges for unexploded projectiles. Plugged shells not filled with explosives, and shot, which may be found, will be handed over to the Army Ordnance Department, but all fuzed shells and all filled plugged shells will be destroyed *in situ*, as laid down in the Regulations for Magazines and Care of War Matériel.

43. A set of stores for the destruction of shells, also such quantity of guncotton and detonators as are considered necessary, will be allowed to each land range. The regulations for packing and storing guncotton and detonators will be strictly observed, and where there are no suitable buildings or sheds available for storage, tents will be used for the purpose. The destruction of shells by means of guncotton will only be carried out under the personal superintendence of the adjutant. Where grass is likely to be injured by the fragments of projectiles lying about, arrangements should be made to collect and pile them on bare spots in the neighbourhood.

Digitized by Google

44. Rewards will be paid for the recovery of projectiles, in accordance with the Regulations for Army Ordnance Services, Part I.

45. Notices will be posted up in the vicinity of all ranges, cautioning civilians against the extreme danger of handling projectiles found on the range, and informing them that no reward or payment of any description for finding shells or collecting projectiles will be paid to a civilian.

TARGETS.

46. For coast defence units, sets of high-speed targets are maintained in Coast Defence Commands for general use.

47. Drawings and specifications to guide manufacture of the high-speed target, also spare parts and materials for repair, can be obtained on demand from the Army Ordnance Department if required.

48. Where practice is carried out on a sea range, floating targets are allowed to a battery in a proportion not exceeding four per battery. In cases where two or more batteries practice together, the proportion will not exceed six targets to two batteries. Where batteries have facilities for firing over land an establishment of land targets, standing or moving, or dummies, not exceeding in value for one battery 13*l.*, two batteries 20*l.*, and three batteries 30*l.*, is allowed. The employment of moving targets (land) will be specially authorised by the General Officer Commanding-in-Chief, and will be limited to batteries armed with guns on travelling or mountain carriages.

49. A description of the floating target Mark III to be used for sea practice, with detail of components, can be obtained from the Army Ordnance Department on demand. At certain stations where currents are strong, or other exceptional circumstances render the use of heavier or special targets necessary, sanction must be obtained from the War Office.

50. Floating targets are not, as a rule, to be left out at night.

51. For land ranges approved by the War Department, moving targets will be provided locally, their construction being arranged to suit the conditions of the range.

52. Targets and dummies, when purchased, will be taken on charge by the local ordnance officer, and afterwards issued by voucher to the corps concerned, and will be borne on charge in the equipment accounts of the corps. Bills for new targets and dummies, either to replace those shot away or damaged, or as a first supply, will be forwarded within the financial year in which the expenses are incurred by officers commanding corps to the chief ordnance officer, who, after due approval, will arrange for payment. Except in the case of a first supply, the bills will be accompanied by a statement showing why purchase was necessary, and how the old targets or dummies were disposed of. Before targets or dummies, or parts of them, are purchased, it should be ascertained from the chief ordnance officer whether supply can be made from store.

Digitized by Google

53. Targets and rafts when shot away at practice will be written off charge by a certificate to that effect from the commanding officer on A.F. G 1049. When anchors and cables are lost, the circumstances will be investigated and dealt with under Section I, Part 3, Equipment Regulations.

MAGAZINES: STORAGE AND EXAMINATION OF EXPLOSIVES.

54. At places where the Government magazines do not afford accommodation for the storage of made-up gun ammunition, the County Association will be required to provide magazines for its safe keeping. Magazines acquired by County Associations must be approved by the General Officer Commanding-in-Chief.

55. Where magazines are County Association property, magazine clothing will be provided by the County Association. If Government magazines are utilized under army regulations, the clothing provided for them may be worn.

56. The instructions contained in the Regulations for Magazines and care of War Matériel regarding the arrangement of the contents of magazines and stores for the purposes of record will be observed in all magazines or stores containing ammunition in charge of artillery units.

57. The precautions to be observed in magazines, and general instructions regarding the packing and storage of ammunition, also precautions against and instructions in the event of fire are laid down in A.Fs. G 940, G 940A, and G 947, copies of which should be placed in a convenient position in the magazine for the information of all concerned.

Cases or barrels will not be opened inside a magazine, or immediately outside the door.

58. Printed regulations for the lighting of magazines, A.F. G 877, should be placed in a convenient position in the lamp room for the information and guidance of those concerned.

59. The instructions contained in the Regulations for Army Ordnance Services, Part II, regarding the transmission of periodical returns relating to explosives, and the technical inspection of such explosives, will, as far as they are applicable, be followed.

60. Government ammunition is not to be stored in any magazine which does not belong to the W.D. or a County Association.

61. The storage of explosives in W.D. magazines is dealt with in Regulations for Army Ordnance Services, Part I. The storage in County Association magazines of ammunition, or explosives of any kind belonging to private bodies or individuals is forbidden.

62. Adjutants will inspect periodically the magazines of their corps, reporting to their commanding officers after each visit whether the regulations laid down for the custody and safety of the ammunition have been complied with.

PAINTING AND MARKING.

Painting.

63. Guns and their mountings, and all vehicles issued as public equipment, will be painted once every two years :—

Guns with two coats of paint.
Carriages, Limbers, and other Vehicles } with one coat of paint.

Paint and putty will be issued free, in kind, upon the scales detailed in Appendix I, Tables A and B. No other paint is to be used.

64. The provision of labour for cleaning, priming, stopping, and painting will be arranged for by County Associations. The sums prescribed in Appendix I, Tables A and B, will be issued biennially to Associations to cover this service. All claims must be supported by a certificate by the Commanding Officer of the unit, and countersigned by the Secretary of the County Association, to the effect that the work has been satisfactorily executed with the paint supplied. The claims must be transmitted through the Chief Ordnance Officer of the area, who will add a certificate showing that the articles enumerated in the claim form part of the approved public equipment of the unit.

65. Lyddite common shell may occasionally require painting or oiling.

The details of materials and paint brushes allowed are laid down in Appendix I, Tables C and D.

Commanding Officers will be responsible that the shells are correct to gauge. Gauges will be obtained on loan from the Army Ordnance Department.

Marking.

66. The instructions with regard to the marking, care and preservation of ordnance, carriages, slides, &c., in the Regulations for Magazines and Care of War Matériel will be followed as far as practicable by officers commanding in connection with the artillery matériel on their charge.

9 Eng. 641

67. Details of marking are shown in Part 3, Equipment Regulations.

CARE AND PRESERVATION.

68. Stores required for the care and preservation of equipment in possession of artillery units will be issued annually in accordance with the scales detailed in Appendix I, Tables E and F.

APPENDIX VII.

Detail Showing the Composition of Sets of Harness, Shaft, Draught, for Use with 6-inch B.L. Howitzers.

Description.	Harness, Shaft, Draught, for use with 6-inch B.L. Howitzers. Number per Set.				
	Wheel.		Lead or Centre.		
	Near.	Off.	Near.	Off.	
Section No. 2a.					
Ropes, head, hemp, with ring ...	1	1	1	1	
Section No. 5a.					
Harness, Shaft, Draught.					
Bands, back, 2½-inch	...	1	...	...	
Girths, luggage	...	1	...	...	
Numnahs, felt, luggage	...	1	...	...	
Pannels, I.A. saddle, luggage pairs	...	1	...	...	
Saddles, I.A. luggage, "L" ...	...	1	...	...	
Straps, girth	...	4	...	...	
Tugs, backband, 2½-inch	...	2	...	...	
Harness, G.S.O.P.					When stock exhausted, to be replaced by Bits, portmouth, reversible, and Heads, bridle.
Bits, portmouth, harness, with bridle head	1	1	1	1	
Breechings { near, with long strap	1	...	...	...	
Breechings { off	...	1	...	...	
Chains, hame	1	1	1	1	
Straps, flank	2	2	2	...	
Harness, P.D.G.S.					
Collars, neck	1	1	1	1	
Cruppers, harness, with hip straps	1	1	...	...	
Hames, Mark III ... ... pairs	1	1	1	1	
Leggings, drivers	1	...	1	...	
Pads, collar, Mark II	1	1	...	...	
Pieces, buckling, 1-inch	1	1	1	1	
Reins, bearing, Mark II	1	1	1	1	
Saddles, I.A. drivers, "L" ...	1	...	1	...	
Straps { back	...	...	...	1	
Straps { collar pad ... ... pair	1	1	...	...	
Straps { hame	1	1	1	1	
Straps { wither, 1-inch	1	1	1	1	
Whips, drivers	1	...	1	...	
Harness, P.D.R.A.					
Traces { wheel ... ... pairs	1	1	1	1	
Traces { short ... ... ,,	...	...	1	1	
Section No. 6.					
Saddlery, Universal.					
Blankets, saddle	1	...	1	...	
Collars, head	1	1	1	1	
Girths, leather, patt. '84	1	...	1	...	
Leathers, stirrup	2	...	2	...	
Numnahs, Mark VI	1	...	1	...	
Stirrups, iron, G.S.	2	...	2	...	
Straps, baggage	3	...	3	...	
Surcingles, leather	1	1	1	...

GENERAL INSTRUCTIONS.

NOTE.—*For detail of Arms, Accessories, Accoutrements, Small-arm Ammunition, Camp Equipment, &c., to be supplied to or provided by Engineer Units,* see *Equipment Regulations, Part* 3.

COAST DEFENCE UNITS.

1. Electric-light units, stationed in peace at their war stations, will be provided with instructional equipment from the establishment of stores for electric lights and telephonic communication authorised for those stations.

2. Electric-light units, stationed in peace at other than their war stations, will be provided with equipment of the following description, when available, according to a scale specially approved in each case :—

Oil engine.
Generator.
Projector, 90-c.m.
Electric-light accessories.
Wire and cable.
Testing instruments.

3. For works and land fronts, tools and materials for instruction in military engineering will be issued on the scale laid down in Table 1. This scale does not include bridging stores, the issue of which is made by a Commanding Royal Engineers, from sets held on charge by him for instruction as required by all troops in the Command. A set of bridging stores is detailed in Table 2.

4. Telephone equipment for peace training of telephonists at the headquarters of certain Coast Defence Units will be issued on the scale laid down in Table 3.

FIELD UNITS.

5. The details of War Equipments, as defined in Regulations for mobilization of those units for which mobilization equipment will be provided, are summarized in mobilization store tables, which for convenience are issued separately in pamphlet form by Army Orders, as sub-numbers of Army Form G 1099 (*see* para. 7), and stores for use in peace only will be found in Table 4.

Digitized by Google

Painting and Marking.

6. Tools, materials and allowances for painting service vehicles, &c., are laid down in Tables 5 and 6.

Mobilization Store Tables.

7. The following are the mobilization store tables referred to in para. 5 :—

Army Form G 1099.	Unit.
15	Headquarters of Divisional Engineers.
16	Field Company.
17	Divisional Telegraph Company.
18	Wireless „ „
19	Cable „ „
20	Air-line „ „
